**Female Circumcision** Rogaiya Mustafa Abusharaf,2013-03-01 Bolokoli, khifad, tahara, tahoor, qudiin, irua, bondo, kuruna, negekorsigin, and kene-kene are a few of the terms used in local African languages to denote a set of cultural practices collectively known as female circumcision. Practiced in many countries across Africa and Asia, this ritual is hotly debated. Supporters regard it as a central coming-of-age ritual that ensures chastity and promotes fertility. Human rights groups denounce the procedure as barbaric. It is estimated that between 100 million and 130 million girls and women today have undergone forms of this genital surgery. Female Circumcision gathers together African activists to examine the issue within its various cultural and historical contexts, the debates on circumcision regarding African refugee and immigrant populations in the United States, and the human rights efforts to eradicate the practice. This work brings African women's voices into the discussion, foregrounds indigenous processes of social and cultural change, and demonstrates the manifold linkages between respect for women's bodily integrity, the empowerment of women, and democratic modes of economic development. This volume does not focus narrowly on female circumcision as a set of ritualized surgeries sanctioned by society. Instead, the contributors explore a chain of connecting issues and processes through which the practice is being transformed in local and transnational contexts. The authors document shifts in local views to highlight processes of change and chronicle the efforts of diverse communities as agents in the process of cultural and social transformation.

**Female Cosmetic Genital Surgery** Christine A. Hamori,Paul E. Banwell,Red Alinsod,2017-03-29 Female Cosmetic Genital Surgery: Concepts, Classifications, and Techniques Interest in the field of female genital rejuvenation, once neglected by physicians, has received increasing prominence as a result of media coverage of the topic. Women worldwide have learned that there are options to enhance the appearance of their external genitalia, which may have altered over time from childbirth or the effects of aging. To increase their self-confidence and sense of attractiveness, women are more frequently requesting aesthetic vaginal surgery. The editors have created this timely, unique, comprehensive resource for the field of female aesthetic vulvovaginal surgery. The book offers the following for surgeons adding these increasingly popular procedures to their armamentarium: Applied anatomy and classification of variations in shape and morphology Stepwise guidance for performing a range of reduction and augmentation procedures, including fat grafting, as well as hymenoplasty, perineoplasty, and vaginoplasty Discussion of culturally defined concepts of genital beauty Exciting new advances, such as the O-Shot® and vaginal rejuvenation with fractional erbium laser and transcutaneous temperature-controlled radiofrequency techniques More than 350 color photographs and beautifully detailed surgical illustrations Multiple fully narrated video clips showing details of surgery Both print and electronic formats for easy access everywhere To meet the ever-increasing patient demand for these updated procedures, all surgeons desiring to enhance their knowledge of and skills in female cosmetic genital surgery will want this valuable resource on their shelf!

Rodriguez,2014 An engaging and surprising history of surgeries on the clitoris, revealing what the therapeutic use of female circumcision and clitoridectomy tells us about American medical ideas concerning the female body and female sexuality.

*Female Circumcision and the Politics of Knowledge* Obioma Nnaemeka,2005-07-30 Heated debates about and insurgencies against female circumcision are symptoms of a disease emanating from a mindset that produced hierarchies of humans, conquered colonies, and built empires. The loss of colonies and empires does not in any way mitigate the ideological underpinnings of empire-building and the knowledge construction that subtends it. The mindset finds its articulation at points of coalescence. Female circumcision provided a point of coalescence and impetus for this articulation. Insisting that the hierarchy on which the imperialist project rests is not bipolar but multi-layered and more complex, the contributions in this volume demonstrate how imperialist discourses complicate issues of gender, race, and history. Nnaemeka gives voice to the silenced and marginalized, and creates space for them to participate in knowledge construction and theory making. The authors in this volume trace the travels of imperial and colonial discourses from antecedents in anthropology, travel writings, and missionary discourse, to modern configurations in films, literature, and popular culture. The contributors interrogate foreign, or Western, modus operandi and interventions in the so-called Third World and show how the resistance they generate can impede development work and undermine the true collaboration and partnership necessary to promote a transnational feminist agenda. With great clarity and in simple, accessible language, the contributors present complex ideas and arguments which hold significant implications for transnational feminism and development.

*Transcultural Bodies* Ylva Hernlund,Bettina Shell-Duncan,2007-06-07 Female circumcision or, more precisely, female genital cutting (FGC), remains an important cultural practice in many African countries, often serving as a coming-of-age ritual. It is also a practice that has generated international dispute and continues to be at the center of debates over women's rights, the limits of cultural pluralism, the balance of power between local cultures, international human rights, and feminist activism. In our increasingly globalized world, these practices have also begun immigrating to other nations, where transnational complexities vex debates about how to resolve the issue. Bringing together thirteen essays, *Transcultural Bodies* provides an ethnographically rich exploration of FGC among African diasporas in the United Kingdom, Europe, and Australia. Contributors analyze changes in ideologies of gender and sexuality in immigrant communities, the frequent marginalization of African women's voices in debates over FGC, and controversies over legislation restricting the practice in immigrant populations.

**The Female Circumcision Controversy** Ellen Gruenbaum,2015-03-17 To the Western eye, there is something jarringly incongruous, even shocking, about the image of a six-year-old girl being held down by loving relatives so that her genitals can be cut. Yet two million girls experience this each year. Most Westerners, upon learning of the practice of female circumcision, have responded with outrage; those committed to improving the status of women have gone beyond outrage to action by creating various programs for eradicating the practice. But few understand the real life complexities families face in deciding whether to follow the traditional practices or to take the risk of change. In *The Female Circumcision Controversy*, Ellen Gruenbaum points out that Western outrage and Western efforts to stop genital mutilation often provoke a strong backlash from people in the countries where the practice is common. She looks at the validity of Western arguments against the practice. In doing so, she explores both outsider and insider perspectives on female circumcision, concentrating particularly on the complex attitudes of the individuals and groups who practice it and on indigenous efforts to end it. Gruenbaum finds that the criticisms of outsiders are frequently simplistic and fail to appreciate the diversity of cultural contexts, the complex meanings, and the conflicting responses to change. Drawing on over five years of fieldwork in Sudan, where the most severe forms of genital surgery are common, Gruenbaum shows that the practices of female circumcision are deeply embedded in Sudanese cultural traditions—in religious, moral, and aesthetic values, and in ideas about class, ethnicity, and gender. Her research illuminates both

the resistance to and the acceptance of change. She shows that change is occurring as the result of economic and social developments, the influences of Islamic activists, the work of Sudanese health educators, and the efforts of educated African women. That does not mean that there is no role for outsiders, Gruenbaum asserts, and she offers suggestions for those who wish to help facilitate change. By presenting specific cultural contexts and human experiences with a deep knowledge of the tremendous variation of the practice and meaning of female circumcision, Gruenbaum provides an insightful analysis of the process of changing this complex, highly debated practice.

**Picture Coverage of the World** Heinz Dietrich Fischer, 2011 The Pulitzer Prizes for Press Photography are latecomers within the prestigious award system. Established in 1942 during World War II, they started with a general category called Photography, covering all kinds of photographs. After about a quarter-century, in 1968, this award category was divided into two separate prize groups, entitled Spot News Photography and Feature Photography. This book presents the decision-making processes that lead to the annual Pulitzer Prize winners. Additionally, in each decision-making case, one award-earning photo is reproduced to give an idea about the broad spectrum of aspects and themes declared prize-worthy by the jurors. *Male and Female Circumcision* George C. Denniston, Frederick Mansfield Hodges, Marilyn Fayre Milos, 2007-08-27 Every year around the world 13.3 million boys and 2 million girls have part or all of their external sex organs cut off. Doctors, parents, and politicians have been misled into thinking that these mutilations are beneficial, necessary and harmless. International respected experts in the fields of medicine, science, politics, law, ethics, sociology, anthropology, history and religion present the latest research, documentation and analysis of this world-wide problem, focusing on the ethical, political and legal aspects of sexual mutilation; the cost and burden to healthcare systems; the latest medical research; anatomical and function consequences; religious and cultural aspects; psychological aspects; and the world-wide campaign to end sexual mutilation.

*Universalism without Uniformity* Julia L. Cassaniti, Usha Menon, 2017-10-26 One of the major questions of cultural psychology is how to take diversity seriously while acknowledging our shared humanity. This collection, edited by Julia L. Cassaniti and Usha Menon, brings together leading scholars in the field to reconsider that question and explore the complex mechanisms that connect culture and the human mind. The contributors to *Universalism without Uniformity* offer tools for bridging silos that have historically separated anthropology's attention to culture and psychology's interest in universal mental processes. Throughout, they seek to answer intricate yet fundamental questions about why we are motivated to find meaning in everything around us and, in turn, how we constitute the cultural worlds we inhabit through our intentional involvement in them. Laying bare entrenched disciplinary blind spots, this book offers a trove of insights on issues such as morality, emotional functioning, and conceptions of the self across cultures. Filled with impeccable empirical research coupled with broadly applicable theoretical reflections on taking psychological diversity seriously, *Universalism without Uniformity* breaks new ground in the study of mind and culture.

Cut: One Woman's Fight Against FGM in Britain Today Hibo Wardere, 2016-04-07 Imagine for a moment that you are 6-years-old and you are woken in the early hours, bathed and then dressed in rags before being led down to an ominous looking tent at the end of your garden. And there, you are subjected to the cruellest cut, ordered by your own mother. Forced down on a bed, her legs held apart, Hibo Wardere was made to undergo female genital cutting, a process so brutal, she nearly died. As a teenager she moved to London in the shadow of the Somali Civil War where she quickly learnt the procedure she had undergone in her home country was not 'normal' in the west. She embarked on a journey to understand FGM and its roots, whilst raising her own family and dealing with the devastating consequences of the cutting in her own life. Today Hibo finds herself working in London as an FGM campaigner, helping young girls whose families plan to take them abroad for the procedure. She has vowed to devote herself to the campaign against FGM. Eloquent and searingly honest, this is Hibo's memoir which promises not only to tell her remarkable story but also to shed light on a medieval practice that's being carried out in the 21st century, right on our doorstep. FGM in the UK has gone undocumented for too long and now that's going to change. Devastating, empowering and informative, this book brings to life a clash of cultures at the heart of contemporary society and shows how female genital mutilation is a very British problem.

**Making the Mark** Miroslava Prazak, 2016-09-15 Why do female genital cutting practices persist? How does circumcision affect the rights of girls in a culture where initiation forms the lynchpin of the ritual cycle at the core of defining gender, identity, and social and political status? In *Making the Mark*, Miroslava Prazak follows the practice of female circumcision through the lives and activities of community members in a rural Kenyan farming society as they decide whether or not to participate in the tradition. In an ethnography twenty years in the making, Prazak weaves multiple Kuria perspectives—those of girls, boys, family members, circumcisers, political and religious leaders—into a riveting account. Though many books have been published on the topic of genital cutting, this is one of the few ethnographies to give voice to evolving perspectives of practitioners, especially through a period of intense anticutting campaigning on the part of international NGOs, local activists, and donor organizations. Prazak also examines the cultural challenges that complicate the human-rights anti-FGM stance. Set in the rolling hills of southwestern Kenya, *Making the Mark* examines the influences that shape and change female genital cutting over time, presenting a rich mosaic of the voices contributing to the debate over this life-altering ritual.

**The Perfect Vagina** Lindy McDougall, 2021-05-04 In the West, a specific ideal for female genitalia has emerged: one of absence, a clean slit, attained through the removal of pubic hair and, increasingly, through female genital cosmetic surgery known as FGCS. In *The Perfect Vagina: Cosmetic Surgery in the Twenty-First Century*, Lindy McDougall provides an ethnographic account of women who choose FGCS in Australia and the physicians who perform these procedures, both in Australia and globally, while also examining the environment in which surgeons and women come together. Physicians have a vested interest in establishing this surgery as valid medical intervention, despite majority medical opinion explicitly acknowledging that a wide range of genital variation is normal. McDougall offers a nuanced picture of why and how these procedures are performed and draws parallels between FGCS and anthropological discussions of female genital circumcision (cutting). Using the neologism biomagical, she argues that cosmetic surgery functions as both ritual and sacrifice due to its promise of transformation while simultaneously submitting the body to the risks and pain of surgery, thus exposing biomedicine as an increasingly cultural and commercial pursuit. *The Perfect Vagina* highlights the complexities involved with FGCS, its role in Western beauty culture, and the creation and control of body image in countries where self-care is valorized and medicine is increasingly harnessed for enhancement as well as health.

**Conversations on Conflict Photography** Lauren Walsh, 2020-09-08 In today's image-saturated culture, the visual documentation of suffering around the world is more prevalent than ever. Yet instead of always deepening the knowledge or compassion of viewers, conflict photography can result in fatigue or even inspire apathy. Given this tension between the genre's ostensible goals and its effects, what is the purpose behind taking and showing images of war and crisis? *Conversations on Conflict Photography* invites readers to think through these issues via conversations with award-winning photographers, as well as leading photo editors and key representatives of the major human rights and humanitarian organizations. Framed by critical-historical essays, these dialogues explore the complexities and ethical dilemmas of this line of work. The practitioners relate the struggles of their craft, from brushes with death on the frontlines to the battles for space, resources, and attention in our media-driven culture. Despite these obstacles, they remain true to a purpose, one that is palpable as they celebrate remarkable success stories: from changing the life of a single individual to raising broad awareness about human rights issues. Opening with an insightful foreword by the renowned Sebastian Junger and richly illustrated with challenging, painful, and sometimes beautiful images, *Conversations* offers a uniquely rounded examination of the value of conflict

photography in today's world.
