A Dictionary of Jewish Babylonian Aramaic of the Talmudic and Geonic Periods Michael Sokoloff, 2002 The first new dictionary of Jewish Babylonian Aramaic in a century, this towering scholarly achievement provides a complete lexicon of the entire vocabulary used in both literary and epigraphic sources from the Jewish community in Babylon from the third century C.E. to the twelfth century. Author Michael Sokoloff's primary source is, of course, the Babylonian Talmud, one of the most important and influential works in Jewish literature. Unlike the authors of previous dictionaries of this dialect, however, he also uses a variety of other sources, from inscriptions and legal documents to other rabbinical literature. A Dictionary of Jewish Babylonian Aramaic also differs from earlier lexographic efforts in its focus on a single dialect. Previous dictionaries have been composite works containing various Aramaic dialects from different periods, blurring distinctions in meaning and nuance. Sokoloff has been able to draw on the most current linguistic and textual scholarship to ensure the complete accuracy of his lexical entries, each of which is divided into six parts: lemma or root, part of speech, English gloss, etymology, semantic features, and bibliographic references. Another important feature in this invaluable reference work is

its index of all cited passages, which allows the reader of a given text to easily find the semantics of a particular word. In addition to linguists and specialists in Jewish Aramaic literature, lay readers and students will also find this comprehensive, up-to-date dictionary useful for understanding the Babylonian Talmud.

Concepts of Biology Samantha Fowler, Rebecca Roush, James Wise, 2018-01-07 Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to

show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

A Jewish Neo-Aramaic Dictionary Yona Sabar, 2002 This dictionary is based on old and recent manuscripts, printed texts, literary Midrashic texts, recorded oral Bible translations, folk literature, and diverse spoken registers. It has an extensive introduction, including a brief history of the Jewish dialects and their relations to older Aramaic, detailed observations on orthography, phonology, morphology, semantics, and other related grammatical features, that will serve the users well. The source for each word is indicated, including context quotations when necessary. A special effort was made to trace the origin of each and every word, be it native (classical and Talmudic Aramaic, Syriac etc.), or a loan word (Arabic, Hebrew, Persian, Kurdish, Turkish, general European). The Dictionary includes an index to all

the Jewish Babylonian Aramaic words which have cognates or reflexes in Jewish Neo-Aramaic, a very important tool for the history of comparative linguistic studies of Aramaic. The Dictionary will be useful for scholars of Neo-Aramaic as well as classical and Talmudic Aramaic and Syriac, Semitic Languages, Jewish Languages, Languages in Contact, and other Near Eastern Languages in general. It is the first scholarly dictionary of Jewish Neo-Aramaic, and is intended to be a linguistic monument to the community that spoke it for many centuries until its emigration to Israel.
