Manele in Romania Margaret Beissinger, Speranta Radulescu, Anca Giurchescu, 2016-08-08 This edited volume examines manele (sing. manea), an urban Romanian song-dance ethnopop genre that combines local traditional and popular music with Balkan and Middle Eastern elements. The genre is performed primarily by male Romani musicians at weddings and clubs and appeals especially to Romanian and Romani youth. It became immensely popular after the collapse of communism, representing for many the newly liberated social conditions of the post-1989 world. But manele have also engendered much controversy among the educated and professional elite, who view the genre as vulgar and even “alien” to the Romanian national character. The essays collected here examine the “manea phenomenon” as a vibrant form of cultural expression that engages in several levels of social meaning, all informed by historical conditions, politics, aesthetics, tradition, ethnicity, gender, class, and geography.

The Legitimization Strategy of the Taliban's Code of Conduct Yoshinobu Nagamine, 2016-04-29 What norms and principles guide the Afghan Taliban in their conduct of hostilities? The author focuses on the Layeha, a Code of Conduct issued by the highest Taliban authority. Interviews with Taliban members were conducted to understand their perception of the Layeha, which is modeled as a 'one-way mirror.'

Chemistry in the Marketplace Ben Selinger, Russell Barrow, 2017-06 Chemicals are everywhere. Many are natural and safe, others synthetic and dangerous. Or is it the other way around? Walking through the supermarket, you might ask yourself: Should I be eating organic food? Is that anti-wrinkle cream a gimmick? Is it worth buying BPA-free plastics? This new edition of *Chemistry in the Marketplace* provides fresh explanations, fascinating facts and funny anecdotes about the serious science in the products we buy and the resources we use. It might even save you some money. With chapters on the chemistry found in different parts of our home, in the backyard and in the world around us, Ben Selinger and Russell Barrow explain how things work, where marketing can be deceptive and what risks you should really be concerned about. *Chemistry in the Marketplace* is a valuable resource for university lecturers, high school teachers and students of chemistry and chemistry related subjects and disciplines, such as biochemistry, microbiology and science in society.

Towards an Imperfect Union Dalibor Rohac, 2016-04-22 In today's Europe, deep cracks are showing in the system of political cooperation that was designed to prevent the geopolitical catastrophes that ravaged the continent in the first half of the twentieth century. Europeans are haunted, once again, by the specters of nationalism, fascism, and economic protectionism. Instead of sounding the alarm, many conservatives have become cheerleaders for the demise of the European Union (EU). This compelling book represents the first systematic attempt to justify the European project from a free-market, conservative viewpoint. Although many of their criticisms are justified, Dalibor Rohac contends that Euroskeptics are playing a dangerous game. Their rejection of European integration places them in the unsavory company of nationalists, left-wing radicals, and Putin apologists. Their defense of the nation-state against Brussels, furthermore, is ahistorical. He convincingly shows that the flourishing of democracy and free markets in Europe has gone hand in hand with the integration project. Europe's pre-EU past, in contrast, was marked by a series of geopolitical calamities. When British voters make their decision in June, they should remember that while Brexit would not be a political or economic disaster for the United Kingdom, it would not solve any of the problems that the "Leavers" associate with EU membership. Worse yet, its departure from the European Union would strengthen the centrifugal forces that are already undermining Europe's ability to solve the multitude of political, economic, and security challenges plaguing the continent today. Instead of advocating for the end of the EU, Rohac argues that conservatives must come to the rescue of the integration project by helping to reduce the EU's democratic deficit and turning it into an engine of economic dynamism and prosperity. Unyielding Thomas L. Rempfer, 2024-06-11 Unyielding tackles a recurring topic of national importance as a history lesson for future generations. Controversial illegal medical mandates impacted military populations for many decades, but it was not until the COVID-era that the American people witnessed similar overreach. Colonel Tom "Buzz" Rempfer's memoir retraces the anthrax vaccine history since it marked the first time the military was served with court rulings condemning premeditated illegal experimentation on our nation's troops. The advent of COVID mandates, imposed on the population in 2021, gave the American people a taste of the mistreatment previously reserved for our nation's warriors. Legal protections enacted by the Congress to guard against medical experimentation, meant to ensure safe, effective, and FDA-approved products, were instead adulterated to foist mandates on American society. According to the FBI, the motive for the anthrax letter lab leaks in 2001 was to "rejuvenate" the "failing" anthrax vaccine. Similarly, the suspected Wuhan lab leak two decades later resulted in a push for COVID injections. The pattern of fear-based bioincidents resulting from reckless biodefense enterprises, and lessons not learned with illegal mandates, paralyzed government and military leaders while wreaking havoc on the trust and health of our troops and the American people. Buzz's decades-long analysis of the breakdowns stands as a unique treatise on the failures of leaders to learn lessons from these enduring clashes and to correct

the damage. Future generations will sort out the aftermath, but in the meantime, Colonel Rempfer's Unyielding effort attempts to ensure that the lessons are not lost.

The Politics of Language : Conflict, Identity, and Cultural Pluralism in Comparative Perspective Carol L. Schmid Professor of Sociology Guilford Technical Community College, 2001-04-03 Important aspects of the history of language in the United States remain shrouded in myth and legend. The notion of one nation, one language is part of the idealized history of the United States, although in its short history it has probably been host to more bilingual people than any other country in the world. Language is more than a means of communication. It brings into play an entire range of experiences and attitudes toward life. Furthermore, language is a potent symbolic issue because it links power and political claims of ownership with psychological demands for group worth. How people belonging to different language and cultural communities live together in the same political community and how political and structural tensions arise to divide them along language lines, are questions addressed in *The Politics of Language*. This book analyzes the historical background and recent controversy over language in the United States and compares it to two official multilingual societies: Canada and Switzerland. Its accessibility as a survey of this topic makes it ideal for courses in linguistics, political science, and sociology.

Encyclopedia of Quaternary Science , 2006-11-24 The quaternary sciences constitute a dynamic, multidisciplinary field of research that has been growing in scientific and societal importance in recent years. This branch of the Earth sciences links ancient prehistory to modern environments. Quaternary terrestrial sediments contain the fossil remains of existing species of flora and fauna, and their immediate predecessors. Quaternary science plays an integral part in such important issues for modern society as groundwater resources and contamination, sea level change, geologic hazards (earthquakes, volcanic eruptions, tsunamis), and soil erosion. With over 360 articles and 2,600 pages, many in full-color, the *Encyclopedia of Quaternary Science* provides broad ranging, up-to-date articles on all of the major topics in the field. Written by a team of leading experts and under the guidance of an international editorial board, the articles are at a level that allows undergraduate students to understand the material, while providing active researchers with the latest information in the field. Also available online via ScienceDirect (2006) – featuring extensive browsing, searching, and internal cross-referencing between articles in the work, plus dynamic linking to journal articles and abstract databases, making navigation flexible and easy. For more information, pricing options and availability visit www.info.sciencedirect.com. 360 individual articles written by prominent international authorities, encompassing all important aspects of quaternary science Each entry provides comprehensive, in-depth treatment of an overview topic and presented in a functional, clear and uniform layout Reference section provides guidance for further research on the topic Article text supported by full-color photos, drawings, tables, and

other visual material Writing level is suited to both the expert and non-expert

Spiritual and Ecological Civilization Irina Valerjevna Fotieva, Andrey Vladimirovich Ivanov, Michail Yurjevich Shishin, 2019-01-03 The book discusses one of the most acute problems facing society today, namely choosing ways for the further development of mankind. Its analysis of global crises of modern 'technogenic and consumer' civilization shows the necessity and possibility of transitioning to a new type of civilization, which could be called 'spiritually-ecological'. The volume demonstrates the real indicators of such a transformation in all spheres of human life and the main problems of such a transition.

Displacement, Impoverishment and Exclusion Sujit Kumar Mishra, R Siva Prasad, 2020-11-02 This book is all about the nexus of "state, development intervention and the development community" where the main objective of the development intervention is to enhance the revenue of the State's economy. The institutional parameters are instrumental in this success. However, these mechanisms are limited to few stages of development, giving very little space to the development communities. This book is intended to present the contemporary research outcomes on the cross-cutting theme of development induced displacement. Please note: This title is co-published with Aakar Books, New Delhi. Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh, Maldives and Sri Lanka.

Business Statistics for Competitive Advantage with Excel 2010 Cynthia Fraser, 2012-02-09 Exceptional managers know that they can create competitive advantages by basing decisions on performance response under alternative scenarios. To create these advantages, managers need to understand how to use statistics to provide information on performance response under alternative scenarios. This updated edition of the popular text helps business students develop competitive advantages for use in their future careers as decision makers. Students learn to build models using logic and experience, produce statistics using Excel 2010 with shortcuts, and translate results into implications for decision makers. The author emphasizes communicating results effectively in plain English and with compelling graphics in the form of memos and PowerPoints. Statistics, from basics to sophisticated models, are illustrated with examples using real data such as students will encounter in their roles as managers. A number of examples focus on business in emerging global markets with particular emphasis on China and India. Results are linked to implications for decision making with sensitivity analyses to illustrate how alternate scenarios can be compared. Chapters include screenshots to make it easy to conduct analyses in Excel 2010 with time-saving shortcuts expected in the business world. PivotTables and PivotCharts, used frequently in businesses, are introduced from

the start. Monte Carlo simulation is introduced early, as a tool to illustrate the range of possible outcomes from decision makers' assumptions and underlying uncertainties. Model building with regression is presented as a process, adding levels of sophistication, with chapters on multicollinearity and remedies, forecasting and model validation, autocorrelation and remedies, indicator variables to represent segment differences, and seasonality, structural shifts or shocks in time series models. Special applications in market segmentation and portfolio analysis are offered, and an introduction to conjoint analysis is included. Nonlinear models are motivated with arguments of diminishing or increasing marginal response, and a chapter on logit regression models introduces models of market share or proportions. The Second Edition includes more explanation of hypothesis tests and confidence intervals, how t, F, and chi square distributions behave.
