It provides a detailed explanation to use EZNEC, the most popular antenna modeling program used by radio amateurs today, and thoroughly how to optimize the model with the AutoEZ application in conjunction with EZNEC. With Advanced Antenna Modeling, you can evaluate and adjust pre-designed models and create your own models. Step by step you are guided and explained to become familiarized to important functions and procedures along the way. As you progress, you'll discover the strength of modeling with the extra use of various AutoEZ features. View the book concept with the article Using AutoEZ with Antenna Modeling It's available on the website www.on5au.be. Dan Maguire, AC6LA -- Both the scope and depth of material in Marcel's Advanced Antenna Modeling book are truly amazing. The Author, ON5AU -- From the start as radio ham, I was always interested in the know-how of antennas and most of my antennas were and still are home brew, such as cubical quads, Yagis, delta loops, multiband dipoles, ground plains, etc.

Detective John Haven is an LA cop who lives by two rules; nice guys finish last, and honest people solve nothing. Detective Haven deals with the harsh reality of the streets on a daily basis...but on the night of December 5, 2011, he steps into a crime scene like no other, and his world will never be the same. Haven's underworld network knows nothing. In fact, some are unusually silent, as if something has come to LA that frightens even the most hardened criminals and killers....
