**The Girl Who Could Fly** Victoria Forester, 2008-06-24 You just can't keep a good girl down . . . unless you use the proper methods. Piper McCloud can fly. Just like that. Easy as pie. Sure, she hasn't mastered reverse propulsion and her turns are kind of sloppy, but she's real good at loop-the-loops. Problem is, the good folk of Lowland County are afraid of Piper. And her ma's at her wit's end. So it seems only fitting that she leave her parents' farm to attend a top-secret, maximum-security school for kids with exceptional abilities. School is great at first with a bunch of new friends whose skills range from super-strength to super-genius. (Plus all the homemade apple pie she can eat!) But Piper is special, even among the special. And there are consequences. Consequences too dire to talk about. Too crazy to consider. And too dangerous to ignore. At turns exhilarating and terrifying, Victoria Forester's debut novel has been praised by Stephenie Meyer, author of the Twilight saga, as the oddest/sweetest mix of Little House on the Prairie and X-Men...Prepare to have your heart warmed. The Girl Who Could Fly is an unforgettable story of defiance and courage about an irrepressible heroine who can, who will, who must . . . fly. This title has Common Core connections. Praise for Victoria Forester and The Girl Who Could Fly: It's the oddest/sweetest mix of Little House on the Prairie and X-Men. I was smiling the whole time (except for the part where I cried). I gave it to my mom, and I'm reading it to my kids—it's absolutely multigenerational. Prepare to have your heart warmed. Stephenie Meyer, author of the Twilight saga In this terrific debut novel, readers meet Piper McCloud, the late-in-life daughter of farmers...The story soars, just like Piper, with enough loop-de-loops to keep kids uncertain about what will come next....Best of all are the book's strong, lightly wrapped messages about friendship and authenticity and the difference between doing well and doing good.--Booklist, Starred Review Forester's disparate settings (down-home farm and futuristic ice-bunker institute) are unified by the rock-solid point of view and unpretentious diction... any child who has felt different will take strength from Piper's fight to be herself against the tide of family, church, and society.--The Horn Book Review The Girl Who Could Fly is a 2009 Bank Street - Best Children's Book of the Year.

**Carrie Pilby** Caren Lissner, 2010-07-01 NOW STREAMING ON NETFLIX! "Hilarious" — New York Times Teen Genius (and Hermit) Carrie Pilby's To-Do List: 1. List 10 things you love (and do them!) 2. Join a club (and talk to people!) 3. Go on a date (with someone you actually like!) 4. Tell someone you care (your therapist doesn't count!) 5. Celebrate New Year's (with other people!) Seriously? Carrie would rather stay in bed than deal with the immoral, sex-obsessed hypocrites who seem to overrun her hometown, New York City. She's sick of trying to be like everybody else. She isn't! But when her own therapist gives her a five-point plan to change her social-outcast status, Carrie takes a hard look at herself—and agrees to try. Suddenly the world doesn't seem so bad. But is prodigy Carrie willing to dumb things down just to fit in?

**First Grave on the Right** Darynda Jones, 2011-02-01 First Grave on the Right is the smashing, award-winning debut novel that introduces Charley Davidson: part-time private investigator and full-time Grim Reaper. Charley sees dead people. That's right, she sees dead people. And it's her job to convince them to go into the light. But when these very dead people have died under less than ideal circumstances (i.e., murder), sometimes they want Charley to bring the bad guys to justice. Complicating matters are the intensely hot dreams she's been having about an Entity who has been following her all her life...and it turns out he might not be dead after all. In fact, he might be something else entirely. This is a thrilling debut novel from Darynda Jones, an exciting newcomer to the world of paranormal romantic suspense. First Grave on the Right is the winner of the 2012 Rita

Award for Best First Book.

Papa! Philippe Corentin, 1997 Papa! Papa! There's a monster in my bed! But just who exactly is the monster in this story? Children and parents alike will giggle as they learn that monsters come in all different shapes and sizes.

**All Around Bustletown: Fall** Rotraut Susanne Berner, 2020-07-21 This fun, oversized board book introduces kids to the different ways we live, work, and play in fall. The leaves are blowing off the trees and the birds are flying south in Bustletown. Farmers are preparing the fields for winter and kids are back in school. And look, there's a water main break that's causing havoc and a chimney sweeper perched on a roof! Each time readers look at these delightfully detailed spreads they'll discover something new, whether it's what's for sale at the outdoor market or how many pumpkins they can spot on a single page. Familiar characters appear on each page--a maestro and a violinist, a balloon-toting nun, and a mom with her baby. All the activity culminates in a harvest celebration lit by dozens of paper lanterns in every shape and size. In the tradition of Richard Scarry and Where's Waldo, this book encourages kids to return again and again to these charming spreads, following along with the characters and inventing their own stories. As they peruse scenes from the home to the farm, from the shopping center to the park, kids will enjoy identifying the different things that fall brings.

**Phalaina** Alice Brière-Haquet, 2022-09-06 We discover a new species of life form every day. But, every day, a species also disappears. The fly has 10 chromosomes, the hamster 22, the rat 42, the human 46, the chimpanzee 48, the cow 60, and the butterfly 380. London, 1881. There's something a little eerie about Manon - she's not like the other girls at the orphanage. Maybe it's her red eyes. Maybe it's her silence. Maybe it's the series of violent deaths that seem to follow her. What we do know: someone is hot on her tail. And there's a lot of money at stake in finding out where exactly she comes from - and what exactly she is. Concurrent to Manon's story are letters to Charles Darwin from Professor Humphrey, a scientist who has recently died under mysterious circumstances. Is it true that natural selection left humans at the top of the pyramid of life after all? Or in the process of evolution, was there something elemental that humans lost, something that connected us to the rest of life on earth? Who and what else is out there? In order to stay alive, Manon must untangle the mystery of her origins, and perhaps the origins of humanity as well. From French writer Alice Brière-Haquet and translated by PEN-award winning translator Emma Ramadan comes PHALAINA - the middle grade historical sci fi thriller you won't be able to put down.

**L' Italiana in Algeri** Gioacchino Rossini,1986-08-01

In Praise of Risk Anne Dufourmantelle,2019-10-01 When Anne Dufourmantelle drowned in a heroic attempt to save two children caught in rough seas, obituaries around the world rarely failed to recall that she was the author of a book entitled *In Praise of Risk*, implying that her death confirmed the ancient adage that to philosophize is to learn how to die. Now available in English, this magnificent and already much-discussed book indeed offers a trenchant critique of the psychic work the modern world devotes to avoiding risk. Yet this is not a book on how to die but on how to live. For Dufourmantelle, risk entails an encounter not with an external threat to life but with something hidden in life that conditions our approach to such ordinary risks as disobedience, passion, addiction, leaving family, and solitude Keeping jargon to a minimum, Dufourmantelle weaves philosophical reflections together with clinical case histories. The everyday fears, traumas, and resistances that therapy addresses brush up against such broader concerns as terrorism, insurance, addiction, artistic creation, and political revolution. Taking up a project than joins the work of many French thinkers, such as Jacques Lacan, Jacques Derrida, Jean-Luc Nancy, Hélène Cixous, Giorgio Agamben, and Catherine Malabou, Dufourmantelle works to dislodge Western philosophy, psychoanalysis, ethics, and politics from the redemptive logic of sacrifice. She discovers the kernel of a future beyond annihilation where one might least expect to find it, hidden in the unconscious. In an era defined by enhanced security measures, border walls, trigger warnings, and endless litigation, Dufourmantelle's masterwork provides a much-needed celebration of the risks that define what it means to live.

*The Rejection of Consequentialism* Samuel Scheffler,1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.
