Concepts of Capital Jacek Tittenbrun, 2017-07-05 Borrowing terminology from the economic discipline 'specifically the concept of capital has led to an abundance of new terms in the social sciences: human capital, social capital, and cultural capital, to name the most prominent representatives on an ever-growing list. In this interdisciplinary transaction, the concept is borrowed and the original meaning extended until the new concepts often have nothing left in common with their initial referents. Here Jacek Tittenbrun offers a critical analysis of human, social, and cultural capital on the basis of their uses and misuses across a wide range of social sciences, simultaneously revealing the source of conceptual diffusion in the real world. He presents a two-pronged analysis of an intellectual fashion popular in the social sciences and offers a critical analysis of a range of concepts constructed around the common core of capital. The analysis is innovative, as it is underpinned by a theoretical framework rooted in economic sociology and the concept of ownership in particular. The approach is one of the sociology of knowledge coupled with a substantive critique-application of the given

concepts. The volume reveals a range of processes in the real world that account for the conceptual diffusion. The general reader will be drawn to the discussion in the second half of the book, a study of a variety of relatable real life situations that illuminate privatization and commodification in our lives.

Research Methods in Education Louis Cohen, Lawrence Manion, Keith Morrison,2002-09-11 This is a new edition of one of our best-selling textbooks. The authors have thoroughly updated the fourth edition and

included more text on current developments in research practice, action research, developments in ICT, questionnaire design, ethnographic research, conducting needs analysis, constructing and using tests, observational methods, reliability and validity, ethical issues and curriculum research. The entire text has been redesigned to cater for the increasingly sophisticated needs of the educational researcher. The new edition is more comprehensive, up-to-date and user-friendly, with increased accessibility. The authors, who are experienced teachers in the field, have produced a better written book (if that's possible) containing readable and realistic views of research and methodology, and show how to interpret the data.

Pirates In The Navy Tendayi Viki, 2020-05-14 Faced with the choice of starting a company or joining a large corporation, Steve Jobs believed that it was 'more fun to be a pirate than to join the navy'. But for innovators inside established companies, making a distinction between being a pirate and joining the navy is a fallacy. We have to figure out a way to become pirates in the navy! There is nothing harder in business than trying to innovate within large corporations. Innovators in big companies often face internal opposition as well as their external competitors. It is the management of the core business that tends to get in the way of innovation. Most intrapreneurs recognise that innovation can't be carried out as a series of one-off projects that always have to jump through political hurdles. They realise that there is a need for innovation to happen as a repeatable process. But how can they achieve this? This is a step-by-step guide to getting continuous innovation done in companies and reshaping them in the process. It is for anyone involved in corporate innovation and driving company change.
