The Man-Eating Myth William Arens,1980-09-25 A fascinating and well-researched look into what we really know about cannibalism.

The Man-eating Myth William Arens,1980

Perspectives on Cannibalism. A Comparison of William Aren, Beth Conklin and Lindenbaum Patrick Kimuyu,2017-12-11 Seminar paper from the year 2016 in the subject Pedagogy - Science, Theory, Anthropology, grade: 1, Egerton University, language: English, abstract: The topic of cannibalism in anthropology seems to encompass an unprecedented controversy, owing to the diverse perspectives of different anthropologists. It has remained as one of the ancient taboos across cultures although it is surrounded by mystery, speculation, myth, fear and symbolism. Historically, the practice of cannibalism is believed to have survived across cultures over centuries to the modern times and, its significance in different cultures varies significantly. Some cultures considered cannibalism as a revered and sacred custom but, in other cultures, it was considered as a sacrilegious and an atrocious practice. It is worth noting that cannibalism seems to have existed among communities, although William Aren's book *The Man-Eating Myth: Anthropology & Anthropophagy* portrayed the seemingly old-age practice as a myth. This literature sparked an unprecedented criticism from a number of anthropologists such as Beth A. Conklin and Lindenbaum who gave contradictory perspectives. Therefore, this essay will give a comprehensive discussion of the different perspectives from Aren, Conklin and Lindenbaum over the issue of cannibalism.

Cannibalism in Cross Cultural Perspective David A. Ezzo,2008-04 The central purpose of this book is to show that cannibalism has been practiced under certain conditions in a variety of cultures throughout the world. Twenty-five different cultures are presented in this book. The types of cannibalism covered include: exo-cannibalism, judicial, survival, endocannibalism, human sacrifice, biting, infanticide, funeral, slave, and Windigo and cannibalism. The origins and philosophy of cannibalism as well as cannibalism's relationship with food taboos and religion are also discussed. David A. Ezzo has been involved with the study of Native American Indian history and culture for over twenty-five years. His interest in the subject matter first began when he earned his Indian Lore merit badge from Mr. Ronald P. Koch when he was 15 years old. His interest in the topic continued when he served as an Indian Lore counselor at Camp Turner for four summers in 1979, 1980, 1981 and 1983. David began his academic study of Native Americans when he earned a BA degree in Anthropology from SUNY Fredonia in 1985. While at Fredonia he wrote two published articles and co-wrote a third article with one of his professors, Dr. Alvin H. Morrison. This article was presented at the 16th Algonquian Conference and was published a year later in 1986. David earned his MA in Anthropology from the University of Oklahoma in 1987. During his time at the University of Oklahoma he presented several papers including one at a Frontier Conference at OU in 1986 and also a paper at the Algonquian Conference. His MA thesis was also written on a Native American topic. The title of his thesis *Female Status in Northeastern North America* was a historical survey of the roles of Native American women in a number of Algonquian societies. During subsequent years David continued to attend and publish papers at Algonquian Conferences. He also continued to serve as a BSA Indian Merit badge counselor. In June of 2005 David earned his Ph.D. in Anthropology from Richardson University. Also in August of 2005 he was appointed as an Adjunct Professor of Anthropology at Erie Community College (North Campus). In July of 2007 David published his first book *Papers on Historical Algonquian and Iroquois Topics* which he co-authored with Michael H. Moskowitz. This book was also published by Dog Ear Publishing.

Human Cannibalism Volume Six: The Jaguar in the Man: Ethnic and Cultural Cannibalism in South America David Soulsby,2019-03-11 The proposed work is a study of ethnic and cultural cannibalism in South America from prehistoric times to the present day. This is the sixth volume in a series of books on human cannibalism world-wide. The work includes source material ranging from recent scientific publications and journalism to the older narratives of missionaries, explorers, and anthropologists. An approach of comparative analysis is adopted in which many ethno-historical and scientific sources are presented for comparison. The work is not intended to be strictly

academic because primary, secondary, and popular sources are used, but it is intended to be thorough, accessible, and incorporates many interesting human stories. Recent historical and archaeological information is provided to further assist substantiation or refutation of accounts of human cannibalism. This is where it is hoped that the proposed work will differ from, and improve upon what has gone before. By virtue of the ethno-historical record, most information about cannibalism has come from the early modern and modern periods. The challenge has been to find a way of discussing a cultural practice that is odious to Western sensitivities, while paradoxically exerting a lurid attraction over the popular imagination. The work is founded upon scientific controversy over the actual existence or true extent of cannibalism among humans, which really began with publication of 'The Man-Eating Myth' by anthropologist Williams Arens in 1979. Over subsequent years archaeological discoveries have appeared to at least partly refute Arens' claims that stories of man-eating in the ethno-historical record are largely nonsense or fantasy. Debate on the subject among anthropologists has not ended, and incidents of cannibalism continue to occur in some of the world's most intractable trouble-spots. The proposed work predominantly covers beliefs, mythologies, and reports of assumed or actual cannibalistic practices in ethnic groups world-wide. The approach used compares and contrasts evidence to assess the veracity of reports of cannibalism among human societies. Written and verbal ethno-historical accounts (with many quotations) are combined and compared with modern anthropological and archaeological data where this is available. Wherever possible primary sources have been used. The structure of the work is mainly geographical, but there are also sections covering cannibalism in prehistory, from which some of the best evidence has emerged. Sensationalism has been deliberately avoided and no judgments are cast upon peoples reported to be man-eaters. The work simply aims to determine, as far as is possible, whether a particular group were cannibalistic, and if so, why.

Human Cannibalism Volume 7 David Soulsby, 2019-08-22 The proposed work is a study of ethnic and cultural cannibalism in the Western Pacific region from prehistoric times to the present day. This is the seventh volume in a series of books on human cannibalism world-wide. The work includes source material ranging from recent scientific publications and journalism to the older narratives of missionaries, explorers, and anthropologists. An approach of comparative analysis is adopted in which many ethno-historical and scientific sources are presented for comparison. HUMAN CANNIBALISM VOLUME 2 Budget Edition David Soulsby, 2021-03-09 The work is a study of ethnic and cultural cannibalism in Europe and the Near East from prehistoric times to the present day. Human Cannibalism Volume One David Soulsby, 2017-03-20 The proposed work is a study of ethnic and cultural cannibalism in Africa from prehistoric times to the present day. The work includes source material ranging from recent scientific publications and journalism to the older narratives of

The Anthropology of Cannibalism Laurence Goldman, 1999-10-30 This work looks at how and why cannibalism was actually practised. It studies it both as part of a wider cultural system of meanings about reproduction and regeneration as well as how cannibalism as myth perpetuates political processes of stereotyping across cultures.

The Human Sausage Factory Eda Kalmre, 2013-08-10 Under certain conditions, some rumours, which were established as part of folklore already long ago, may become fixed in the memory and the subconscious of several generations. This is what happened with the rumour about a human sausage factory after the Second World War. In Tartu, Estonia, this rumour obtained a symbolic meaning and power due to the politics of the totalitarian Soviet regime. The memories of the post-war period are still vivid in the collective mind, and the onetime rumour of sausage factories incorporates the population's tensions, pain, loss, choices, defiance and irreconcilability. The individual and community emotions that are brought to a focus in this discourse are an indicator of defining social boundaries and behaviour, of 'us' and 'them'. When describing the events that took place in Tartu, folklore becomes a powerful tool with which to construe the meaning of the era at the social level. Through documents, photos and people's memories, the book offers an insight into the city of Tartu after the Second World War and reveals the several layers of meaning represented by rumour in this period.

Wielding Words like Weapons Ward Churchill, 2017-04-15 *Wielding Words like Weapons* is a collection of acclaimed American Indian Movement activist-intellectual Ward Churchill's essays in indigenism, selected from material written during the decade 1995–2005. It includes a range of formats, from sharply framed book reviews and equally pointed polemics and op-eds to more formal essays designed to reach both scholarly and popular audiences. The selection also represents the broad range of topics addressed in Churchill's scholarship, including the fallacies of archeological and anthropological orthodoxy such as the insistence of "cannibologists" that American Indians were traditionally man-eaters, Hollywood's cinematic degradations of native people, questions of American Indian identity, the historical and ongoing genocide of North America's native peoples, and the systematic distortion of the political and legal history of U.S.-Indian relations. Less typical of Churchill's oeuvre are the essays commemorating Cherokee anthropologist Robert K. Thomas and Yankton Sioux legal scholar and theologian Vine Deloria Jr. More unusual still is his profoundly personal effort to come to grips with the life and death of his late wife, Leah Renae Kelly, thereby illuminating in very human terms the grim and lasting effects of Canada's residential schools upon the country's indigenous peoples. A foreword by Seneca historian Barbara Alice Mann describes the sustained efforts by police and intelligence agencies as well as university administrators and other academic adversaries to discredit or otherwise "neutralize" both the man and his work. Also included are both the initial "stream-of-consciousness" version of Churchill's famous—or notorious—"little Eichmanns" opinion piece analyzing the causes of the attacks on 9/11, as well as the counterpart essay in which his argument was fully developed.

The Invention of Racism in Classical Antiquity Benjamin Isaac, 2013-10-31 There was racism in the ancient world, after all. This groundbreaking book refutes the common belief that the ancient Greeks and Romans harbored ethnic and cultural, but not racial, prejudice. It does so by comprehensively tracing the intellectual origins of racism back to classical antiquity. Benjamin Isaac's systematic analysis of ancient social prejudices and stereotypes reveals that some of those represent prototypes of racism—or proto-racism—which in turn inspired the early modern authors who developed the more familiar racist ideas. He considers the literature from classical Greece to late antiquity in a quest for the various forms of the discriminatory stereotypes and social hatred that have played such an important role in recent history and continue to do so in modern society. Magisterial in scope and

scholarship, and engagingly written, *The Invention of Racism in Classical Antiquity* further suggests that an understanding of ancient attitudes toward other peoples sheds light not only on Greco-Roman imperialism and the ideology of enslavement (and the concomitant integration or non-integration) of foreigners in those societies, but also on the disintegration of the Roman Empire and on more recent imperialism as well. The first part considers general themes in the history of discrimination; the second provides a detailed analysis of proto-racism and prejudices toward particular groups of foreigners in the Greco-Roman world. The last chapter concerns Jews in the ancient world, thus placing anti-Semitism in a broader context.

Eaters of the Dead Kevin J. Wetmore, Jr., 2021-09-16 Spanning myth, history, and contemporary culture, a terrifying and illuminating excavation of the meaning of cannibalism. Every culture has monsters that eat us, and every culture repels in horror when we eat ourselves. From Grendel to medieval Scottish cannibal Sawney Bean, and from the Ghuls of ancient Persia to The Texas Chainsaw Massacre, tales of being consumed are both universal and universally terrifying. In this book, Kevin J. Wetmore Jr. explores the full range of monsters that eat the dead: ghouls, cannibals, wendigos, and other beings that feast on human flesh. Moving from myth through history to contemporary popular

culture, Wetmore considers everything from ancient Greek myths of feeding humans to the gods, through sky burial in Tibet and Zoroastrianism, to actual cases of cannibalism in modern societies. By examining these seemingly inhuman acts, *Eaters of the Dead* reveals that those who consume corpses can teach us a great deal about human nature—and our deepest human fears.
