Political Values and Narratives of Resistance Fiona Anciano,Joanna Wheeler,2021-03-23 This book brings together multidisciplinary perspectives to explore how political values and acts of resistance impact the delivery of social justice in post-colonial states. Everyday life in post-colonial states, such as South Africa and Zimbabwe, is characterized by injustices that have both a historical and contemporary nature. From fishers in Cape Town accused of poaching, to residents of Bulawayo demanding access to water, this book focuses on the relationship between the state and groups that have been historically oppressed due to being on the margins of the political, economic and social system. It draws on empirical research from 12 scholars looking at cases in Brazil, India, South Africa and Zimbabwe. Chapters explore questions such as what citizens, especially those from marginalized groups, want from the state. The book looks at the political values of citizens and how these are formed in the process of engaging with the state and through everyday injustices. It also asks why and how citizens resist the state, with examples of protest, as well as less visible forms of resistance reflecting complex histories and power relations. Finally, the book explores how narratives and counter-narratives reveal the nature of political values and perceptions of what is just. Taken together these elements show the evolution of post-colonial social contracts. Examining important themes in political science, anthropology, sociology and urban geography, this book will appeal to scholars and students interested in political values, justice, social movements and resistance.

Security Risk Models for Cyber Insurance David Rios Insua,Caroline Baylon,Jose Vila,2020-12-21 Tackling the cybersecurity challenge is a matter of survival for society at large. Cyber attacks are rapidly

increasing in sophistication and magnitude—and in their destructive potential. New threats emerge regularly, the last few years having seen a ransomware boom and distributed denial-of-service attacks leveraging the Internet of Things. For organisations, the use of cybersecurity risk management is essential in order to manage these threats. Yet current frameworks have drawbacks which can lead to the suboptimal allocation of cybersecurity resources. Cyber insurance has been touted as part of the solution – based on the idea that insurers can incentivize companies to improve their cybersecurity by offering premium discounts – but cyber insurance levels remain limited. This is because companies have difficulty determining which cyber insurance products to purchase, and insurance companies struggle to accurately assess cyber risk and thus develop cyber insurance products. To deal with these challenges, this volume presents new models for cybersecurity risk management, partly based on the use of cyber insurance. It contains: A set of mathematical models for cybersecurity risk management, including (i) a model to assist companies in determining their optimal budget allocation between security products and cyber insurance and (ii) a model to assist insurers in designing cyber insurance products. The models use adversarial risk analysis to account for the behavior of threat actors (as well as the behavior of companies and insurers). To inform these models, we draw on psychological and behavioural economics studies of decision-making by individuals regarding cybersecurity and cyber insurance. We also draw on organizational decision-making studies involving cybersecurity and cyber insurance. Its theoretical and methodological findings will appeal to researchers across a wide range of cybersecurity-related disciplines including risk and decision analysis, analytics, technology management, actuarial sciences, behavioural sciences, and economics. The practical findings will help cybersecurity professionals and insurers enhance cybersecurity and cyber insurance, thus benefiting society as a whole. This book grew out of a two-year European Union-funded project under Horizons 2020, called CYBECO (Supporting Cyber Insurance from a Behavioral Choice Perspective).

The Real Book - Volume II (Songbook) Hal Leonard Corp.,2006-02-01 (Fake Book). The Real Books are the best-selling jazz books of all time. Since the 1970s, musicians have trusted these volumes to get them through every gig, night after night. The problem is that the books were illegally produced and distributed without any copyrights or royalties paid to the master composers who created these musical canons. Hal Leonard is very proud to present the first legitimate and legal editions of these books ever produced. You won't even notice the difference...the covers look the same, the engravings look the same, the songlist is nearly identical, and the price remains fair even on a musician's salary! But every conscientious musician will appreciate that these books are now produced legally and ethically, benefitting the songwriters that we owe for some of the greatest music ever written! 400 songs, including: Air Mail Special * Birdland * Bye Bye Blackbird * Caravan * Doxy * Fly Me to the Moon (In Other Words) * Georgia * Girl Talk * In Walked Bud * I Remember You * I Thought About You * The Jody Grind * Just the Way You Are * Killer Joe * Little Sunflower * Mercy, Mercy, Mercy * Moanin' * The Nearness of You * Now's the Time * Old Devil Moon * Phase Dance * St. Thomas * Speak Low * Stardust * Tangerine * Tenor Madness * Watch What Happens * Whisper Not * Willow Weep for Me * Yardbird Suite * and more.
