Nuclear Physics - Proceedings Of The 2nd European Biennial Conference Daniel Guinet, 1995-04-26 When the People's Republic of China (PRC) was granted Most Favored Nation (MFN) status by the United States in 1979, no one imagined the massive transformation the Chinese economy would make within a few decades. China's remarkable transition from merely being a "world factory", to the source of the world's new R&D and product design and innovation since the 1980s is the key focus of *Spillover Effects of China Going Global*. In this insightful and unique book, Joseph Pelzman shows how the second largest world economy triggered off many spillover effects beyond mass-labour production of durable and non-durable goods — such as the provision of foreign aid to African, Latin American and Asian economies, and increasing focus on internal endogenous innovation, research and development. He provides a comprehensive look at these spillover effects and analyzes how they will undoubtedly bring positive opportunities for others within the rest of the world in the 21st Century.

The French Second Empire Roger Price, 2001-11-15 This is a most thoroughly researched book on Napoleon III's Second Empire. It makes a vital contribution to the quarter-century of French history following the 1848 revolution,

which saw major developments in the 'modernization' of the French state and in its relationships with its citizens.

French Destroyers John Jourdan,Jean Moulin,2015-06-22

Between the wars the French produced some of the largest, and certainly the fastest, destroyers in the world. Known as Contre-Torpilleurs, these striking and innovatory super-destroyers form the core of this book, but the more conventional Torpilleurs d'Escadre are also covered. This history combines the technical and service material published in French-language monographs over the past two decades with the authors' own research from primary sources. The structure of the book follows that of the highly successful French Cruisers, with Part I devoted to the design of each of the classes built after 1922. The text is accompanied by detailed data tables and illustrated by a comprehensive set of specially-drawn plans and schemas based on official documents, as well as carefully-selected photographs from French naval sources and from private collections. Coverage runs down to the Le Hardi class, the last pre-war design.. Part II deals with the historical side, covering the eventful careers of these ships before, during and after the war. This section is illustrated by maps specially drawn for the book, and by contemporary photographs. Like its highly successful predecessors, French Battleships and French Cruisers, this beautifully presented book blends technical and historical analysis to produce what must become the standard English-language reference work.
