Earning and Learning Paul E. Barton,1989 Since 1986, the National Assessment of Educational Progress (NAEP) has collected information from 11th-grade students about their employment activities. Out of the 29,000 students asked about work in the 1986 assessment, 54% reported working some amount of time each week, and over 28% reported working more than 15 hours per week. Thus, of 2.9 million 11th graders questioned in 1986, an estimated 1.6 million were employed and attending school. Data in this report cover the general characteristics and academic achievement of working students included in the NAEP as well as ancillary information from other studies. Student characteristics analyzed include gender, race/ethnicity, parents' education, high school program type, mathematics and science courses taken, postsecondary expectations, absenteeism, homework time, and television viewing time. Results indicate that: (1) employment has various effects on student achievement; (2) schools vary in the amount of time and effort they demand from their students, but it appears that some teachers lower their expectations regarding working students; (3) students' jobs should be examined in terms of content compatible with youth development and achievement; and (4) where work assignments are connected to schooling objectives, work can complement, rather than compete with, schooling objectives. Twenty-nine data tables and one graph are included. (TJH)

Exploring Geoethics Martin Bohle,2019-03-13 This book explores the potential of geoethics, as designed within the operational criteria of addressing the deeds and values of the human agent as part of the Earth system. It addresses three key questions: i) what should be considered 'geoethics' in an operational sense, ii) what is peripheral to it, and iii) is there a case therefore to establish a denomination, such as geo-humanities or geosophy, to capture a broader scope of thinking about geoscience and its interactions with society and the natural world, for the benefit of the geo-professionals and others. The book begins by framing, contextualising and describing contemporary geoethics, then goes on to cover several examples of geoethical thinking and explores the societal intersections of geosciences in the planetary 'human niche'. The concluding chapter discusses the challenges facing the emerging field of geoethics and how it may evolve in the future. Bringing together a set of experts across multiple interdisciplinary fields this collection will appeal to scholars, researchers, practitioners and students within geosciences and social sciences, political sciences as well as the humanities. It will interest those who are curious about how ethical reflections relate to professional duties, scholarly interests, activities in professional geoscience associations, or responsible citizenship in times of anthropogenic global change.

The Conservative Collection Greg Lacey,2013-06 The Conservative Collection reinforces fundamental holdings of the Right. A strong, free, and thriving America requires us to value our founding principles and apply them in a modern world. Yet constant assaults on the very philosophies that birthed American exceptionalism jeopardize our sustained superiority. It, therefore, falls upon Conservatives to reenergize, inform, and strengthen the citizenry with the truths and successes stemming from conservatism. We need a strong America, one which will continue to be the home of liberty and prosperity. Discussed within The Conservative Collection are eleven areas of conservative concern: Conservative History, Individual Liberty, The Legislature, The Executive, The Judiciary, Economic Strength, Educational Strength, Military Strength, Personal Responsibility, International Leadership, and Moving America Forward. In our unique nation of states, built upon the pillars of liberty and opportunity, we are responsible for protecting the blessings of freedom and ensuring our future welfare; The Conservative Collection looks to aid others in achieving those most-noble duties. A series of short essays complete this work, divided between the book's eleven sections. Not only does The Conservative Collection focus significant attention toward government and politics but also on character development and individual maturity. All Americans (Conservative or otherwise) must be leaders in a turbulent world-something not accomplished without purpose and principle.

School to Career J J Littrell Ed D,J. J. Littrell,James H. Lorenz,Harry T. Smith,Peggy Pearson,Annie Chasen,2013-07-16 The 10th edition of School to Career builds on what made the previous editions so successful. Students explore careers using the career clusters and pathways framework; understand workplace expectations; develop career-readiness skills; and plan for life beyond graduation. School to Career provides students with the how to needed for preparing a resume, searching for a job, taking on a work-based learning experience, exceeding employer expectations, managing personal finances, and funding postsecondary training and education. Case studies are used to examine challenges students may encounter in the world of work. This Workbook is designed to help students review content, apply knowledge, and develop critical-thinking skills. A wide variety of activities are provided for various learning styles. This supplement is a consumable resource, designed with perforated pages so that a given chapter can be removed and turned in for grading or checking.

World History, Culture, and Geography, 1995 This resource book is designed to assist teachers in implementing California's history-social science framework at the 10th grade level. The models support implementation at the local level and may be used to plan topics and select resources for professional development and preservice education. This document provides a link between the framework's course descriptions and teachers' lesson plans by suggesting substantive resources and instructional strategies to be used in conjunction with textbooks and supplementary materials. The resource book is divided into eight units: (1) Unresolved Problems of the Modern World; (2) Connecting with Past Learnings: The Rise of Democratic Ideas; (3) The Industrial Revolution; (4) The Rise of Imperialism and Colonialism: A Case Study of India; (5) World War I and Its Consequences; (6) Totalitarianism in the Modern World: Nazi Germany and Stalinist Russia; (7) World War II: Its Causes and Consequences; and (8) Nationalism in the Contemporary World. Each unit contains references. (EH)

Medical Anthropology Andrea S. Wiley, John Scott Allen, 2013 An ideal core text for introductory courses, *Medical Anthropology: A Biocultural Approach*, Second Edition, offers an accessible and contemporary overview of this rapidly expanding field. For each health issue examined in the text, the authors first present basic biological information on specific conditions and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives on how these issues are understood. *Medical Anthropology* considers how a biocultural approach can be applied to more effective prevention and treatment efforts and underscores medical anthropology's potential to improve health around the world.
