The Best Way to Fix Our Economy Richard G. Lazar, PhD,Caran Caswell Lazar,2011-07 The Best Way to Fix Our Economy describes the basic problem of the USA economy in the early-21st century. It is how to restore, re-surge and re-build America. How? The solution is building great new innovative product industries that produce excellent products at good prices that sell in the USA and markets around the globe. They generate sustainable small businesses. That then produces steady jobs that provide income that keeps taxes down and enables sizable profit, incent investment, ROI, continuous R&D and superior products built at competitive prices and helps ensure sustainable industry growth. The book affords an accurate historical analysis of how America has driven its economy from being the primary product-producer in the world to a service-based economy. The authors describe the simple--not easy--roadmap back to the future to being a product-driven world force by using the Lazars' proven behavioral economic model that they call The Central Productive Processa [to create a renewed productive society. The Lazars name 17 innovative product industries that will turn the economy around and restore the practice of true Capitalism in America instead of the personal interest (greed) and financial services system now in place masking as Capitalism. The Central Productive Processa [is punctuated with realistic, logical and common sense notions crisply formulated over thirty-five years of on-the-ground experience. It is not a theoretical exercise for the reader. It works. Presidents Franklin D. Roosevelt and Dwight David Eisenhower are cited as two excellent examples of AND THINKING leaders who understood that a strong nation combines defense and human needs along with economic growth and human well-being. Their vision of a compassionate and strong American economy has been in decline in America for the last 30 years. While the clarion calls of Roosevelt and Eisenhower have been muffled in the USA, China heeded the call, exceeded all expectations and has grown into an economic power with product-driven national policies. Enhanced by thirty years of peace and neutrality, they have also improved the quality of life and expectations of its citizens. In this book the Lazars light the way to breathing new life into a new economy that is product-based, profitable, productive and progressive. This work is a renewed clarion call for warring ideological leaders and elected officials to work together to overcome their own weak performance and unwillingness to sacrifice their personal interests for the best interests of all Americans. The nation cries out for them to cease battling each other to the death. The country needs a new response to the lagging and weak economy. This book provides the right response for a new economy inherent in the American character. It is time for each and all of us to help our nation rediscover its greatness and ability to resolve internal conflicts with victorious actions. Hope and optimism can only be founded on right thought and right action that people can see and feel.--

How to Build a Natural Swimming Pool Wolfram Kircher,Andreas Thon,2016-03-31 Natural swimming pools are the biggest news for gardeners since green roofs. The water is cleaned by aquatic plants instead of chlorine so it is gentle on the eyes and healthy for swimmers. These self-cleaning ecosystems are beautiful to look at and provide a valuable water source for dragonflies, honeybees and other beneficial insects. Wolfram Kircher has researched extensively into the low-nutrientdependent plants that are needed for the surrounds of natural swimming pools and the high-nutrient dependent plants that are required for the regeneration zone. In the book he demonstrates how to maintain the nutrient level in perfect balance to keep down the algae down and water sparkling. The authors have installed pools for decades and trialled different systems and plants to come up with the best possible designs.

House of Leaves Mark Z. Danielewski,2000-03-07 "A novelistic mosaic that simultaneously reads like a thriller and like a strange, dreamlike excursion into the subconscious." —The New York Times Years ago, when House of Leaves was first being passed around, it was nothing more than a badly bundled heap of paper, parts of which would occasionally surface on the Internet. No one could have anticipated the small but devoted following this terrifying story would soon command. Starting with an odd assortment of marginalized youth -- musicians, tattoo artists, programmers, strippers, environmentalists, and adrenaline junkies -- the book eventually made its way into the hands of older generations, who not only found themselves in those strangely arranged pages but also discovered a way back into the lives of their estranged children. Now this astonishing novel is made available in book form, complete with the original colored words, vertical footnotes, and second and third appendices. The story remains unchanged, focusing on a young family that moves into a small home on Ash Tree Lane where they discover something is terribly wrong: their house is bigger on the inside than it is on the outside. Of course, neither Pulitzer Prize-winning photojournalist Will Navidson nor his companion Karen Green was prepared to face the consequences of that impossibility, until the day their two little children wandered off and their voices eerily began to return another story -- of creature darkness, of an ever-growing abyss behind a closet door, and of that unholy growl which soon enough would tear through their walls and consume all their dreams.
