By night, he makes a living impersonating Frank Sinatra. But then his ex-best friend is found hacked to death in his garage, and Richie becomes the prime suspect. Hush Mack Hagood, 2019-03-22 For almost sixty years, media technologies have promised users the ability to create sonic safe spaces for themselves—from bedside white noise machines to Beats by Dre's "Hear What You Want" ad campaign, in which Colin Kaepernick's headphones protect him from taunting crowds. In Hush, Mack Hagood draws evidence from noise-canceling headphones, tinnitus maskers, LPs that play ocean sounds, nature-sound mobile apps, and in-ear smart technologies to argue the true purpose of media is not information transmission, but rather the control of how we engage our environment. These devices, which Hagood calls orphic media, give users the freedom to remain unaffected in the changeable and distracting spaces of contemporary capitalism and reveal how racial, gendered, ableist, and class ideologies shape our desire to block unwanted sounds. In a noisy world of haters, trolls, and information overload, guarded listening can be a necessity for self-care, but Hagood argues our efforts to shield ourselves can also decrease our tolerance for sonic and social difference. Challenging our self-defeating attempts to be free of one another, he rethinks media theory, sound studies, and the very definition of media.

Hear & Beyond Shari Eberts, Gael Hannan, 2022-05-03 Hearing loss doesn't come with an operating manual—until now. If you have hearing loss, you already know that the conventional approach to treatment is focused on hearing-aid technology. Without a handbook to help you figure out how to actually live with it, you've likely been getting by on information pieced together from various sources—and yet, communication often seems incomplete and unsatisfying. What's missing from this hearing care model is the big picture—a real-life illustration of how hearing loss, its emotions, and its barriers affect every corner of your life. Now, hearing-health advocates, consultants, and speakers Shari Eberts and Gael Hannan offer a new skills-based approach to hearing loss that is centered not on hearing better, but on communicating better. You'll gain tips for navigating all areas impacted by hearing loss, including relationships, work, technology; strategies for adopting a new, empowering mindset towards your hearing loss; and communication behaviors that can make almost any listening situation manageable. Informed by the lived experiences of thousands of people living with hearing loss, and corroborated by hearing science, technological advances, and modern hearing-care principles, *Hear & Beyond* offers a new way forward to greater connection and engagement—whether you're new to hearing loss or have been living with it for a long time.
