Paul Schrag,Xaviant Haze

The Suppressed History of America Paul Schrag, Xaviant Haze, 2011-05-20 An investigation into the discoveries of Lewis and Clark and other early explorers of America and the terrible acts committed to suppress them • Provides archaeological proof of giants, the fountain of youth, and descriptions from Lewis's journals of a tribe of "nearly white, blue-eyed" Indians • Uncovers evidence of explorers from Europe and Asia prior to Columbus and of ancient civilizations in North America and the Caribbean • Investigates the Smithsonian conspiracy to cover up Lewis and Clark's discoveries and what led to Lewis's murder Meriwether Lewis discovered far more than the history books tell--ancient civilizations, strange monuments, "nearly white, blue-eyed" Indians, and evidence that the American continent was visited long before the first European settlers arrived. And he was murdered to keep it all secret. Examining the shadows and cracks between America's official version of history, Xaviant Haze and Paul Schrag propose that the America of old taught in schools is not the America that was discovered by Lewis and Clark and other early explorers. Investigating the discoveries of Spanish conquistadors and Olmec stories of contact with European-like natives, the authors uncover evidence of explorers from Europe and Asia prior to Columbus, sophisticated ancient civilizations in North America and the Caribbean, the fountain of youth, and a long-extinct race of giants. Verifying stories from Lewis's journals with modern archaeological finds, geological studies, 18th- and 19th-century newspapers, and accounts of the world in the days of Columbus, the authors reveal how Lewis and Clark's finds infuriated powerful interests in Washington--including the Smithsonian Institution--culminating in the murder of Meriwether Lewis.

Exogenesis: Hybrid Humans Bruce R. Fenton, Daniella Fenton, 2020-06-01 Exogenesis is a milestone in understanding our past. —Erich von Däniken, author of *Chariots of the Gods* Exogenesis: the hypothesis that life originated elsewhere in the universe and was spread to Earth. Exogenesis: Hybrid Humans offers a deep dive into the strongest ever scientific evidence that supports the popular belief that Earth has been visited in prehistory, but goes even further, concluding that there is also compelling evidence of alien involvement with the human genome. The broader history of possible extraterrestrial contact is explored alongside a look at current events in the subject of alien disclosure with the result of highlighting evidence of a contact continuum that has continued since the dawn of humanity. The data brought together suggests that the next stage in human evolution may involve the manifestation of full open contact with the visitors in our lifetimes. Exogenesis: Hybrid Humans explores: An ancient sacred Aboriginal artifact Wreckage from a huge colony ship gets identified along with associated NASA studies concluding it is a material found in only one place on Earth Genetic engineering of Homo sapiens from an early hominin species is confirmed with a lengthy list of DNA anomalies only explainable by humans being an alien 'hybrid' creation The recent NASA sea change with certain academics calling for serious study of UFOs and other anomalous phenomena The theory that an extraterrestrial modified retrovirus was used to deliver some of the genetic information into the upgraded humans

Secret Journey to Planet Serpo Len Kasten, 2013-05-05 Documents how 12 people, as part of a top-secret U.S. government program, traveled to the planet Serpo and lived there for 13 years • Based on the debriefing of the Serpo team and the diary of the expedition's commander • Explains how the aliens helped us reverse-engineer their antigravity spacecraft and develop technology to solve our planet-wide energy problems • Reveals how our government has an ongoing relationship with the Serpo aliens On July 16, 1965, a massive alien spacecraft from the Zeta Reticuli star system landed at the Nevada test site north of Las Vegas. Following a plan set in motion by President Kennedy in 1962, the alien visitors known as the Ebens welcomed 12 astronaut-trained military personnel aboard their craft for the 10-month journey to their home planet, Serpo, 39 light-years away. In

November 2005, former and current members of the Defense Intelligence Agency--directed by Kennedy to organize the Serpo exchange program--came forward to reveal the operation, including details from the 3,000-page debriefing of the 7 members of the Serpo team who returned after 13 years on the planet. Working with the DIA originators of the Serpo project and the diary kept by the expedition's commanding officer, Len Kasten chronicles the complete journey of these cosmic pioneers, including their remarkable stories of life on an alien planet, superluminal space travel, and advanced knowledge of alien technologies. He reveals how the Ebens presented the U.S. with "The Yellow Book"--a complete history of the universe recorded holographically, allowing the reader to view actual scenes from pre-history to the present. He explains how the Ebens helped us reverse-engineer their antigravity spacecraft and develop technology to solve our planet-wide energy problems--knowledge still classified. Exposing the truth of human-alien interaction and interplanetary travel, Kasten reveals not only that the Ebens have returned to Earth eight times but also that our government continues to have an ongoing relationship with them--a relationship with the potential to advance the human race into the future.

Prince of Nubia Nathaniel Burns, 2021-03-08 Torn between duty to the Egyptian pharaoh, Ramesses, and duty to his people and their traditional beliefs, Shabaka finds himself having to cope with an unwanted betrothal, rioting locals, and the traditional dance festival, when all he wants to do is find his missing partner, Neti. While Moses is summoned to assist, aid comes in the most unlikely manner and uncovers something far more dangerous than mere desert raiders ... The Prince of Nubia returns us to a land steeped in mystery and magic. It paints a detailed picture of Ancient Egypt in all its glory. Faithfully recreating one of the most remarkable eras in Egypt's history, author Nathaniel Burns weaves a shudderingly ominous tale of ancient Egypt's mysteries revealed through a cast of characters the modern reader will recognize even though millennia have passed. So light up the incense, sit close to the light and draw back the curtains on the shadowed past with this gripping tale of love and intrigue among the living and the dead in one of history's most intriguing civilizations.

Grey Aliens and the Harvesting of Souls Nigel Kerner, 2010-01-19 Exposes the agenda behind the bio-robotic grey aliens' genetic manipulation of certain human races • Reveals the Grey's nature as sophisticated self-aware machines created by a long vanished extraterrestrial civilization • Explains how their quest to capture human souls appears in the historical record from biblical times • Explains how the phenomenon of racism is a by-product of their genetic tampering In 1997 Nigel Kerner first introduced the notion of aliens known as Greys coming to Earth, explaining that Greys are sophisticated biological robots created by an extraterrestrial civilization they have long since outlived. In this new book Kerner reveals that the Greys are seeking to master death by obtaining something humans possess that they do not: souls. Through the manipulation of human DNA, these aliens hope to create their own souls and, thereby, escape the entropic grip of the material universe in favor of the timeless realm of spirit. Kerner explains that genetic manipulation by the Greys has occurred since biblical times and has led to numerous negative qualities that plague humanity, such as violence, greed, and maliciousness. Racism, he contends, was developed by the aliens to prevent their genetic experiments from being compromised by breeding with others outside their influence. Examining historical records, Kerner shows that Jesus, who represented an uncorrupted genetic line, warned his disciples about the threat posed by these alien interlopers, while Hitler, a pure product of this alien intelligence, waged genocide in an attempt to rid Earth of all those untouched by this genetic tampering. Despite the powerful grip the Greys have on humanity, Kerner says that all hope is not lost. Greys exist wholly in the material world, so if we follow the spiritual laws of reincarnation and karma, aiming for enlightenment and rising above the material--a state the Greys are

unable to reach--we can free ourselves from their grasp.

Irish Wisdom Preserved in Bible and Pyramids Conor Mac Dari,1923

How We Know What Isn't So Thomas Gilovich,2008-06-30 Thomas Gilovich offers a wise and readable guide to the fallacy of the obvious in everyday life. When can we trust what we believe—that teams and players have winning streaks, that flattery works, or that the more people who agree, the more likely they are to be right—and when are such beliefs suspect? Thomas Gilovich offers a guide to the fallacy of the obvious in everyday life. Illustrating his points with examples, and supporting them with the latest research findings, he documents the cognitive, social, and motivational processes that distort our thoughts, beliefs, judgments and decisions. In a rapidly changing world, the biases and stereotypes that help us process an overload of complex information inevitably distort what we would like to believe is reality. Awareness of our propensity to make these systematic errors, Gilovich argues, is the first step to more effective analysis and action.

The Search for Extra Terrestrial Intelligence David Lamb,2005-07-26 Is the Search for Extra Terrestrial Intelligence a genuine scientific research programme? David Lamb evaluates claims and counter-claims, and examines recent attempts to establish contact with other intelligent life forms. He considers the benefits and drawbacks of this communication, how we should communicate and whether we actually can. He also assesses competing theories on the origin of life on Earth, discoveries of former solar planets, proposals for space colonies and the consequent technical and ethical issues.

The Origin and Evolution of Religion (Routledge Revivals) Albert

Churchward,2015-06-03 Churchward's The Origin and Evolution of Religion, first published in 1924, explores the history and development of different religions worldwide, from the religious cults of magic and fetishism to contemporary religions such as Christianity and Islam. This text is ideal for students of theology.

The Sky People S.M. Stirling,2010-04-27 Marc Vitrac was born in Louisiana in the early 1960's, about the time the first interplanetary probes delivered the news that Mars and Venus were teeming with life—even human life. At that point, the Space Race became the central preoccupation of the great powers of the world. Now, in 1988, Marc has been assigned to Jamestown, the US-Commonwealth base on Venus, near the great Venusian city of Kartahown. Set in a countryside swarming with sabertooths and dinosaurs, Jamestown is home to a small band of American and allied scientist-adventurers. But there are flies in this ointment – and not only the Venusian dragonflies, with their yard-wide wings. The biologists studying Venus's life are puzzled by the way it not only resembles that on Earth, but is virtually identical to it. The EastBloc has its own base at Cosmograd, in the highlands to the south, and relations are frosty. And attractive young geologist Cynthia Whitlock seems impervious to Marc's Cajun charm. Meanwhile, at the western end of the continent, Teesa of the Cloud Mountain People leads her tribe in a conflict with the Neanderthal-like beastmen who have seized her folk's sacred caves. Then an EastBloc shuttle crashes nearby, and the beastmen acquire new knowledge... and AK47's. Jamestown sends its long-range blimp to rescue the downed EastBloc cosmonauts, little suspecting that the answer to the jungle planet's mysteries may lie there, among tribal conflicts and traces of a power that made Earth's vaunted science seem as primitive as the tribesfolk's blowguns. As if that weren't enough, there's an enemy agent on board the airship... Extravagant and effervescent, The Sky People is alternate-history SF adventure at its best. I Am a Strange Loop Douglas R. Hofstadter,2007-03-27 Argues that the key to understanding ourselves and consciousness is the strange loop, a special kind of abstract feedback loop that inhabits the brain.

Identified Flying Objects Dr. Michael P. Masters, 2019-03-22 Could "UFOs" and "Aliens" simply be us, but from the future? This provocative new book cautiously examines the premise that extraterrestrials may instead be our distant human descendants, using the anthropological tool of time travel to visit and study us in their own hominin evolutionary past. Dr. Michael P. Masters, a professor of biological anthropology specializing in human evolutionary anatomy, archaeology, and biomedicine, explores how the persistence of long-term biological and cultural trends in human evolution may ultimately result in us becoming the ones piloting these disc-shaped craft, which are likely the very devices that allow our future progeny to venture backward across the landscape of time. Moreover, these extraterrestrials are ubiquitously described as bipedal, large-brained, hairless, human-like beings, who communicate with us in our own languages, and who possess technology advanced beyond, but clearly built upon, our own. These accounts, coupled with a thorough understanding of the past and modern human condition, point to the continuation of established biological and cultural trends here on Earth, long into the distant human future.

Professionalizing Leadership Anders Örténblad, 2018-07-26 This book presents a lively debate surrounding the professionalization of leadership. With contributions from both sides

of the argument, it considers the historical overview of leadership and management as a profession, questions what constitutes a profession, and critically addresses the practicality of professionalizing leadership. With a range of perspectives including political philosophy, behavioral professionalism and management history, the book intends to facilitate further discussion on the issues at stake. With a number of education programs beginning to focus on the art and practice of leading people, this debate is particularly timely.

Using Medicine in Science Fiction H. G. Stratmann, 2015-09-14 This book offers a clearly written, entertaining and comprehensive source of medical information for both writers and readers of science fiction. Science fiction in print, in movies and on television all too often presents dubious or simply incorrect depictions of human biology and medical issues. This book explores the real science behind such topics as how our bodies adapt to being in space, the real-life feasibility of common plot elements such as suspended animation and medical nanotechnology, and future prospects for improving health, prolonging our lives, and enhancing our bodies through technology. Each chapter focuses on a single important science fiction-related subject, combining concise factual information with examples drawn from science fiction in all media. Chapters conclude with a "Bottom Line" section summarizing the most important points discussed in the chapter and giving science fiction writers practical advice on how to incorporate them into their own creations, including a list of references for further reading. The book will appeal to all readers interested in learning about the latest ideas on a variety of science fiction-related medical topics, and offers an invaluable reference source for writers seeking to increase the realism and readability of their works. Henry G. Stratmann, MD, FACC, FACP is a cardiologist with board certifications in internal medicine, cardiology, and nuclear cardiology. Before entering private practice he became Professor of Medicine at St. Louis University School of Medicine and performed clinical medical research. Henry received a BA in chemistry from St. Louis University and his MD at Southern Illinois University School of Medicine. He is currently enrolled at Missouri State University to obtain a BS in physics with a minor in astronomy. His professional publications include being an author or coauthor of many research articles for medical journals, primarily in the field of nuclear cardiology. Henry is also a regular contributor of both stories and science fact articles to Analog Science Fiction and Fact.

How Landscapes Change Gay A. Bradshaw, Pablo Marquet, 2002-12-06 North and South America share similar human and ecological histories and, increasingly, economic and social linkages. As such, issues of ecosystem functions and disruptions form a common thread among these cultures. This volume synthesizes the perspectives of several disciplines, such as ecology, anthropology, economy, and conservation biology. The chief goal is to gain an understanding of how human and ecological processes interact to affect ecosystem functions and species in the Americas. Throughout the text the emphasis is placed on habitat fragmentation. At the same time, the book provides an overview of current theory, methods, and approaches used in the analysis of ecosystem disruptions and fragmentation.

Sourcebook on Remote Sensing and Biodiversity Indicators Holly Strand, 2007 This sourcebook is intended to assist environmental managers and others who work with indicators in pursuing appropriate methods for indicator testing and production, and to offer some guidance to those responsible for the interpretation of indicators and implementation of decisions based on them. Upon reading this document, technical advisers, environmental policy makers, and remote sensing lab directors and project managers should be able to identify specific, relevant uses of remote sensing data for biodiversity monitoring and indicator development related to the CBD. --p. 8.

Extraterrestrial Contacts: the Roswell foil, UFOs, and how they alter our understanding of the modern world Jerry Kroth, 2017-07-22

Dogs at Large Daniel Rose, 2018-05-10 Dogs at Large weaves together the struggles of

two women as they confront the slings and arrows of our Matrixed world. Because they live in the information age, they have turned to the Internet for guidance with their current conflicts. Here they discover a double edged sword for, although information may be powerful, too much can be overwhelming. They soon realize that a fine line exists in cyberspace ranging from the usual array of charlatans and false prophets to a remarkable community of like-minded people whose goal is to save the planet. It is to the later that this book is dedicated. On one level this is a story about how we go to bat for what we love the most. On another, it is as multi-dimensional as the changes that are in store for the human race. To sum it all up: God is truly alive; magic is truly afoot.

Encyclopedia of Pestilence, Pandemics, and Plagues [2 volumes] Joseph P.

Byrne, 2008-09-30 Editor Joseph P. Byrne, together with an advisory board of specialists and over 100 scholars, research scientists, and medical practitioners from 13 countries, has produced a uniquely interdisciplinary treatment of the ways in which diseases, pestilence, and plagues have affected human life. From the Athenian flu pandemic to the Black Death to AIDS, this extensive two-volume set offers a sociocultural, historical, and medical look at infectious diseases and their place in human history from Neolithic times to the present. Nearly 300 entries cover individual diseases (such as HIV/AIDS, malaria, Ebola, and SARS); major epidemics (such as the Black Death, 16th-century syphilis, cholera in the nineteenth century, and the Spanish Flu of 1918-19); environmental factors (such as ecology, travel, poverty, wealth, slavery, and war); and historical and cultural effects of disease (such as the relationship of Romanticism to Tuberculosis, the closing of London theaters during plague epidemics, and the effect of venereal disease on social reform). Primary source sidebars, over 70 illustrations, a glossary, and an extensive print and nonprint bibliography round out the work.
