Frank Kunert: Lifestyle Frank Kunert, 2018-03-30  
Working slowly, consciously perceiving, precisely observing; in our increasingly fast-paced and abstract world, this type of working method seems to be more and more rare. Still, we know that the exception proves the rule. If Frank Kunert (\*1963 in Frankfurt am Main) did not have the patience and calm he exhibits in creating his miniature, stage settings? immortalized in photographs made with a large-format analog camera? his ?small worlds? would lose the charm we?ve grown so fond of through his previous publications, *Verkehrte Welt* (Inverted world) and *Wunderland*. Here, the ordinary quickly reaches its limits and traverses beyond ad absurdum, while tragedy veers into comedy, and wit becomes debatable. Kunert?s works exist between the poles of grotesque and metaphysics. His new book, *Lifestyle*, adds twenty-four miniatures to these philosophically based stories of everyday life.

Frank Kunert: Topsy-Turvy World Thilo Debschitz, 2018-11-20 In the tradition of Thomas Demand, acclaimed German photographer Frank Kunert (born 1963) spends weeks constructing highly detailed, convincingly realistic models, then photographs them to exacting technical standards to create vibrant images rife with subtle visual puns. Far from being simply satirical or charming, Kunert's miniatures often contain disquieting non-sequiturs: for example, an image of a multistory apartment-building interior seems to exude a kind of petit-bourgeois tristesse with its carpeted balcony railings, a lone flower box and deck

chair, but on closer inspection the doors lead nowhere and the balconies cannot be accessed. This volume, first published in 2008 and long out of print, reveals Kunert's enigmatic world.

**Frank Kunert** Frank Kunert, 2013 Something strange is going on in the photographs by Frank Kunert: the table set for two has been so cleverly built around a corner that neither of the diners has to see the other, yet they can both watch their own television. Or a desk has a built-in bed for the much-desired office nap. And the outdoor toilet is located further away than one might hope for in an emergency - namely, on the moon. Kunert, a model builder and photographer, creates images of this kind in weeks of painstaking attention to detail, lending expression to the grotesque outgrowths of civilized life that is as humorous and exhilarating as it is profound. The ambivalence between tragedy and humour piques the artist time and again and permeates his surreal-looking visual worlds in an inexhaustible variety of ways. Melancholy and skewed wit are closely related in this wonderland of absurdities. -- back cover.

*The Craft and Science of Coffee* Britta Folmer, 2016-12-16 The Craft and Science of Coffee follows the coffee plant from its origins in East Africa to its current role as a global product that influences millions of lives through sustainable development, economics, and consumer desire. For most, coffee is a beloved beverage. However, for some it is also an object of scientific study, and for others it is approached as a craft, both building on skills and experience. By combining the research and insights

of the scientific community and expertise of the crafts people, this unique book brings readers into a sustained and inclusive conversation, one where academic and industrial thought leaders, coffee farmers, and baristas are quoted, each informing and enriching each other. This unusual approach guides the reader on a journey from coffee farmer to roaster, market analyst to barista, in a style that is both rigorous and experience based, universally relevant and personally engaging. From on-farming processes to consumer benefits, the reader is given a deeper appreciation and understanding of coffee's complexity and is invited to form their own educated opinions on the ever changing situation, including potential routes to further shape the coffee future in a responsible manner. Presents a novel synthesis of coffee research and real-world experience that aids understanding, appreciation, and potential action. Includes contributions from a multitude of experts who address complex subjects with a conversational approach. Provides expert discourse on the coffee value chain, from agricultural and production practices, sustainability, post-harvest processing, and quality aspects to the economic analysis of the consumer value proposition. Engages with the key challenges of future coffee production and potential solutions.

*Textbook of Plastic and Reconstructive Surgery* Deepak K. Kalaskar, Peter E M Butler, Shadi Ghali, 2016-08-02 Written by experts from London's

renowned Royal Free Hospital, Textbook of Plastic and Reconstructive Surgery offers a comprehensive overview of the vast topic of reconstructive plastic surgery and its various subspecialties for introductory plastic surgery and surgical science courses. The book comprises five sections covering the fundamental principles of plastic surgery, cancer, burns and trauma, paediatric plastic surgery and aesthetic surgery, and covers the breadth of knowledge that students need to further their career in this exciting field. Additional coverage of areas in which reconstructive surgery techniques are called upon includes abdominal wall reconstruction, ear reconstruction and genital reconstruction. A chapter on aesthetic surgery includes facial aesthetic surgery and blepharoplasty, aesthetic breast surgery, body contouring and the evolution of hair transplantation. The broad scope of this volume and attention to often neglected specialisms such as military plastic surgery make this a unique contribution to the field. Heavily illustrated throughout, Textbook of Plastic and Reconstructive Surgery is essential reading for anyone interested in furthering their knowledge of this exciting field. This book was produced as part of JISC's Institution as e-Textbook Publisher project. Find out more at <https://www.jisc.ac.uk/rd/projects/institution-as-e-textbook-publisher>

*Lymphedema* Byung-Boong Lee, Stanley G. Rockson, John Bergan, 2018-01-10 The second edition of this book serves as a central source of theoretical and practical knowledge to optimize

the evaluation and treatment of patients with lymphedema. The book covers all aspects of the disease from anatomical and histological features to diagnosis as well as physical/medical and surgical management of the disease. Updated from the first edition to reflect the substantial progress in diagnostics, medical care and surgical intervention for this patient population, this volume has been reorganized to meet today's practice requirements. It addresses the challenges faced by clinicians in the management of chronic lymphedema enabling them to meet the medical needs of this large patient community. Edited by world leaders in Vascular Medicine and Surgery, this comprehensive volume provides clear, concise background and recommendations in an easy-to-use format. It is a valuable reference tool for clinical practitioners (physicians/nurse practitioners/technicians) who wish to deliver state-of-the-art health care to their patients with lymphatic and venous disorders.

Ecology Michael Begon, Colin R.

Townsend, 2020-11-11 A definitive guide to the depth and breadth of the ecological sciences, revised and updated The revised and updated fifth edition of *Ecology: From Individuals to Ecosystems* – now in full colour – offers students and practitioners a review of the ecological sciences. The previous editions of this book earned the authors the prestigious 'Exceptional Life-time Achievement Award' of the British Ecological Society – the aim for the fifth edition is not only to maintain standards but indeed to enhance its coverage of Ecology. In the first edition, 34

years ago, it seemed acceptable for ecologists to hold a comfortable, objective, not to say aloof position, from which the ecological communities around us were simply material for which we sought a scientific understanding. Now, we must accept the immediacy of the many environmental problems that threaten us and the responsibility of ecologists to play their full part in addressing these problems. This fifth edition addresses this challenge, with several chapters devoted entirely to applied topics, and examples of how ecological principles have been applied to problems facing us highlighted throughout the remaining nineteen chapters. Nonetheless, the authors remain wedded to the belief that environmental action can only ever be as sound as the ecological principles on which it is based. Hence, while trying harder than ever to help improve preparedness for addressing the environmental problems of the years ahead, the book remains, in its essence, an exposition of the science of ecology. This new edition incorporates the results from more than a thousand recent studies into a fully up-to-date text. Written for students of ecology, researchers and practitioners, the fifth edition of *Ecology: From Individuals to Ecosystems* is an essential reference to all aspects of ecology and addresses environmental problems of the future.

**Genetics of Hypertension** Xi Cheng, Bina Joe, 2015-08-01 Hypertension, or elevated blood

pressure, is a major risk factor for various cardiovascular, renal diseases, and stroke. The form of hypertension with no identifiable cause is referred to as Essential Hypertension. Familial studies indicate that Essential Hypertension is heritable and, thereby, classical genetic approaches have been applied on both human and other mammalian models of hypertension to map the locations of the allelic variants within quantitative trait loci for blood pressure. The post genome era has further elevated this area of research into large-scale genome-wide association studies of hypertension in humans. Collectively, these studies have resulted in the prioritization and cataloging of several genomic regions containing allelic variants as candidates linked or associated with essential hypertension. Further, they are providing evidence to suggest that the inheritance of hypertension is rather complex, encompassing multiple variants both within protein-coding and non-coding annotations, each of which may act independently or interactively with other genes and/or environmental factors to differentially regulate blood pressure. This book provides an overview of the various methods employed to study the genetics of hypertension and discuss the progress and prospects of this area of research that may contribute towards individualized clinical management of hypertension in the future.

*Streetwear King Adz, Wilma Stone, 2018-04-17* The definitive history of the world's most influential fashion trend from the people who wore it best The story begins in 1972 in Jersey City, the

birthplace of Trash and Vaudeville, the first-ever streetwear shop; it then moves on to the start of punk, which was a decisive influence on what is considered "streetwear" today. From the dresser/casual movement born out of British soccer culture to the skater scene of California, from the paninari poseurs of Milan to the surfer dudes of Hawaii, the authors show how streetwear has permeated a vast range of seemingly disparate tribes. Streetwear recounts the remarkable history of how subcultural fashion trends have grown into a multi-billion-dollar global industry taking both high-end and fast fashion by storm. The intent behind streetwear remains the same: a powerful sense of identity and belonging. With more than 500 photographs and illustrations, exclusive interviews, profiles of industry pioneers, spotlights on significant brands, and snapshots of key cities, this is the complete history of fashion's fastest-growing and most influential trend.

### *Communication in Plants* František

Baluška, Stefano Mancuso, Dieter Volkmann, 2007-02-15 Plant neurobiology is a newly emerging field of plant sciences. It covers signalling and communication at all levels of biological organization – from molecules up to ecological communities. In this book, plants are presented as intelligent and social organisms with complex

forms of communication and information processing. Authors from diverse backgrounds such as molecular and cellular biology, electrophysiology, as well as ecology treat the most important aspects of plant communication, including the plant immune system, abilities of plants to recognize self, signal transduction, receptors, plant neurotransmitters and plant neurophysiology. Further, plants are able to recognize the identity of herbivores and organize the defence responses accordingly. The similarities in animal and plant neuronal/immune systems are discussed too. All these hidden aspects of plant life and behaviour will stimulate further intense investigations in order to understand the communicative plants in their whole complexity.

*Normed Children* Erik Schneider, Christel Baltes-Löhr, 2018-11-30 Gender- and sex-related norms have an impact on us from the first to the last day of our lives. What are the effects of such norms on the education of children and adolescents? Conveyed via parents/family, school, and peers, they seem to be an inseparable part of human relations. After its favorable reception in German-speaking countries from 2014 onwards, this title is now available in English. The texts show that the traditional assumption of a dualistic, bipolar normativity of sex and gender leads to children being taught gender-typical behavior. The contributions in this volume explore the reasons for these practices and open the debate on the divergence between the prevailing norms and the plurality of different life plans. In addition, the book helps to disengage the topic of sex and

gender from a hitherto narrowly circumscribed context of sexual orientation. The contributions point the way towards a culture of respect and mutual acceptance and show new methodological as well as theoretical approaches, e.g. by introducing the figure of the continuum, so that, in future research projects, more than just the two sexes and genders of female and male might be considered as a new normality.

Finn Juhl and His House Per H. Hansen, 2014 Finn Juhl was part of the ... movement known as Danish Modern, which lasted from around 1930 until the end of the 1960s ... One of the first to achieve international success, [he] paved the way for Danish Modern to become an international 'brand' for Danish furniture design. This book shines a spotlight not only on Finn Juhl's house but also on Juhl as a modernist and man of the world ... It focuses on the period from [his] first experimental furniture in the 1930s through the golden age in the 1940s and 1950s to today, when the furniture has experienced a renaissance as design classics and collector's items--Publisher's description.

Life's a Beach Martin Parr, 2013 In the United Kingdom, one is never more than seventy-five miles away from the coast. With this much shoreline, it's not surprising that there is a strong British tradition of photography by the seaside. American photographers may have given birth to street photography, but according to photographer Martin Parr, in the UK, we have the beach! Here, he asserts, people can relax, be themselves, and show off all those traces of mildly eccentric British

behavior. Parr has been photographing this subject for many decades, documenting all aspects of the tradition. His international career, in fact, could well be traced to the launch of *The Last Resort*, a 1986 book depicting the seaside resort of New Brighton, near Liverpool. What may be less known is that this obsession has led Parr to photograph beaches across the world. This compilation, his first on the topic, presents photos of beachgoers on far-flung shores, including Argentina, Brazil, China, Spain, Italy, Latvia, Japan, the United States, Mexico, Thailand, and of course, the UK, among others. This book shows Parr at his best, startling us with the moments of captured absurdity and immersing us in the rituals and traditions associated with beach life the world over.

**The Photomontages of Hannah Höch** Hannah Höch, Peter W. Boswell, Maria Martha Makela, Carolyn Lanchner, Kristin Makholm, 1996 Here, in the first comprehensive survey of her work by an American museum, authors Peter Boswell, Maria Makela, and Carolyn Lanchner survey the full scope of Hoch's half-century of experimentation in photomontage - from her politically charged early works and intimate psychological portraits of the Weimar era to her later forays into surrealism and abstraction.

**Machine Learning in Clinical Neuroimaging and Radiogenomics in Neuro-oncology** Seyed Mostafa Kia, Hassan Mohy-ud-Din, Ahmed Abdulkadir, Cher Bass, Mohamad Habes, Jane Maryam Rondina, Chantal Tax, Hongzhi Wang, Thomas Wolfers, Saima Rathore, Madhura Ingalthalikar, 2020-12-30 This book

constitutes the refereed proceedings of the Third International Workshop on Machine Learning in Clinical Neuroimaging, MLCN 2020, and the Second International Workshop on Radiogenomics in Neuro-oncology, RNO-AI 2020, held in conjunction with MICCAI 2020, in Lima, Peru, in October 2020.\* For MLCN 2020, 18 papers out of 28 submissions were accepted for publication. The accepted papers present novel contributions in both developing new machine learning methods and applications of existing methods to solve challenging problems in clinical neuroimaging. For RNO-AI 2020, all 8 submissions were accepted for publication. They focus on addressing the problems of applying machine learning to large and multi-site clinical neuroimaging datasets. The workshop aimed to bring together experts in both machine learning and clinical neuroimaging to discuss and hopefully bridge the existing challenges of applied machine learning in clinical neuroscience. \*The workshops were held virtually due to the COVID-19 pandemic.

A Short History of Film, Third Edition Wheeler Winston Dixon, Gwendolyn Audrey Foster, 2018-03-30 With more than 250 images, new information on international cinema—especially Polish, Chinese, Russian, Canadian, and Iranian filmmakers—an expanded section on African-American filmmakers, updated discussions of new works by major American directors, and a new section on the rise of comic book movies and computer generated special effects, this is the most up to date resource for film history courses in the twenty-first century.

*Legal Tender* John Griffith Urang, 2010 Through close readings of a diverse selection of films and
