Literacy Activities for Classic and Contemporary Texts 7-14 Gill Robins, Laura-Jane Evans-Jones, 2016-09-17 English teachers are always keen to explore new ways of motivating their pupils to engage with reading, both for learning and for pleasure. *Literacy Activities for Classic and Contemporary Texts 7-14* is a practical, friendly book which uses the 'whoosh' to cover some of our best known classic and contemporary texts and offers a thoroughly enjoyable way for pupils to become part of the story, rather than just passive recipients of it. As an innovative and active learning strategy, the whoosh technique allows all students, regardless of gender, age, ability, learning need or command of language, to partake on an equal footing. For younger pupils, the activities in this book provide an ideal way to internalise structure and key elements in story telling through physical response. For older students, they provide an enjoyable way to engage with challenging texts as well as facilitating the analysis of themes, issues, characterisation and setting. Students themselves become the story as its characters, sounds and even objects - once they are familiar with whooshing, many students will want to write and produce a whoosh of their own. Classic authors and texts covered by this book include:- Aesop's fables, Greek myths and legends; Beowulf, Sir Gawain and the Green Knight, Oscar Wilde; Shakespeare (The Tempest, Twelfth Night, Hamlet, A Midsummer Night's Dream); Charlotte Bronte, Charles Dickens, George Eliot, Robert Louis Stevenson, Mary Shelley; Andrew Norriss, Frank Cottrell Boyce, Nina Bawden, Michelle Magorian and much more... You can use a whoosh to introduce a new text, to examine conflict, dilemma, plot, setting or characterisation, whoosh a controversial section of text to provoke discussion, or overcome reluctance to engage with archaic language by whooshing key sections of a story. Discussion starters, lesson objectives and follow-up activities are included throughout the text alongside the whooshes, and scripts enabling pupils to deliver dialogue are provided on the book's eResource. This book is an invaluable resource, providing whooshes across a wide range of genres to meet the learning needs of children from 7 to 14, for both practising primary and lower secondary teachers.

Introductory Maternity Nursing N. Jayne Klossner, 2006 This full-color LPN/LVN-level textbook presents maternity nursing using a nursing process framework. Throughout the text are features that help students develop critical thinking

skills and apply content to practice—such as nursing procedures, nursing care plans, clinical pearls, patients' and caregivers' stories, critical thinking questions, cultural snapshots, family teaching tips, and over 200 illustrations. Each chapter is followed by an integrated study guide/workbook with NCLEX®-style questions, Critical Thinking: What Would You Do? scenarios including dosage calculations, and Study Activities including Internet activities. Introductory Maternity Nursing is an ideal complement to Hatfield, Broadribb's Introductory Pediatric Nursing, Sixth Edition. Instructors who prefer a combined maternity/pediatric text can use Klossner/Hatfield, Introductory Maternity and Pediatric Nursing.

Teaching Humanities & Social Sciences Rob Gilbert, Libby Tudball, Peter Brett, 2019-10-17 Teaching Humanities and Social Sciences, 7e prepares teachers to develop and implement programs in the humanities and social sciences learning area from F-10. It successfully blends theory with practical approaches to provide a basis for teaching that is engaging, inquiry-based and relevant to students' lives. Using Version 8.1 of the Australian Curriculum, the text discusses the new structure of the humanities and social sciences learning area. Chapters on history, geography, civics and citizenship, and economics and business discuss the nature of these subjects and how to teach them to achieve the greatest benefit for students, both as sub-strands within the Year F-6/7 HASS subject and as distinct Year 7-10 subjects. Throughout, the book maintains its highly respected philosophical and practical orientation, including a commitment to deep learning in a context of critical inquiry. With the aid of this valuable text, teachers can assist primary, middle and secondary students to become active and informed citizens who contribute to a just, democratic and sustainable future.

New Perspectives on the History of Political Economy Robert Fredona, Sophus A. Reinert, 2018-03-05 This volume offers a snapshot of the resurgent historiography of political economy in the wake of the ongoing global financial crisis, and suggests fruitful new agendas for research on the political-economic nexus as it has developed in the Western world since the end of the Middle Ages. *New Perspectives on the History of Political Economy* brings together a select group of young and established scholars from a wide variety of disciplinary backgrounds—history, economics, law, and political science—in an effort to begin a re-conceptualization of the origins and history of political economy through a variety of still largely distinct but complementary historical approaches—legal and intellectual, literary and philosophical, political and economic—and from a variety of related perspectives: debt and state finance, tariffs and tax policy, the encouragement and discouragement of trade, merchant communities and companies, smuggling and illicit trades, mercantile and colonial systems, economic cultures, and the history of economic doctrines more narrowly construed. The first decade of the twenty-first century, bookended by 9/11 and a global financial crisis, witnessed the clamorous and urgent return of both 'the political' and 'the economic' to historiographical debates. It is becoming more important than ever to rethink the historical role of politics (and, indeed, of government) in business, economic production, distribution, and exchange. The artefacts of pre-modern and

modern political economy, from the fourteenth through the twentieth centuries, remain monuments of perennial importance for understanding how human beings grappled with and overcame material hardship, organized their political and economic communities, won great wealth and lost it, conquered and were conquered. The present volume, assembling some of the brightest lights in the field, eloquently testifies to the rich and powerful lessons to be had from such a historical understanding of political economy and of power in an economic age.

Smart Computing and Communication Meikang Qiu,2021-04-16 This book constitutes the proceedings of the 5th International Conference on Smart Computing and Communication, SmartCom 2020, which took place in Paris, France, during December 29-31, 2020. The 30 papers included in this book were carefully reviewed and selected from 162 submissions. The scope of SmartCom 2020 was broad, from smart data to smart communications, from smart cloud computing to smart security. The conference gathered all high-quality research/industrial papers related to smart computing and communications and aimed at proposing a reference guideline for further research.

Women's Empowerment and Public Policy in the Arab Gulf States Rabia Naguib,2024-01-23 This open access book explores the various dimensions of women's empowerment in public policy in the Gulf Cooperation Council (GCC) region, with a particular focus on Qatar, comparing the country to the other Gulf states. Through its rich compilation of empirical qualitative research, the text unpacks the various ways in which women's empowerment materializes in the GCC context, providing insights into public policy perspectives in high-income rentier states more broadly. The Arab world has long been part of the global dialogue on women's economic and political empowerment and the GCC has, over the past decade, situated women's empowerment amongst their respective national priorities and long-term strategies. In turn, the Gulf has seen gradual implementation of policies aimed at women, specifically, in looking to attract and retain them in the labour market, and in the public sector more broadly. The collection surveys and evaluates the progress made in recent decades, paying close attention to the cultural and policy constraints still limiting women's empowerment in the Gulf. With a key linkage to SDG5, this book is a timely text addressing the context and drivers behind policies centering on women in the Arab region, in its analysis of the interplay of international women's empowerment discourse and regional public policy decisions. It is relevant to researchers and policy makers focused on women and gender issues in relation to social, cultural, economic, and political empowerment in the Gulf specifically, but also in the Arab world and beyond.

Confederate Artillery Organizations F. Ray Sibley, Jr., 2014-09-08 *Confederate Artillery Organizations: An Alphabetical Listing of the Officers and Batteries of the Confederacy, 1861-1865* is a remarkable, immensely useful, and exceedingly rare book containing the names of the officers and every Confederate artillery unit. It is so rare that most scholars in the field don't even know of its existence. It was originally published as simply *Confederate Artillery Organizations* by the U.S. War Department in 1898, one of Marcus J. Wright's compilation aids to help assemble and organize the massive publication that would appear as the 128-volume *The War of the Rebellion: A Compilation of the Official Records of the Union and Confederate Armies (1880-1901)*, known to researchers and students alike as simply *Official Records*. Editor Ray Sibley spent more than a decade researching the thousands of entries, correcting mistakes, and adding many artillery units and additional officers unknown to the original compilers more than a century ago. Sibley utilized archival records, manuscripts, letters, diaries, and other sources to verify the original work, correct mistakes, and add further useful information in the form of hundreds of valuable footnotes. This new updated and easy-to-use reference work sets forth the lineage of the Confederate artillery. It lists, in alphabetical order, individual batteries to artillery regiments, the names and alternate names for the batteries and the names of the men who led them. Also included are the dates of acceptance into Confederate service for each unit. Most companies have an annotation that includes an alternate name (if there was one), and the date if a unit disbanded or was merged into another organization. The annotations for officers include date of appointment, date of promotion to a higher grade (if any), date of transfers (if any), date dropped from rolls (if any), and date relieved of command (if any). *Confederate Artillery Organizations* also contains four rare and hard-to-find lists of Confederate artillery officers: "Memorandum of Artillery Officers, C. S. A.," "List of Officers Corps of Artillery, C. S. Army, on U.S. Register of 1861," "Superintendents of Armories," and "Military Store-Keeper of Ordnance." These lists illustrate the ranking of each officer in his respective grade. The extensive bibliography prepared by Mr. Sibley is an invaluable guide to Civil War historiography. Scholars, researchers, and students of the Civil War will be thankful Ray Sibley turned his

considerable talents to this project. His tireless efforts made sure this rare book got back into print (including all digital formats), and turned what was once a valuable rare work into a reference book that is now both widely available and absolutely indispensable.

Agriculture and climate change Food and Agriculture Organization of the United Nations ,2020-10-26 Many national legal frameworks still do not include laws and measures specifically intended to tackle climate change in the agriculture sectors. However, national laws and institutional frameworks are necessary for good governance and can operate to support the implementation of national policy and international commitments, including on climate change. Indeed, Target 16.3 of the Sustainable Development Goals calls for the promotion of the rule of law, and the assurance of equal access to justice for all. This is both an important stand-alone goal and an enabling goal for the realization of the transformative 2030 Agenda for Sustainable Development. Furthermore, the Food and Agriculture Organization of the United Nations (FAO) sees appropriately designed, informed and responsive national legal and institutional frameworks as key to supporting the implementation of countries' commitments under the 2015 Paris Agreement, as well as their Nationally Determined Contribution in the food, agriculture and natural resources sectors. Climate change presents multiple challenges and it cannot be addressed effectively in silos. Attention must be paid not only to specific agriculture sectors, but also to governance areas that are interconnected with agriculture, such as public spending and investment, social protection and rural development. Efforts should be coordinated with the engagement of civil society, including the legal profession, vulnerable groups and the private sector.This Study addresses the principal expressions of the food and agriculture sector (crops and livestock agriculture, forestry and fisheries), looking at the critical cross-cutting issues and their integration into agriculture law. It provides a comprehensive overview of the legal and institutional issues to consider when working towards preparing the agriculture sector for the challenges of climate change.

Modern Agronomy - Theory and Practices Mr. Shani Gulaiya, Mr. Abhishek Sharma, Miss Priya Kochale, Mrs. Preeti Sharma, Dr. S.B. Agrawal, 2023-10-22 Conservation agriculture (CA) is an innovative type of sustainable agriculture which entails minimizing tillage, ensuring continuous soil covering, diverse cropping schemes as well as making efficient use of available resources. For example, CA in India has attained commendable progress during the last two decades especially in the rice-wheat rotation, of the Indo-Gangetic plain. Although CA has many advantages such as reducing costs, water and nutrients saving better yield of crops, and environmental benefits, there are some drawbacks which restrain its application. There are many challenges including not having suitable seeders for the small-scale and medium farmers; crops residues competing for CA with livestock feed; burning of these residues hence destroying soil organic matter; inadequate labor force, and prevalent bias towards traditional tillage. Therefore, we recommend urgent policy building and planning to promote CA efficiently. The emerging issues arising from conventional agricultural systems, limitations, potentials, policies, and areas for further research towards the expansion of conservation agriculture in India are examined in this paper. This points out that governments, researchers, farmers and other organizations should work together in order to have successful application of conservation agriculture.
