Grief Works Julia Samuel, 2018-01-16 “An honest, practical, as well as emotional guide to working through the processing of mourning” (Vogue.com), Grief Works is a lifeline for all of us dealing with loss and a handbook to help others—from the “expected” death of a parent to the sudden and unexpected death of a child or spouse. Death affects us all. Yet it is still the last taboo in our society, and grief is still profoundly misunderstood. Julia Samuel, a grief psychotherapist, has spent twenty-five years working with the bereaved and understanding the full repercussions of loss. In Grief Works, Samuel shares case studies from those who have experienced great love and great loss—and survived. People need to understand that grief is a process that has to be worked through, and Samuel shows if we do the work, we can begin to heal. “As a guide for the newly grieving, Grief Works succeeds on many levels, and the author’s compassionate storytelling skills provide even broader appeal...and consistently hit an authentically inspiring note” (Kirkus Reviews, starred review). “Illuminating” (The New York Times), intimate, warm, and helpful, Samuel is a caring and deeply experienced guide through the shadowy and mutable land of grief, and her book is as invaluable to those who are grieving as it is to those around them. She adroitly unpacks the psychological tangles of grief in a voice that is compassionate, grounded, real, and observant of those in mourning. Divided into case histories grouped by who has died—a partner, a parent, a sibling, a child, as well section dealing with terminal illness and suicide—Grief Works shows us how to live and learn from great loss. This important book is “essential for anyone who has ever experienced grief or wanted to comfort a bereaved friend” (Helen Fielding, author of Bridget Jones’s Diary).

Teaching Death and Dying Christopher M. Moreman, 2008 The academic study of death rose to prominence during the 1960s. Courses on some aspect of death and dying can now be found at most institutions of higher learning. These courses tend to stress the psycho-social aspects of grief and bereavement, however, ignoring the religious elements inherent to the subject. This collection is the first to address the teaching of courses on death and dying from a religious-studies perspective. The book is divided into seven sections. The hope is that this volume will not only assist teachers in religious studies departments to prepare to teach unfamiliar and emotionally charged material, but also help to unify a field that is now widely scattered across several disciplines.

The Patient Self-Determination Act Lawrence P. Ulrich, 2001-07-18 The Patient Self-Determination Act of 1990 required medical facilities to provide patients with written notification of their right to refuse or consent to medical treatment. Using this Act as an important vehicle for improving the health care decisionmaking process, Lawrence P. Ulrich explains the social, legal, and ethical background to the Act by focusing on well-known cases such as those of Karen Quinlan and Nancy Cruzan, and he explores ways in which physicians and other caregivers can help patients face the complex issues in contemporary health care practices. According to Ulrich, health care facilities often address the letter of the law in a merely perfunctory way, even though the Act integrates all the major ethical issues in health care today. Ulrich argues that well-designed conversations between clinicians and patients or their surrogates will not only assist in preserving patient dignity — which is at the heart of the Act—but will also help institutions to manage the liability issues that the Act may have introduced. He particularly emphasizes developing effective advance directives. Ulrich examines related issues, such as the negative effect of managed care on patient self-determination, and concludes with a seldom-discussed issue: the importance of being a responsible patient. Showing how the Patient Self-Determination Act can be a linchpin of more meaningful and effective communication between patient and caregiver, this book provides concrete guidance to health care professionals, medical ethicists, and patient-rights advocates.

Grief, Loss and Bereavement Peter Wimpenny, John Costello, 2013-03-01 Dealing with the social experience of grief, loss and bereavement are challenging areas for everyone, including health and social care practitioners who are often well placed to offer help and support to the bereaved. This book draws together a comprehensive range of worldwide evidence for understanding and supporting the bereaved in a variety of health and social care contexts. It can be used by practitioners from a wide range of backgrounds in both health and social care to gain an appreciation of bereavement and its associated support and care. Additionally, it can be used for personal and professional development by practitioners who want to enhance their own and others' practice with the bereaved in specific contexts or organisations. The book may also be of value to those undertaking post graduate study who want to gain a wider understanding of the evidence related to bereavement and bereavement care practice in health and social care and may be seeking to add to the body of evidence in this field.

Mourning Films Richard Armstrong, 2012-09-18 The first in-depth study of its subject, this book seeks to account for a type of modernist film that revolves around bereavement. Identifying the roots of the genre in classical melodrama and horror cinema, and tracing perennial themes and aesthetic devices through to the European and American intellectual melodramas of the postwar decades, the book provides a taxonomy of characteristics. In the course of detailed case studies, the book deploys the film theory of Gilles Deleuze and Daniel Frampton while making use of Freudian psychoanalysis and present-day grief counseling theory. In making its case for the new genre, the book reflects upon the ways in which the very notion of genre has, in the post-classical period, responded to changing exhibition patterns, the rise of domestic spectatorship and the proliferation of Web-based film literature.
