CollabKit – A Multi–User Multicast Collaboration System based on VNC Christian Beier,2011-11-15

Diplomarbeit aus dem Jahr 2011 im Fachbereich Informatik - Angewandte Informatik, Humboldt-Universität zu Berlin, Sprache: Deutsch, Abstract: Computer-supported real-time collaboration systems offer functionality to let two or more users work together at the same time, allowing them to jointly create, modify and exchange electronic documents, use applications, and share information location-independently and in real-time. For these reasons, such collaboration systems are often used in professional and academic contexts by teams of knowledge workers located in different places. But also when used as computer-supported learning environments – electronic classrooms – these systems prove useful by offering interactive multi-media teaching possibilities and allowing for location-independent collaborative learning. Commonly, computer-supported real-time collaboration systems are realised using remote desktop technology or are implemented as web applications. However, none of the examined existing commercial and academic solutions were found to support concurrent multi-user interaction in an application-independent manner. When used in low-throughput shared-medium computer networks such as WLANs or cellular networks, most of the investigated systems furthermore do not scale well with an increasing number of users, making them unsuitable for multi-user collaboration of a high number of participants in such environments. For these reasons this work focuses on the design of a collaboration system that supports concurrent multi-user interaction with standard desktop applications and is able to serve a high number of users on low-throughput shared-medium computer networks by making use of multicast data transmission. The developed multi-user multicast collaboration system named CollabKit, realised by integrating and extending existing technologies, was compared against a conventional unicast remote desktop system and found to significantly outperform it when several clients needed to be served. Regarding the functionality requirements and performance metrics defined in this work, CollabKit could achieve the expected results. This work shows that it is possible to create a computer-supported real-time collaboration system with multi-user and multicast support by integrating existing technologies and extending them with custom implementations where needed: The developed system supports application-independent concurrent operation by multiple users, per-user graphical annotations and window sharing and scales well with an increasing number of users.

Lotus Notes 7 Course Technology,2006-09-11 The Axzo Press Lotus Notes 7 FastCARD is the perfect tool to get you using the basic tools of Lotus' integrated desktop client for accessing e-mail,

calendars, and applications on a Domino server. This quick start guide shows you how to navigate the Notes 7 interface and access the tools you need to complete common tasks, such as working with email, creating calendar entries, scheduling meetings, and managing contacts. It also provides you with skills for using the unique Web browsing and collaborative features of Notes. There's even a section with answers to the most frequently asked questions by new Notes 7 users. Need a Custom Solution? All of our quick reference guides can be branded or customized to meet your organization's needs. We can add your logo, corporate colors, help desk information or tailor the content to meet your requirements. The process is simple and easy. Contact your Account Executive to get started. Minimum order 1000 guides.

The Business of Media Distribution Jeffrey C. Ulin,2019-05-30 In this updated edition of the industry staple, veteran media executive Jeff Ulin relates business theory and practice across key global market segments—film, television, and online/digital—providing you with an insider's perspective that can't be found anywhere else. Learn how an idea moves from concept to profit and how distribution dominates the bottom line: Hollywood stars may make the headlines, but marketing and distribution are the behind-the-scenes drivers converting content into cash. The third edition: Includes perspectives from key industry executives at studios, networks, agencies and online leaders, including Fox, Paramount, Lucasfilm, Endeavor, Tencent, MPAA, YouTube, Amazon, and many more; Explores the explosive growth of the Chinese market, including box office trends, participation in financing Hollywood feature films, and the surge in online usage; Illustrates how online streaming leaders like Netflix, Amazon, Apple, YouTube, Hulu and Facebook are changing the way TV content is distributed and consumed, and in cases how these services are moving into theatrical markets; Analyzes online influences and disruption throughout the distribution chain, and explains the risks and impact stemming from changing access points (e.g., stand-alone apps), delivery methods (over-the-top) and consumption patterns (e.g., binge watching); Breaks down historical film windows, the economic drivers behind them, and how online and digital delivery applications are changing the landscape. Ulin provides the virtual apprenticeship you need to demystify and manage the complicated media markets, understand how digital distribution has impacted the ecosystem, and glimpse into the future of how film and television content will be financed, distributed and watched. An online eResource contains further discussion on topics presented in the book.

Transboundary Water Resources Management Jacques Ganoulis,Alice Aureli,Jean Fried,2013-09-13 Based on an international symposium addressing a key issue in global development, this reference includes both the latest methodologies for and practical examples of effective management of transboundary water resources. Its multidisciplinary approach combines hydrology and environmental science with economic and political approaches, in line with new UNESCO and EU recommendations, which have been formulated and implemented with the active involvement of all three editors. By providing a theoretical framework as well as abundant case studies from southern Europe, Africa, Asia and South America, this handbook provides hydrologists, geologists, engineers and decision-makers with all the knowledge they need for their daily work.

Syrian Refugee Children in Australia and Sweden Nina Maadad,2019-08-08 Both Australia and Sweden are economically, socially and politically well-developed countries and each has responded to the Syrian crisis in its own way with features that define refugee children's schooling trajectories for transition to life and work. Syrian Refugee Children in Australia and Sweden provides insights into policies influencing the education and schooling of Syrian refugee children in Australia and Sweden. This book uses the perspectives of Syrian refugee children and their voiced experiences to elicit recommendations for education practices and content. Their voices were central to the analysis for the main reason that their viewpoints could contribute in a practical way to the development of pedagogical approaches that would support their schooling, and an effective and productive transition to life in the host countries. The opinions, suggestions and experiences of other stakeholders such as parents, caregivers, teachers and school and state officials, were included for greater understanding so that as many relevant contexts are covered. The recommendations for refugee education proposed in this book will be useful for teachers, principals and policy makers directly involved in educating refugee students and this could positively impact on young refugee students finding their way to a new and better life.

Applied Spatial Statistics and Econometrics Katarzyna Kopczewska,2020-11-25 This textbook is a comprehensive introduction to applied spatial data analysis using R. Each chapter walks the reader through a different method, explaining how to interpret the results and what conclusions can be drawn. The author team showcases key topics, including unsupervised learning, causal inference, spatial weight matrices, spatial econometrics, heterogeneity and bootstrapping. It is accompanied by a suite of

data and R code on Github to help readers practise techniques via replication and exercises. This text will be a valuable resource for advanced students of econometrics, spatial planning and regional science. It will also be suitable for researchers and data scientists working with spatial data.

   Strategic Human Resource Management Ananda Das Gupta,2020-03-25 The concept of strategic human resource management has developed widely in the last couple of years, especially because of the impact of human resources on the competitiveness of organizations. The development of human resource strategies involves taking into account their multiple mutual dependencies and the fact that they must be vertically integrated with the business strategy. These strategies define the intentions and plans related to the overall organizational considerations, such as organizational competitiveness, effectiveness or image, and to more specific aspects of human resources management, such as resourcing, motivating, valuating, learning and development, reward and employee relations. Strategic management of human resources provides a large perspective on the way critical issues or success factors related to people can be addressed and how different concepts of strategic decisions are made, with long-term impacts on the behavior and success of the organization. The fundamental objective of human resource strategic management is to generate strategic capabilities by ensuring that the organization has the high-qualified, committed and well-motivated employees it needs to achieve and sustain the competitive advantage. The emergence of strategic human resource management (SHRM) is influenced by global competition and the corresponding search for sources of a sustainable competitive advantage. SHRM has achieved its prominence because it provides a means by which business firms can enhance the competitiveness and promote managerial efficiency. It facilitates the development of human capital that meets the requirements of a competitive business strategy, so that organizational goals and the mission of the organization will be achieved. The HRM system is defined as a set of distinct but interrelated activities, functions and processes that are directed at attracting, developing, and maintaining (or disposing of) a firm's human resources. Many agree that HRM is the most effective tool which contributes to the creation of human capital, and in turn, contributes to organizational performance and the competitive advantage. This book puts emphasis on understanding the role of HRM between organizations and people and provides an analytical approach toward encompassing HRM, employment relations, and organizational behavior. As a management discipline, HRM draws insights, models and theories from cognate disciplines and applies them to real-world settings. Further, this book discusses how current theoretical perspectives and frameworks (e.g., those related to strategic competitiveness, knowledge management, learning

organization, communities of practice, etc.) can be applied by reflective practitioners to create an eco-friendly organizational culture.

(Re)writing History in Byzantium Panagiotis Manafis,2020-05-12 Scholars have recently begun to study collections of Byzantine historical excerpts as autonomous pieces of literature. This book focuses on a series of minor collections that have received little or no scholarly attention, including the Epitome of the Seventh Century, the Excerpta Anonymi (tenth century), the Excerpta Salmasiana (eighth to eleventh centuries), and the Excerpta Planudea (thirteenth century). Three aspects of these texts are analysed in detail: their method of redaction, their literary structure, and their cultural and political function. Combining codicological, literary, and political analyses, this study contributes to a better understanding of the intertwining of knowledge and power, and suggests that these collections of historical excerpts should be seen as a Byzantine way of rewriting history. The Open Access version of this book, available at https://www.taylorfrancis.com/books/9780429351020, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Undercover PATRICK. HOWARTH,2023-03-15 This book, first published in 1980, is an invaluable assessment of SOE's contribution to the Allied victory. From both first-hand knowledge (Howarth served with SOE for 4 years) and in-depth research, this book traces the development of the organisation and its successes and failures. By bringing to life some of the outstanding men and women who served in SOE, this book pays tribute to their bravery and examines their role in fomenting and supporting clandestine resistance against the Nazi regime.

Transboundary Water Resources Management Jacques Ganoulis,Lucien Duckstein,Peter Literathy,istvan Bogardi,1996-02-19 In a world facing a growing water crisis, conflicts regarding water sharing and environmental issues are expected to grow, especially in transboundary river basins, where 40% of the world's population lives. This book represents one of the first attempts to bring together methodologies and analytical tools from socio-economic, international policy, engineering, and water management specialists dealing with transboundary water resources. The book is divided into three parts. Part I introduces state--of-the-art concepts in institutional policy and conflict analysis. Part II presents engineering approaches and models for transboundary water management and conflict resolution. Part III analyzes cases in international river basins and enclosed seas.

Hope and Aesthetic Utility in Modernist Literature Taylor & Francis Group,Tim Dejong,2021-09-30 Hope and Aesthetic Utility in Modernist Literature contends that much of modernist writing and thought reveals a deeply held confidence about the future, one premised on the social power of art itself.

The Ethics of Sports Technologies and Human Enhancement Thomas H. Murray,Voo Teck Chuan,2020-07-26 This volume presents articles which focus on the ethical evaluation of performance-enhancing technologies in sport. The collection considers whether drug doping should be banned; the rationale of not banning ethically contested innovations such as hypoxic chambers; and the implications of the prospects of human genetic engineering for the notion of sport as a development of 'natural' talent towards human excellence. The essays demonstrate the significance of the principles of preventing harm, ensuring fairness and preserving meaning to appraise whether a particular performance enhancer is acceptable in the context of sport. Selected essays on various forms of human enhancement outside of sport that highlight other principles and concepts are included for comparative purpose. Sport enhancement provides a useful starting point to work through the ethics of enhancement in other human practices and endeavors, and sport enhancement ethics should track broader bioethical debates on human enhancement. As a whole, the volume points to the need to consider the values and meanings that people seek in a given sphere of human activity and their associated principles to arrive at a morally grounded and reasonable approach to enhancement ethics.
