Cognitive Intelligence and Big Data in Healthcare D. Sumathi, T. Poongodi, B. Balamurugan, Lakshmana Kumar Ramasamy, 2022-09-14 COGNITIVE INTELLIGENCE AND BIG DATA IN HEALTHCARE Applications of cognitive intelligence, advanced communication, and computational methods can drive healthcare research and enhance existing traditional methods in disease detection and management and prevention. As health is the foremost factor affecting the quality of human life, it is necessary to understand how the human body is functioning by processing health data obtained from various sources more quickly. Since an enormous amount of data is generated during data processing, a cognitive computing system could be applied to respond to queries, thereby assisting in customizing intelligent recommendations. This decision-making process could be improved by the deployment of cognitive computing techniques in healthcare, allowing for cutting-edge techniques to be integrated into healthcare to provide intelligent services in various healthcare applications. This book tackles all these issues and provides insight into these diversified topics in the healthcare sector and shows the range of recent innovative research, in addition to shedding light on future directions in this area. Audience The book will be very useful to a wide range of specialists including researchers, engineers, and postgraduate students in artificial intelligence, bioinformatics, information technology, as well as those in biomedicine.

**Heidegger, Authenticity and the Self** Denis McManus, 2014-09-25 Though Heidegger's *Being and Time* is often cited as one of the most important philosophical works of the last hundred years, its Division Two has received relatively little attention. This outstanding collection corrects that, examining some of the central themes of Division Two and their wide-ranging and challenging implications. An international team of leading philosophers explore the crucial notions that articulate Heidegger's concept of authenticity, including death, anxiety, conscience, guilt, resolution and temporality. In doing so, they clarify the bearing of Division Two's reflections on our understanding of intentionality, normativity, responsibility, autonomy and selfhood. These discussions raise important questions about how we may need to rethink the morals of Division One of *Being and Time*, the broader project to which that book was devoted, the shaping influence of figures such as Aristotle and Kierkegaard, as well as Heidegger's relationship with his contemporaries and successors. Essential reading for students and scholars of Heidegger's thought, and anyone interested in key debates in phenomenology, ethics, metaphilosophy and philosophy of mind. Contributors: William Blattner, Clare Carlisle, Taylor Carman, Steven Galt

Crowell, Daniel O. Dahlstrom, Sophia Dandele, Hubert Dreyfus, Charles Guignon, Jeffrey Haynes, Stephan Käufer, Denis McManus, Stephen Mulhall, George Pattison, Peter Poellner, Katherine Withy, Mark A. Wrathall.

Policy and Practice in European Human Resource Management Chris Brewster, Ariane Hegewisch, 2017-06-26 Individual Differences in Imaging contains several suggestions for research and how it can be conducted. This book is useful for people with an interest in the nature and functions of mental imagery.

**Global Call Center Employees in India** Mayank Kumar Golpelwar, 2015-10-23 Mayank Kumar Golpelwar analyses why Business Process Outsourcing (BPO) units and their young employees found themselves to be the target of severe criticism from India's middle classes. Using social and organizational psychological frameworks as well as ethnographic and variance analytic research, the author takes a look at the validity of the criticism against the BPO industry. He uses the framework of cultural theories to analyze and present the gap between the mainstream Indian culture and its rapidly emerging and globalized BPO sub-culture.

*Value in Business* Jeffrey Yi-Lin Forrester, Yong Liu, 2021-10-22 This book uses a system-based approach to decipher and organize the concepts and conclusions relevant for creating and capturing value in business. It develops a scientific theory based on systems science and logical reasoning that is commonly employed in mathematics and natural science. The resulting new theory focuses on the organizational nature of the world and the organic and holistic feature of human organizations and their interactions. To this end, this book identifies a few axioms, instead of empirical discoveries, on which it reliably constructs the entire theory.

Forgiveness Vladimir Jankélévitch, 2005-04 Philosopher Vladimir Jankélévitch has only recently begun to receive his due from the English-speaking world, thanks in part to discussions of his thought by Jacques Derrida, Emmanuel Lévinas, and Paul Ricoeur. His international readers have long valued his unique, interdisciplinary approach to philosophy's greatest questions and his highly readable writing style. Originally published in 1967, *Le Pardon*, or *Forgiveness*, is one of Jankélévitch's most influential works. In it, he characterizes the ultimate ethical act of forgiving as behaving toward the perpetrator as if he or she had never committed the action, rather than merely forgetting or rationalizing it—a controversial notion when considering events as heinous as the Holocaust. Like so many of Jankélévitch's works, *Forgiveness* transcends standard treatments of moral problems, not simply generating

a treatise on one subject but incorporating discussions of topics such as free will, giving, creativity, and temporality. Translator Andrew Kelley masterfully captures Jankélévitch's melodic prose and, in a substantive introduction, reviews his life and intellectual contributions. Forgiveness is an essential part of that legacy, and this indispensable English translation provides key tools for understanding one of the great Western philosophers of the twentieth century.

**The City in Literature** Richard Lehan, 2023-09-01 This sweeping literary encounter with the Western idea of the city moves from the early novel in England to the apocalyptic cityscapes of Thomas Pynchon. Along the way, Richard Lehan gathers a rich entourage that includes Daniel Defoe, Charles Dickens, Emile Zola, Bram Stoker, Rider Haggard, Joseph Conrad, James Joyce, Theodore Dreiser, F. Scott Fitzgerald, and Raymond Chandler. The European city is read against the decline of feudalism and the rise of empire and totalitarianism; the American city against the phenomenon of the wilderness, the frontier, and the rise of the megalopolis and the decentered, discontinuous city that followed. Throughout this book, Lehan pursues a dialectic of order and disorder, of cities seeking to impose their presence on the surrounding chaos. Rooted in Enlightenment yearnings for reason, his journey goes from east to west, from Europe to America. In the United States, the movement is also westward and terminates in Los Angeles, a kind of land's end of the imagination, in Lehan's words. He charts a narrative continuum full of constructs that represent a cycle of hope and despair, of historical optimism and pessimism. Lehan presents sharply etched portrayals of the correlation between rationalism and capitalism; of the rise of the city, the decline of the landed estate, and the formation of the gothic; and of the emergence of the city and the appearance of other genres such as detective narrative and fantasy literature. He also mines disciplines such as urban studies, architecture, economics, and philosophy, uncovering material that makes his study a lively read not only for those interested in literature, but for anyone intrigued by the meanings and mysteries of urban life.

**Theories of Translation** John Biguenet, Rainer Schulte, 2017-12-12 Spanning the centuries, from the seventeenth to the twentieth, and ranging across cultures, from England to Mexico, this collection gathers together important statements on the function and feasibility of literary translation. The essays provide an overview of the historical evolution in thinking about translation and offer strong individual opinions by prominent contemporary theorists. Most of the twenty-one pieces appear in translation, some here in English for the first time and many difficult to find elsewhere. Selections include writings by Scheiermacher, Nietzsche, Ortega, Benjamin, Pound, Jakobson, Paz, Riffaterre, Derrida, and others. A fine companion to *The Craft of Translation*, this volume will be a valuable resource for all those who translate, those who teach translation theory and practice, and those interested in questions of language philosophy and literary theory.

**Footsteps in Deserted Valleys** Koen De Ridder, 2000 In this book scholars from different backgrounds discuss and define various aspects, special characteristics and long-range aims of the Christian apostolate in late Qing and early republican China.

**Politics of Modern China: Political economy** Yongnian Zheng, Yiyi Lu, Lynn T. White, 2010 The Politics of Modern China is a comprehensive 4-volume resource for students and teachers of modern Chinese politics as well as other interested individuals and institutions internationally.

*Korea Between Empires, 1895-1919* Andre Schmid, 2002-07-17 Korea Between Empires chronicles the development of a Korean national consciousness. It focuses on two critical periods in Korean history and asks how key concepts and symbols were created and integrated into political programs to create an original Korean understanding of national identity, the nation-state, and nationalism. Looking at the often-ignored questions of representation, narrative, and rhetoric in the construction of public sentiment, Andre Schmid traces the genealogies of cultural assumptions and linguistic turns evident in Korea's major newspapers during the social and political upheavals of the late nineteenth and early twentieth centuries. Newspapers were the primary location for the re-imagining of the nation, enabling readers to move away from the conceptual framework inherited from a Confucian and dynastic past toward a nationalist vision that was deeply rooted in global ideologies of capitalist modernity. As producers and disseminators of knowledge about the nation, newspapers mediated perceptions of Korea's precarious place amid Chinese and Japanese colonial ambitions and were vitally important to the rise of a nationalist movement in Korea.

**The Shore Beyond Good and Evil** Hideyuki Takano, 2002-07 Hideyuki Takano takes us on a journey into the Wa State at the very heart of the 'Golden Triangle' - a remote land with a headhunting past, traditional hilltribes, drugs and guerrilla warfare. This book follows his 7-months in a traditional Wa mountain village, his participation in the complete cycle of opium cultivation and gives insights into a way of life molded by opium and ethnic conflict. As readers are drawn into the life of the Wa, Takano is increasingly drawn into opium dependence, unwittingly becoming a part of this intriguing story. His experiences bring home the stark reality of life on a Shore Beyond

Good and Evil.

**The Rejection of Consequentialism** Samuel Scheffler,1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

**A Customer-oriented Manager for B2B Services** Valerie Mathieu,2022-04-05 The notion of customer orientation is becoming a necessity rather than a choice for many companies. It is a lasting response to competitive pressure and supports the company in a renewed definition of its mission, beyond direct economic gain. Within B2B services, the manager, through proximity to their team, their market and their client, is the essential actor in the deployment of this orientation. A Customer-oriented Manager for B2B Services provides managers with the knowledge and tools necessary to implement customer orientation themselves, with the involvement of their extended team. To this end, this book presents a four-step approach: understand the fundamentals of customer orientation in B2B services, know the customer, make the most of the offer and deliver the service.

**Relational Anthropology for Contemporary Economics** Jerro van Nes,Patrick Nullens,Steven C. van den Heuvel,2022-01-23 This open access book offers a multidisciplinary dialogue on relational anthropology in contemporary economics. A particular view of the human being is often assumed in economic models, but seldom acknowledged let alone explicated. Addressing this neglected area of research in economic studies, altogether the contributors touch upon the importance and potential of virtues, the notions of freedom and self-love, the potential of simulation models, the dialectics of love, and questions of methodology in constructing a relational anthropology for contemporary economics. The overall result is a highly informative and constructive dialogue, establishing inter alia a research agenda for future collaborative and multidisciplinary study.
