Armed Forces' Tax Guide - Publication 3 (For Use in Preparing 2020 Returns) Internal Revenue Service,2021-03-03 This publication covers the special tax situations of active members of the U.S. Armed Forces. For federal tax purposes, the U.S. Armed Forces includes commissioned officers, warrant officers, and enlisted personnel in all regular and reserve units under control of the Secretaries of the Defense, Army, Navy, and Air Force. The U.S. Armed Forces also includes the Coast Guard. The Public Health Service and the National Oceanic and Atmospheric Administration can also receive many of the same tax benefits. The U.S. Armed Forces doesn't include the U.S. Merchant Marine or the American Red Cross. Members serving in an area designated or treated as a combat zone are granted special tax benefits. In the event an area ceases to be a combat zone, the IRS will do its best to notify you. Many of the relief provisions will end at that time.

Army Personnel Recovery (FM 3-50. 1) Department Army,2012-09-28 Field Manual (FM) 3-50.1 is the Army's doctrinal publication for personnel recovery. It presents doctrinal guidance and direction for Army personnel recovery operations and is the foundation for developing tactics and techniques, handbooks, and unit standard operating procedures. It provides operational direction for commanders, staffs, and trainers at all echelons, from company through theater army. This doctrine helps ensure all echelons of the Army organize, train, and equip to conduct personnel recovery and prevent isolation incidents. This FM supersedes and builds on the groundbreaking work of FM 3-50.1, Army Personnel Recovery, 10 August 2005, by articulating the importance of the commander in successful personnel recovery operations, enlarging its scope to include stability operations and defense support of civil authorities operations, and addressing unified land operations. This updated manual incorporates the doctrinal concepts in FM 1, The Army; ADP 3-0, Unified Land Operations; FM 3-07, Stability Operations; and FM 3-28, Civil Support Operations. Army personnel recovery doctrine is consistent with joint personnel recovery doctrine, applicable Department of Defense directives (DODDs) and instructions (DODIs), Chairman of the Joint Chiefs of Staff instructions and manuals, Army policy and regulation, and federal law. It is Department of Defense (DOD) policy, established in DODD 3002.01E, to preserve the lives and well-being of individuals who are in danger of becoming, or already are, beleaguered, besieged, captured, detained, interned, or otherwise missing or evading capture while participating in activities or missions sponsored by the United States. The target audience for FM 3-50.1 is Army commanders and staffs responsible for the planning, preparation, execution, and assessment of personnel recovery operations. This manual provides guidance for other Service commanders and staffs who command and work with Army forces. This manual is also a resource for United States government agencies and other unified action partners who seek to understand the role of the Army in safeguarding and recovering Soldiers.

The Rescue of Bat 21 Darrell D Whitcomb,2014-07-15 When his electronic warfare plane--call sign Bat 21--was shot down on 2 April 1972, fifty-three-year-old Air Force navigator Icaal "Gene" Hambleton parachuted into the middle of a North Vietnamese invasion force and set off the biggest and most controversial air rescue effort of the Vietnam War. Now, after twenty-five years of official secrecy, the story of that dangerous and costly rescue is revealed for the first time by a decorated Air Force pilot and Vietnam veteran. Involving personnel from all services, including the Coast Guard, the unorthodox rescue operation claimed the lives of eleven soldiers and airmen, destroyed or damaged several aircraft, and put hundreds of airmen, a secret commando unit, and a South Vietnamese infantry division at risk. The book also examines the thorny debates arising from an operation that balanced one man's life against mounting U.S. and South Vietnamese casualties and material losses, the operation's impact on one of the most critical battles of the war, and the role played by search and rescue as America disengaged from that war.

Personnel Recovery Operations for Special Operations Forces in Urban Environments Marshall V. Ecklund,Michael A. McNerney,2004-06 This thesis presents two prescriptive models for approaching challenges to special operations forces with regard to personnel recovery (PR) in an urban environment. It begins by developing a model for overt recovery methods using McRaven's model of Special Operations as the foundation. This model is then tested against three different case studies from operations in Mogadishu, Somalia in 1993. The original six principles proposed by McRaven are complimented with four newly prescribed principles that account for the interactions of the isolated personnel. The first case study is Task Force Ranger's organic recovery attempt conducted 3-4 October 1993 during Operation Gothic Serpent. The second case study is that of the recovery of a UH-60 crew shot down on 25 September 1993, and the third is the Tiger Company's recovery of the Quick Reaction Force Lost Platoon on 4 October 1993. In all overt case studies, the authors conducted interviews with most key participants and decision-makers, and all leaders personally involved with the recovery. Following this analysis, a nonconventional assisted recovery (NAR) model is presented for clandestine personnel recovery methods. This model borrows the relative superiority concept from McRaven's theory, but proposes six different principles. The model is evaluated using three case studies, one from the French theater of operations during World War II, another from the Korean War, and the third from Operation Iraqi Freedom. These cases support the idea that, while the urban operational environment may vary across time and space, the principles supporting successful personnel recovery operations endure. Assignments, Attachments, Details, and Transfers (Army Regulation 140-10) Department Army,2012-11-02 This regulation covers policy and procedures for assigning, attaching, removing, and transferring U.S. Army Reserve soldiers. It defines Ready Reserve Control Groups and the Selected Reserve. Detailed procedures are given for removing soldiers from an active status. It also gives procedures for interservice transfer and selective retention of unit soldiers.

Bush At War Bob Woodward,2012-12-25 With his unmatched investigative skill, Bob Woodward tells the behind-the-scenes story of how President George W. Bush and his top national security advisers led the nation to war. Extensive quotations from the secret deliberations of the National Security Council and firsthand revelations of the private thoughts, concerns and fears of the president and his war cabinet, make BUSH AT WAR an unprecedented chronicle of a modern presidency in a time of grave crisis. Based on interviews with more than a hundred sources and four hours of exclusive interviews with the president, BUSH AT WAR reveals Bush's sweeping, almost grandiose vision for remaking the world. Woodward's virtual wiretap into the White House Situation Room reveals a stunning group portrait of an untested president and his advisers, three of whom might themselves have made it to the presidency. In BUSH AT WAR, Bob Woodward once again delivers a reporting tour de force.

Combat Search and Rescue in Desert Storm Donald Whitcomb,2012-08-01 After Southeast Asia, analysts and force planners came to the realization that there was a fundamental difference between search and rescue (SAR) in a permissive area and in an area that was not permissive (i.e., under enemy control). This second condition is now called combat search and rescue or CSAR. At the time of Desert Storm, the two forms of rescue were defined thusly: Search and Rescue (SAR): Use of aircraft, surface craft, submarines, personnel, and equipment to locate and recover personnel in distress on land or at sea. Combat Search and Rescue (CSAR): A specialized SAR task performed by rescue-capable forces to effect recovery of distressed personnel from hostile territory during contingency operations or wartime.² The development of this rescue capability has been well established. Dr. Robert Futrell documented our efforts in Korea in *The United States Air Force in Korea, 1950-1953*. His work was followed

by Dr. Earl Tilford's Search and Rescue in South east Asia, which eloquently chronicled the heroic efforts of the rescue crews in that conflict who brought back literally thousands of airmen. It extensively documented what is now considered the golden age of rescue. This work is meant to follow in those traditions and will focus on our CSAR efforts in the Persian Gulf War of 1991, or more specifically, the period of Operation Desert Storm, 17 January to 28 February 1991. Overall, CSAR in Desert Storm appears to have been a mixed bag. Because of advances in precision weaponry, Global Positioning System (GPS) technology, countermeasures, and training, relatively few coalition aircraft were shot down. Forty-three coalition aircraft were lost in combat, most over high-threat areas. Eighty-seven coalition airmen, soldiers, sailors, and marines were isolated in enemy or neutral territory. Of that total, 48 were killed, one is still listed as missing, 24 were immediately captured, and 14 were exposed in enemy territory. Of those who survived, most landed in areas controlled by enemy troops. Of the few actually rescueable, six were not rescued for a variety of reasons, but primarily because of limitations in CENTAF's ability to locate them accurately and in a timely manner.

Lone Survivor Marcus Luttrell, 2007-06-12 Follow along a Navy SEAL's firsthand account of American heroism during a secret military operation in Afghanistan in this true story of survival and difficult choices. On a clear night in late June 2005, four U.S. Navy SEALs left their base in northern Afghanistan for the mountainous Pakistani border. Their mission was to capture or kill a notorious al Qaeda leader known to be ensconced in a Taliban stronghold surrounded by a small but heavily armed force. Less than twenty-four hours later, only one of those Navy SEALs remained alive. This is the story of fire team leader Marcus Luttrell, the sole survivor of Operation Redwing, and the desperate battle in the mountains that led, ultimately, to the largest loss of life in Navy SEAL history. But it is also, more than anything, the story of his teammates, who fought ferociously beside him until he was the last one left—blasted unconscious by a rocket grenade, blown over a cliff, but still armed and still breathing. Over the next four days, badly injured and presumed dead, Luttrell fought off six al Qaeda assassins who were sent to finish him, then crawled for seven miles through the mountains before he was taken in by a Pashtun tribe, who risked everything to protect him from the encircling Taliban killers. A six-foot-five-inch Texan, Leading Petty Officer Luttrell takes us, blow by blow, through the brutal training of America's warrior elite and the relentless rites of passage required by the Navy SEALs. He transports us to a monstrous battle fought in the desolate peaks of Afghanistan, where the beleaguered American team plummeted headlong a thousand feet down a mountain as they fought back through flying shale and rocks. In this rich, moving chronicle of courage, honor, and patriotism, Marcus Luttrell delivers one of the most powerful narratives ever written about modern warfare -- and a tribute to his teammates, who made the ultimate sacrifice for their country.

Joint Urban Operations Joint Chiefs Of Staff, Office of the Secretary of Defense, U. S. Department of Defense, 2013-11 This publication has been prepared under the direction of the Chairman of the Joint Chiefs of Staff (CJCS). It sets forth joint doctrine to govern the activities and performance of the Armed Forces of the United States in joint operations and provides the doctrinal basis for interagency coordination and for US military involvement in multinational operations. It provides military guidance for the exercise of authority by combatant commanders and other joint force commanders (JFCs) and prescribes joint doctrine for operations, education, and training. It provides military guidance for use by the Armed Forces in preparing their appropriate plans. It is not the intent of this publication to restrict the authority of the JFC from organizing the force and executing the mission in a manner the JFC deems most appropriate to ensure unity of effort in the accomplishment of the overall objective.

Air War Hanoi Robert F. Dorr, 1988 Om Vietnamkrigen som den forløb i luftmilitær henseende set fra amerikansk side. Der fortælles om de vigtigste fly og om personer, der deltog i kampene, samt om de våben, der udvikledes under krigen.

Cheating Death George J. Marrett, 2016-12-06 They flew low and slow, at treetop level, at night, in monsoons, and in point-blank range of enemy guns and missiles. They were missions no one else wanted, but the ones all other pilots prayed for when shot down. Flying the World War II-vintage Douglas A-1 Skyraider, a single-engine, propeller-driven relic in a war of "fast-movers," these intrepid US Air Force pilots, call sign Sandy, risked their lives with every mission to rescue thousands of downed Navy and Air Force pilots. With a flashback memory and a style all his own, George J. Marrett depicts some of the most dangerous aerial combat of any war. The thrilling rescue of "Streetcar 304" and William Jones's selfless act of heroism that earned him the Medal of Honor are but two of the compelling tales he recounts. Here too are the courages Jolly Green Giant helicopter crews, parajumpers, and forward air controllers who worked with the Sandys over heavily defended jungles and mountains well behind enemy lines. Passionate, mordantly witty, and filled with heart-pounding adrenaline, Cheating Death reads like the finest combat fiction, but it is the real deal: its heroes, cowards, jokers, and casualties all have names and faces readers will find difficult to forget.
