**Personal Property Law** Sarah Worthington,2000 Personal Property law is probably the most important and yet the most neglected and least understood aspect of English law. Historically, Personal Property law was neglected because it was commonly, but misleadingly, regarded as belonging to a number of entirely separate legal categories. The recent growth of specialist literature in this area is indicative of the increasing awareness of the importance of personal property law by practitioners. Personal Property: Text and Materials addresses the problem of the near invisibility of personal property law within the law curriculum by producing an integrated casebook that covers both the underlying philosophy and concepts of personal property law and the impact of evolving business practices on the development of the law. The book is inspired by a determination to produce a concept orientated approach to the study of personal property law, avoiding the specific-contract approach to the subject that has hitherto impoverished the study of the concepts and philosophy of personal property law in the United Kingdom. The book is aimed at undergraduate law students on commercial law courses as well as students on integrated property law courses. By considering all the branches of law that touch commercial transactions such as equity, trusts, property law and restitution, Personal Property: Text and Materials, is also ideal for students studying postgraduate commercial law programmes who may or may not have qualifying law degrees

**Colonial Lives of Property** Brenna Bhandar,2018-05-25 In Colonial Lives of Property Brenna Bhandar examines how modern property law contributes to the formation of racial subjects in settler colonies and to the development of racial capitalism. Examining both historical cases and ongoing processes of settler colonialism in Canada, Australia, and Israel and Palestine, Bhandar shows how the colonial appropriation of indigenous lands depends upon ideologies of European racial superiority as well as upon legal narratives that equate civilized life with English concepts of property. In this way, property law legitimates and rationalizes settler colonial practices while it racializes those deemed unfit to own property. The solution to these enduring racial and economic inequities, Bhandar demonstrates, requires developing a new political imaginary of property in which freedom is connected to shared practices of use and community rather than individual possession.

*The Production of Space* Henri Lefebvre,1992-04-08 Henri Lefebvre has considerable claims to be the greatest living philosopher. His work spans some sixty years and includes original work on a diverse range of subjects, from dialectical materialism to architecture, urbanism and the experience of everyday life. The Production of Space is his major philosophical work and its translation has been long awaited by scholars in many different fields. The book is a search for a reconciliation between mental space (the space of the philosophers) and real space (the physical and social spheres in which we all live). In the course of his exploration, Henri Lefebvre moves from metaphysical and ideological considerations of the meaning of space to its experience in the everyday life of home and city. He seeks, in other words, to bridge the gap between the realms of theory and practice, between the mental and the social, and between philosophy and reality. In doing so, he ranges through art, literature, architecture and economics, and further provides a powerful antidote to the sterile and obfusatory methods and theories characteristic of much recent continental philosophy. This is a work of great vision and incisiveness. It is also characterized by its author's wit and by anecdote, as well as by a deftness of style which Donald Nicholson-Smith's sensitive translation precisely captures.

Scholarly Journals at the Crossroads Ann Okerson,James Joseph O'Donnell,1995 An Internet discussion about scientific and scholarly journals and their future.

**Law, Anthropology, and the Constitution of the Social** Alain Pottage,Martha Mundy,2004-06-24 This collection of interdisciplinary essays explores how persons and things - the central elements of the social - are fabricated by legal rituals and institutions. The contributors, legal and anthropological theorists alike, focus on a set of specific institutional and ethnographic contexts, and some unexpected and thought-provoking analogies emerge from this intellectual encounter between law and anthropology. For example, contemporary anxieties about the legal status of the biotechnological body seem to resonate with the questions addressed by ancient Roman law in its treatment of dead bodies. The analogy between copyright and the transmission of intangible designs in Melanesia suddenly makes western images of authorship seem quite unfamiliar. A comparison between law and laboratory science presents the production of legal artefacts in new light. These studies are of particular relevance at a time when law, faced with the inventiveness of biotechnology, finds it increasingly difficult to draw the line between persons and things.

The Luxury Economy and Intellectual Property Haochen Sun,Barton Carl Beebe,Madhavi Sunder,2015 This title explores the rise of the luxury goods economy and the growing role of intellectual property in creating, sustaining, and regulating this economy. **Encyclopedia of American Civil Rights and Liberties [4 volumes]** Kara E. Stooksbury,John M. Scheb II,Otis H. Stephens Jr.,2017-09-21 Thoroughly updated and featuring 75 new entries, this monumental four-volume work illuminates past and present events associated with civil rights and civil liberties in the United States. This revised and expanded four-volume encyclopedia is unequalled for both the depth and breadth of its coverage. Some 650 entries address the full range of civil rights and liberties in America from the Colonial Era to the present. In addition to many updates of material from the first edition, the work offers 75 new entries about recent issues and events; among them, dozens of topics that are the subject of close scrutiny and heated debate in America today. There is coverage of controversial issues such as voter ID laws, the use of drones, transgender issues, immigration, human rights, and government surveillance. There is also expanded coverage of women's rights, gay rights/gay marriage, and Native American rights. Entries are enhanced by 42 primary documents that have shaped modern understanding of the extent and limitations of civil liberties in the United States, including landmark statutes, speeches, essays, court decisions, and founding documents of influential civil rights organizations. Designed as an up-to-date reference for students, scholars, and others interested in the expansive array of topics covered, the work will broaden readers' understanding of—and appreciation for—the people and events that secured civil rights guarantees and concepts in this country. At the same time, it will help readers better grasp the reasoning behind and ramifications of 21st-century developments like changing applications of Miranda Rights and government access to private Internet data. Maintaining an impartial stance throughout, the entries objectively explain the varied perspectives on these hot-button issues, allowing readers to draw their own conclusions.

*Unsettling the City* Nicholas Blomley,2004-06-01 Short and accessible, this book interweaves a discussion of the geography of property in one global city, Vancouver, with a more general analysis of property, politics, and the city.

**Innovation and Transition in Law: Experiences and Theoretical Settings** , This book features a discussion on the modernisation of law and legal change, focusing on the key concepts of innovation and transition. These concepts both appear to be relevant and poorly defined in contemporary legal science. A critical reflection on the heuristic value of these categories seems appropriate, particularly considering their dyadic value. While innovation is increasingly appearing in the present day as being the category in which one looks at the modernisation of law, the concept of transition also seems to be the privileged place of occurrence for such dynamics. This group of Italian and Brazilian scholars contributing to this volume intends to investigate such problems through an interdisciplinary prism. It includes points of view both internal to legal studies - such as the history of law, theory of law, constitutional law, private law and commercial law - and external, such as political philosophy and history of justice and political institutions.

**Hoosiers and the American Story** Madison, James H.,Sandweiss, Lee Ann,2014-10-01 A supplemental textbook for middle and high school students, Hoosiers and the American Story provides intimate views of individuals and places in Indiana set within themes from American history. During the frontier days when Americans battled with and exiled native peoples from the East, Indiana was on the leading edge of America's westward

expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana's stories illuminate the history of American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.

**The Psychic Life of Power** Judith Butler, 1997  
Judith Butler's new book considers the way in which psychic life is generated by the social operation of power, and how that social operation of power is concealed and fortified by the psyche that it produces. It combines social theory, philosophy, and psychoanalysis in novel ways, and offers a more sustained analysis of the theory of subject formation implicit in her previous books.

**Seeing Like a State** James C. Scott, 2020-03-17  
"One of the most profound and illuminating studies of this century to have been published in recent decades."—John Gray, New York Times Book Review  
Hailed as "a magisterial critique of top-down social planning" by the New York Times, this essential work analyzes disasters from Russia to Tanzania to uncover why states so often fail—sometimes catastrophically—in grand efforts to engineer their society or their environment, and uncovers the conditions common to all such planning disasters. "Beautifully written, this book calls into sharp relief the nature of the world we now inhabit."—New Yorker  
"A tour de force."—Charles Tilly, Columbia University

**The Racial Contract** Charles W. Mills, 2022-04-15  
The Racial Contract puts classic Western social contract theory, deadpan, to extraordinary radical use. With a sweeping look at the European expansionism and racism of the last five hundred years, Charles W. Mills demonstrates how this peculiar and unacknowledged contract has shaped a system of global European domination: how it brings into existence whites and non-whites, full persons and sub-persons, how it influences white moral theory and moral psychology; and how this system is imposed on non-whites through ideological conditioning and violence. The Racial Contract argues that the society we live in is a continuing white supremacist state. As this 25th anniversary edition—featuring a foreword by Tommy Shelbie and a new preface by the author—makes clear, the still-urgent The Racial Contract continues to inspire, provoke, and influence thinking about the intersection of the racist underpinnings of political philosophy.
