This book covers different trends in apparel and textile supply chains, manufacturing, design, women's fashions, men's fashions, children's fashions, shoes, accessories, retailing, distribution, technologies and fabrics of all types.

Reservations Are for Indians Heather Robertson,1991-01-01 Offering a sympathetic but detached portrait of Canada's native people, Reservations are for Indians has become a classic. Combining the skills of a novelist with those of an accomplished journalist, Heather Robertson captures the vicious circle of dependence created by government policies which ensnares aboriginal Canadians. Her account combines a description of life in four reserve communities with a history of government policies and programmes, describing the circumstances which yielded a generation of native leaders who demand a new place in Canada's political and constitutional structure. For this edition, Heather Robertson has written a preface describing how she came to write the book, the response to it when it was first published, and how she sees it in the context of the issues regarding aboriginal rights facing Canadians today.

Organic Waste Composting through Nexus Thinking Hiroshan Hettiarachchi,Serena Caucci,Kai Schwärzel,2020-11-23 Organic waste composting is another excellent example to demonstrate the power and the benefits of nexus thinking. Even though organic waste composting itself is not a new topic, those who want to start a new project or align an ongoing project with nexus thinking, find it difficult to gather the necessary information. With nine case studies from four continents, this book aims to fill above gap in literature. While current literature on composting is often found to be limited to either soil/agriculture sector or waste management sector, this book presents a combined point of view. This open access book starts with an introductory chapter that describes the need to bring the waste management aspects and soil nutrient management aspects of compost production into one integrated theme. The relevance of nexus thinking and the Sustainable Development Goals (SDGs) are also presented in this introduction. The first three chapters after the introduction covers composting from the solid waste management and its policy aspects, taking examples from three developing countries. The next three examples are mostly about the benefits composting can provide to the soil and agriculture. These examples are also from three developing countries, but with a mixture of urban as well as rural settings. Last three chapters present more insight into the latest developments taking examples from Europe, as well as new methods adapted from the traditional styles from Africa.

Natural Quasicrystals Luca Bindi,2020-04-20 This book describes the discovery of quasicrystals (icosahedral and decagonal) in an extraterrestrial rock from the Koryak Mountains of Far Eastern Russia. After a decade-long search for a natural quasicrystal, this discovery opened a new avenue in mineralogy and crystallography that could lead to further discoveries in geoscience, astronomy, condensed matter physics, and materials engineering. For the first time, minerals have been discovered that violate the symmetry restrictions of conventional crystallography. The natural occurrence of such crystals was unexpected, involving previously unknown processes. The fact that the quasicrystals were found in a meteorite formed in the earliest moments of the solar system means these processes have been active for over 4.5 billion years and have influenced the composition of the first objects to condense around the Sun. Finding quasicrystals formed in these extreme environments also informed the longstanding debate concerning the stability and robustness of quasicrystals. Recent shock experiments lend support to the hypothesis that the

extraterrestrial quasicrystals formed as a result of hypervelocity impacts between objects in the early Solar system, and that they are probably less rare in the Milky Way.

Progresses in Artificial Intelligence and Neural Systems Anna Esposito, Marcos Faundez-Zanuy, Francesco Carlo Morabito, Eros Pasero, 2020-07-09 This book provides an overview of the current advances in artificial intelligence and neural nets. Artificial intelligence (AI) methods have shown great capabilities in modelling, prediction and recognition tasks supporting human-machine interaction. At the same time, the issue of emotion has gained increasing attention due to its relevance in achieving human-like interaction with machines. The real challenge is taking advantage of the emotional characterization of humans' interactions to make computers interfacing with them emotionally and socially credible. The book assesses how and to what extent current sophisticated computational intelligence tools might support the multidisciplinary research on the characterization of appropriate system reactions to human emotions and expressions in interactive scenarios. Discussing the latest recent research trends, innovative approaches and future challenges in AI from interdisciplinary perspectives, it is a valuable resource for researchers and practitioners in academia and industry.

Freedom in the World 1997-1998 Roger Kaplan, Adrian Karatnycky, 1998-04 The Comparative Survey of Freedom is an institutional effort by Freedom House to monitor the progress and decline of political rights and civil liberties in 191 nations and 59 related territories. These year-end reviews of freedom began in 1955, when they were called the Balance Sheet of Freedom and, still later, the Annual Survey of the Progress of Freedom. This program was expanded in the early 1970s, and has appeared in *Freedom Review* since 1973. It has also been issued in a more developed context as a yearbook since 1978. Since 1989, the Survey project has been a year-long effort produced by regional experts, consultants and human rights specialists. The Survey derives its information from a wide range of sources. Most valued of these are the many human rights activists, journalists, editors and political figures around the world who keep us informed of the human rights situation in their countries. Throughout the year. Freedom House personnel regularly conduct fact-finding missions to gain more in-depth knowledge of the vast political transformations affecting our world. During these week-to-month-long investigations, we make every effort to meet a cross-section of political parties and associations, human rights monitors, religious figures, representatives of both the private sector and trade union movement, academics and journalists. During the past year. Freedom House staff traveled to numerous countries throughout most of the world's geographical and political regions. The Survey project team also consults a vast array of published source materials, ranging from the reports of other human rights organizations to often rare, regional newspapers and magazines. This year's Survey team includes: Adrian Karatnycky, Martin Edwin Anderson, Kristen Guida, Marshall Freeman Harris, Thomas R. Lansner, Arch Puddington, Leonard R. Sussman, and George Zarycky. The general editor of *Freedom in the World* is Roger Kaplan; the managing editor is Tara Kelly. This year's research coordinator was Charles Graybow.

Neural Approaches to Dynamics of Signal Exchanges Anna Esposito, Marcos Faundez-Zanuy, Francesco Carlo Morabito, Eros Pasero, 2019-09-18 The book presents research that contributes to the development of intelligent dialog systems to simplify diverse aspects of everyday life, such as medical diagnosis and entertainment. Covering major thematic areas: machine learning and artificial neural networks; algorithms and models; and social and biometric data for applications in human-computer interfaces, it discusses processing of audio-visual signals for the detection of user-perceived states, the latest scientific discoveries in processing verbal (lexicon, syntax, and pragmatics), auditory (voice, intonation, vocal expressions) and visual signals (gestures, body language, facial expressions), as well as algorithms for detecting communication disorders, remote health-status

monitoring, sentiment and affect analysis, social behaviors and engagement. Further, it examines neural and machine learning algorithms for the implementation of advanced telecommunication systems, communication with people with special needs, emotion modulation by computer contents, advanced sensors for tracking changes in real-life and automatic systems, as well as the development of advanced human-computer interfaces. The book does not focus on solving a particular problem, but instead describes the results of research that has positive effects in different fields and applications.

Primary Progressive Multiple Sclerosis M. Filippi, G. Comi, 2012-12-06 Why are there no effective treatments for my condition? Why do researchers exclude patients with primary progressive multiple sclerosis from enrolling in clinical trials? Please let me know if you hear of studies that I might be allowed to enter or treatments that I could try for my condition. Thus, in recent years, the sad lament of the patient with primary progressive MS (PPMS). This variant, often in the guise of a chronic progressive myelopathy or, less commonly, progressive cerebellar or bulbar dysfunction, usually responds poorly to corticosteroids and rarely seems to benefit to a significant degree from intensive immunosuppressive treatments. In recent years, most randomized clinical trials have excluded PPMS patients on two counts. Clinical worsening develops slowly in PPMS and may not be recognized during the course of a 2- or 3-year trial even in untreated control patients. This factor alone adds to the potential for a type 2 error or, at the very least, inflates the sample size and duration of the trial. In addition, there is mounting evidence that progressive axonal degeneration and neuronal loss (rather than active, recurrent inflammation) may be important components of the pathology in this form of the disease. Although contemporary trials are evaluating whether PPMS patients may benefit from treatment with the α -interferons and glatiramer acetate, preliminary, uncontrolled clinical experience suggests that the results may not be dramatic.

Building the Internet of Things Maciej Kranz, 2016-11-09 Connect your organization to the Internet of Things with solid strategy and a proven implementation plan Building Internet of Things provides front-line business decision makers with a practical handbook for capitalizing on this latest transformation. Focusing on the business implications of Internet of Things (IoT), this book describes the sheer impact, spread, and opportunities arising every day, and how business leaders can implement IoT today to realize tangible business advantages. The discussion delves into IoT from a business, strategy and organizational standpoint, and includes use-cases that illustrate the ripple effect that this latest disruption brings; you'll learn how to fashion a viable IoT plan that works with your organization's strategy and direction, and how to implement that strategy successfully by integrating IoT into your organization tomorrow. For business managers, the biggest question surrounding the Internet of Things is what to do with it. This book examines the way IoT is being used today—and will be used in the future—to help you craft a robust plan for your organization. Grasp the depth and breadth of the Internet of Things Create a secure IoT recipe that aligns with your company's strategy Capitalize on advances while avoiding disruption from others Leverage the technical, organizational, and social impact of IoT In the past five years, the Internet of Things has become the new frontier of technology that has everyone talking. It seems that almost every week a major vendor announces a new IoT strategy or division; is your company missing the boat? Learn where IoT fits into your organization, and how to turn disruption into profit with the expert guidance in Building the Internet of Things.

Multi-Band Effective Mass Approximations Matthias Ehrhardt, Thomas Koprucki, 2014-07-17 This book addresses several mathematical models from the most relevant class of k_p -Schrödinger systems. Both mathematical models and state-of-the-art numerical methods for adequately solving the arising systems of differential equations are presented. The operational principle of modern semiconductor nano structures, such as

quantum wells, quantum wires or quantum dots, relies on quantum mechanical effects. The goal of numerical simulations using quantum mechanical models in the development of semiconductor nano structures is threefold: First they are needed for a deeper understanding of experimental data and of the operational principle. Secondly, they allow us to predict and optimize in advance the qualitative and quantitative properties of new devices in order to minimize the number of prototypes needed. Semiconductor nano structures are embedded as an active region in semiconductor devices. Thirdly and finally, the results of quantum mechanical simulations of semiconductor nano structures can be used with upscaling methods to deliver parameters needed in semi-classical models for semiconductor devices, such as quantum well lasers. This book covers in detail all these three aspects using a variety of illustrative examples. Readers will gain detailed insights into the status of the multiband effective mass method for semiconductor nano structures. Both users of the kp method as well as advanced researchers who want to advance the kp method further will find helpful information on how to best work with this method and use it as a tool for characterizing the physical properties of semiconductor nano structures. The book is primarily intended for graduate and Ph.D. students in applied mathematics, mathematical physics and theoretical physics, as well as all those working in quantum mechanical research or the semiconductor / opto-electronic industry who are interested in new mathematical aspects.

Plant Electrophysiology Alexander G. Volkov, 2007-04-19 This book compiles new findings in plant electrophysiology from the work of internationally renowned experts in the fields of electrophysiology, bio-electrochemistry, biophysics, signal transduction, phloem transport, tropisms, ion channels, plant electrochemistry, and membrane transport. Opening with a historical introduction, the book reviews methods in plant electrophysiology, introducing such topics as measuring membrane potentials and ion fluxes, patch-clamp technique, and electrochemical sensors. The coverage includes experimental results and their theoretical interpretation.

Bio-Geo Interactions in Metal-Contaminated Soils Erika Kothe, Ajit Varma, 2012-01-05 Metal contamination is an increasing ecological and ecotoxicological risk. Understanding the processes involved in metal mobilization, sorption and mineralization in soils are key features for soil bioremediation. Following an introduction to the physical, chemical and biological components of contaminated soils, various chapters address the interactions of soil, microorganisms, plants and the water phase necessary to transfer metals into biological systems. These include topics such as potential hazards at mining sites; rare earth elements in biotic and abiotic acidic systems; manganese redox reactions; biomineralisation, uranium in seepage water; metal-resistant streptomycetes; mycorrhiza in re-forestation; metal (hyper)accumulation in plants; microbial metal uptake; and their potential for bioremediation. This book will be of interest to soil biologists, geologists and chemists, researchers and graduate students, as well as consulting companies and small enterprises involved in bioremediation.

Makers at School, Educational Robotics and Innovative Learning Environments David Scaradozzi, Lorenzo Guasti, Margherita Di Stasio, Beatrice Miotti, Andrea Monteriù, Paulo Blikstein, 2021-12-10 This open access book contains observations, outlines, and analyses of educational robotics methodologies and activities, and developments in the field of educational robotics emerging from the findings presented at FabLearn Italy 2019, the

international conference that brought together researchers, teachers, educators and practitioners to discuss the principles of Making and educational robotics in formal, non-formal and informal education. The editors' analysis of these extended versions of papers presented at FabLearn Italy 2019 highlight the latest findings on learning models based on Making and educational robotics. The authors investigate how innovative educational tools and methodologies can support a novel, more effective and more inclusive learner-centered approach to education. The following key topics are the focus of discussion: Makerspaces and Fab Labs in schools, a maker approach to teaching and learning; laboratory teaching and the maker approach, models, methods and instruments; curricular and non-curricular robotics in formal, non-formal and informal education; social and assistive robotics in education; the effect of innovative spaces and learning environments on the innovation of teaching, good practices and pilot projects.

This Captivating World of E-book Books: A Thorough Guide Unveiling the Benefits of E-book Books: A World of Ease and Flexibility E-book books, with their inherent mobility and ease of access, have freed readers from the limitations of physical books. Gone are the days of carrying bulky novels or carefully searching for particular titles in shops. Kindle devices, sleek and portable, seamlessly store an extensive library of books, allowing readers to indulge in their favorite reads whenever, anywhere. Whether traveling on a bustling train, relaxing on a sunny beach, or just cozying up in bed, E-book books provide an unparalleled level of ease. A Reading World Unfolded: Exploring the Vast Array of E-book Unifi Nano Hd Unifi Nano Hd The E-book Store, a digital treasure trove of bookish gems, boasts an extensive collection of books spanning diverse genres, catering to every readers preference and choice. From captivating fiction and thought-provoking non-fiction to timeless classics and modern bestsellers, the E-book Store offers an unparalleled abundance of titles to discover. Whether looking for escape through immersive tales of fantasy and exploration, delving into the depths of past narratives, or expanding ones understanding with insightful works of scientific and philosophy, the Kindle Store provides a doorway to a bookish universe brimming with endless possibilities. A Revolutionary Factor in the Bookish Scene: The Enduring Influence of Kindle Books Unifi Nano Hd The advent of E-book books has undoubtedly reshaped the bookish landscape, introducing a model shift in the way books are published, distributed, and consumed. Traditional publication houses have embraced the online revolution, adapting their approaches to accommodate the growing need for e-books. This has led to a rise in the availability of E-book titles, ensuring that readers have access to a vast array of bookish works at their fingers. Moreover, E-book books have democratized access to literature, breaking down geographical barriers and providing readers worldwide with equal opportunities to engage with the written word. Regardless of their location or socioeconomic background, individuals can now immerse themselves in the intriguing world of literature, fostering a global community of readers. Conclusion: Embracing the E-book Experience Unifi Nano Hd E-book books Unifi Nano Hd, with their inherent ease, versatility, and vast array of titles, have unquestionably transformed the way we experience literature. They offer readers the freedom to discover the limitless realm of written expression, whenever, everywhere. As we continue to navigate the ever-evolving digital scene, E-book books stand as testament to the enduring power of storytelling, ensuring that the joy of reading remains accessible to all.
