**The Worldview of the Word of Faith Movement: Eden Redeemed** Mikael Stenhammar, 2021-12-16 This volume approaches the Word of Faith as a worldview, and analyses the movement through N. T. Wright's model for worldview-analysis in order to provide necessary nuance and complexity to scholarly interpretations of the Word of Faith. The reader receives insights into the movement's narrative, semiotic, practical and propositional dimensions, which cumulatively offer a multifaceted understanding of how the Word of Faith interprets reality and engages with the world. The analysis shows that there is a narrative core to Word of Faith beliefs in the form of a unique theological story with focus set on the present restoration of Eden's authority and blessings. This study demonstrates how the Word of Faith operates as a distinct worldview that parses the world through the lens of faith's causative power to affect a direct correspondence between present reality and Eden's perfection. The findings advance a critical and therapeutic approach that acknowledges how the worldview both strengthens and subverts Pentecostalism.

**The Ethics of Humour in Online Slavic Media Communication** Lilia Duskaeva, 2021-12-29 The Ethics of Humour in Online Slavic Media Communication is devoted to research on how the rules of humour used online media are changing and how these changes rearrange the traditions of speech interaction in media communication. The authors of the book are experienced researchers in the field of Slavic media linguistics and represent five neighbouring countries: Russia, Belarus, Lithuania, Slovakia, and Poland. The research in the volume is based on the data from Slavic languages. The diversity and, at the same time, relative proximity of Slavic languages make it possible to put separate studies into a wider comparative context, in order to reveal the general and ethno-cultural patterns in using means of communicative etiquette; it helps define the ethno-cultural factors behind the formation of such means. Speech practice of humour creation shows the creative potential of all languages, including the ones with a small number of speakers - Slovak and Belarusian, which have the status of state languages, but are strongly influenced by international languages (English and Russian). This volume is a valuable resource for researchers in the field of Slavic studies.

Making Meaning with Machines Amy Laviers, Catherine Maguire, 2023-10-10 A rigorous primer in movement studies for designers, engineers, and scientists that draws on the fields of dance and robotics. How should a gestural interface react to a “flick” versus a “dab”? Versus a “punch”? Should robots reach out to a human counterpart with a direct, telescoping action or through a circuitous arc in space? Just as different movements express the different internal states of human movers, so too can the engineered systems behind robots. In Making Meaning with Machines, Amy LaViers and Catherine Maguire offer a refreshingly embodied approach to machine design that supports the growing need to make meaning with machines by using the field of movement studies, including choreography, somatics, and notation, to engage in the process of designing expressive robots. Drawing upon the Laban/Bartenieff tradition, LaViers and Maguire sharpen the movement analysis methodology, expanding the material through their work with machines and putting forward new conventions, such as capitalization, naming, and notation schemes, that make the embodied work more legible for academic contexts. The book includes an overview of movement studies, exercises that define the presented taxonomy and principles of movement, case studies in movement analysis of both humans and robots, and state-of-the-art research at the intersection of robotics and dance. Making Meaning with Machines is a much-needed primer for observing, describing, and creating a wide array of movement patterns, which ultimately can help facilitate broader and better design choices for roboticists, technologists, and designers.
