Refurbishment Manual Georg Giebeler,Harald Krause,Rainer Fisch,Florian Musso,Bernhard Lenz,Alexander Rudolphi,2012-12-10 Planning tasks involving existing structures are currently among the most common types of contract, and almost every structure makes different demands and raises individual problems. Reflecting this state of affairs, there are a dizzying number of publications on the market, most of which are quite specialized. The Refurbishment Manual cuts through this jungle of publications. It defines terms and concepts, combines the narrowly focused perspectives of the specialists, and offers concrete approaches to this wide-ranging topic. The Refurbishment Manual closes the gap between basic constructional literature and one-sided, highly specialized

technical literature. It constitutes a practical planning aid on the subject of refurbishment, providing a basic introduction to the relevant aspects of building physics, fire protection, sustainability and energy, hazardous materials, construction materials for interior and façade, historic preservation, and technical building equipment. It offers concrete tips on planning steps, methods of building analysis, and cost benchmarks, as well as clear constructional solutions with built projects as examples. A unique feature of the volume is the specially developed timeline, which allows the planner to quickly grasp, categorize, and evaluate a concrete building task and thus obtain an efficient planning overview. Planungsaufgaben im Bestand gehören derzeit zu den häufigsten Auftragsarten und nahezu jedes Bauwerk stellt andere Anforderungen und weist individuelle Probleme auf. Analog dazu gibt es auf dem Markt eine fast unüberschaubare Anzahl Publikationen in meist sehr spezialisierter Form. Der Sanierungsatlas möchte Licht in diesen Publikationsdschungel bringen: Er definiert Begrifflichkeiten, vereint die fokussierenden Betrachtungsweisen der Fachleute und vermittelt konkrete Herangehensweisen an diese weit gefächerte Thematik. Der Sanierungsatlas schließt die Lücke zwischen grundlegender Baukonstruktions- und sehr einseitig spezialisierter Fachliteratur. Das Buch stellt eine praktische Planungshilfe zum Thema Sanierung dar - und zwar in Form von relevanter Grundlagenvermittlung zu Bauphysik, Brandschutz, Nachhaltigkeits- und energetischen Aspekten, Schadstoffen, Baustoffen im Innenraum und an der Fassade, zu Aspekten der Denkmalpflege ebenso wie zur technischen Gebäudeausstattung. Er liefert konkrete Hinweise zu Planungsschritten, Methoden der Bauanalyse und Kostenkennwerten sowie anschauliche Konstruktionslösungen am Beispiel gebauter Projekte. Einzigartig ist die speziell entwickelte Zeitschiene, mit deren Hilfe eine konkrete Bauaufgabe schnell erfasst, kategorisiert und bewertet werden kann - und die dem Planer somit einen effizienten

Planungsüberblick verschafft.

Beneficial Microbes for Sustainable Agriculture and Environmental Management Jeyabalan Sangeetha, Devarajan Thangadurai, Saher Islam, 2020-03-27 Microbes are the most abundant organisms in the biosphere and regulate many critical elemental and biogeochemical phenomena. Because microbes are the key players in the carbon cycle and in related biological reactions, microbial ecology is a vital research area for understanding the contribution of the biosphere in global warming and the response of the natural environment to climate variations. The beneficial uses of microbes have enabled constructive and cost-effective responses that have not been possible through physical or chemical methods. This new volume reviews the multifaceted interactions among microbes, ecosystems, and their pivotal role in maintaining a more balanced environment, in order to help facilitate living organisms coexisting with the natural environment. With extensive references, tables, and illustrations, this book provides valuable information on microbial utilization for environmental sustainability and provides fascinating insights into microbial diversity. Key features include: Looks at enhancing plant production through growth-promoting arbuscular mycorrhizae, endophytic bacteria, and microbiome networks Considers microbial degradation and environmental management of e-

wastes and azo dyes Explores soil-plant microbe interactions in metal-contaminated soils Examines radiation-resistant thermophiles for engineered bioremediation Describes potential indigenous/effective microbes for wastewater treatment processes Presents research on earthworms and microbes for organic farming

Finance Is Personal Kim Stephenson, Ann B.

Hutchins, 2015-06-30 This groundbreaking personal finance resource shows you how to manage thinking, feelings, and behavior so that you can handle your money to get what you want—not what someone else thinks you ought to have to be happy. Financial planning and money management are hot topics, but most books don't help you figure out what you truly want your money to provide for you. Exploring links between money and happiness, this guide is based on sound theory and on the latest research in psychology, behavioral economics, happiness, and neuroscience. It will give people at any stage of life—especially those of you in college or starting careers—the tools to plot your own course through the financial world and, ultimately, use money as a gateway to a happy and fulfilling life. Stephenson and Hutchins introduce core concepts that support strong, sound decision making around money, based on personal values, attitudes and beliefs, and goals. Practical, information-gathering questions and exercises help you uncover your true financial needs. The final two chapters show you how to integrate the relevant information with your goals and develop a plan for success. Along the way, you will learn such things as how to plan for your long-term goals, how to delay certain types of gratification for another type of instant gratification (peace of mind), how to think about credit, and how to make decisions on such issues as renting or buying, investing or saving, and borrowing a lot, a little, or not at all. Finally, you will come away with new ideas for how to have fun on a budget.

Teaching the Literature Survey Course Gwynn Dujardin, James M. Lang, John A. Staunton, 2018 Teaching the

Literature Survey Course makes the case for maintaining--even while re-imagining and re-inventing--the place of the survey as a transformative experience for literature students. Through essays both practical and theoretical, the collection presents survey teachers with an exciting range of new strategies for energizing their teaching and engaging their students in this vital encounter with our evolving literary traditions. From mapping early English literature to a team-based approach to the American survey, and from multimedia galleries to a blank syllabus, contributors propose alternatives to the traditional emphasis on lectures and breadth of coverage. The volume is at once a set of practical suggestions for working teachers (including sample documents like worksheets and syllabi) and a provocative engagement with the question of what introductory courses can and should be.
