Hello Ocean Pam Muñoz Ryan,2001-02-01 Dive into this playful poem about the draw of the shore

and the effect the ocean has on all five senses. Relive a day at the beach with this lovely book of memories. You can almost feel the salt spray on your face and smell the musky scent of ocean in the cool morning air. Remember how the sand squishes between your toes as the tide rushes to shore and taste the tang of the ocean on your lips. Spirited language evokes a sense of closeness and nostalgia for an old friend. The inspiration of the ocean will make learning the five senses as easy as a day at the beach. Crisp, realistic illustrations fill the pages with the rush of surf and the warmth of sun-baked sand. The sights and smells and sensations of the sea become vividly clear in these beautifully rendered paintings.

Code Girls Liza Mundy, 2017-10-10 The award-winning New York Times bestseller about the American women who secretly served as codebreakers during World War II--a prodigiously researched and engrossing (New York Times) book that shines a light on a hidden chapter of American history (Denver Post). Recruited by the U.S. Army and Navy from small towns and elite colleges, more than ten thousand women served as codebreakers during World War II. While their brothers and boyfriends

took up arms, these women moved to Washington and learned the meticulous work of code-breaking. Their efforts shortened the war, saved countless lives, and gave them access to careers previously denied to them. A strict vow of secrecy nearly erased their efforts from history; now, through dazzling research and interviews with surviving code girls, bestselling author Liza Mundy brings to life this riveting and vital story of American courage, service, and scientific accomplishment.

MICRONATIONS Kathy Ceceri,2014-05-12 For anyone who's ever dreamed of ruling over their own empire, here's your chance! Micronations are imaginary countries that have a lot of the same things as real ones: laws, customs, history, and their own flags, coins, and postage stamps. *Micronations: Invent Your Own Country and Culture* takes readers step-by-step to create their own unique realm, using examples from real nations, micronations, and fictional lands. What makes a country a country? What symbols and systems define a country and help it function? Learn about geography and government, technology and the environment, art and culture, and the literary device of world-building used in works

like *The Hobbit* and *Harry Potter*. Kids get to invent their own language, music, games, clothing, food, and holidays to fit their micronation's tradition. Whether they create a land of time travel where every city exists in a different epoch or an underwater monarchy whose chief export is fish, *Micronations: Invent Your Own Country and Culture* will engage kids' imagination and teach make-believe rulers how the real world works. This title meets Common Core State Standards for literacy in language arts, history and social studies; Guided Reading Levels and Lexile measurements indicate grade level and text complexity.

[The Nutshell Studies of Unexplained Death](#) Corinne May Botz, 2004-09-28 *The Nutshell Studies of Unexplained Death* offers readers an extraordinary glimpse into the mind of a master criminal investigator. Frances Glessner Lee, a wealthy grandmother, founded the Department of Legal Medicine at Harvard in 1936 and was later appointed captain in the New Hampshire police. In the 1940s and 1950s she built dollhouse crime scenes based on real cases in order to train detectives to assess visual evidence. Still used in forensic training today, the eighteen Nutshell dioramas, on a scale

of 1:12, display an astounding level of detail: pencils write, window shades move, whistles blow, and clues to the crimes are revealed to those who study the scenes carefully. Corinne May Botz's lush color photographs lure viewers into every crevice of Frances Lee's models and breathe life into these deadly miniatures, which present the dark side of domestic life, unveiling tales of prostitution, alcoholism, and adultery. The accompanying line drawings, specially prepared for this volume, highlight the noteworthy forensic evidence in each case. Botz's introductory essay, which draws on archival research and interviews with Lee's family and police colleagues, presents a captivating portrait of Lee.

You Are Stardust Elin Kelsey, 2017-08-10 People are nature. From the water we drink to the trees we climb, we are connected to the natural world in big and surprising ways. With simple, poetic text, and exquisite artwork, *You Are Stardust* introduces kids to these connections - sparking their imaginations and starting conversations. Combining the ideas of environmental author and educator Elin Kelsey with inventive, three-dimensional dioramas by artist Soyeon Kim, this remarkable picture book reveals ties that are often sensed, yet seldom explained. Children will learn that the salt in their

body is the same as the salt in the ocean, that they learned to speak in the same way that baby birds do - by copying their parents, and that elephants, bats and whales make friends, just like they do. In a world dominated by technology, never have these connections between people and nature been more worth exploring.

Attack of the Swordfish and Other Singapore Tales Charlotte Lim,2005

Alfie's Long Winter Greg McEvoy,1995 A breeze blew. Alfie closed his eyes, and - held on tight. AL-FIE, AL-FIE, AL-FIE... All the leaves on the ground shouted together. But Alfie could not jump. And so, Alfie's long winter began.

A Blueprint for Promoting Academic and Social Competence in After-School Programs Thomas P. Gullotta,Martin Bloom,Christianne F. Gullotta,Jennifer C. Messina,2010-06-25 School activities alone are not always sufficient to ensure children's academic progress or socio-emotional development and well-being. And the time when many children typically have the least adult supervision – immediately after school – is also the time that they are at the highest risk to act as perpetrators or become victims

of antisocial behavior. Throughout *A Blueprint for Promoting Academic and Social Competence in After-School Programs*, which focuses on children in grades 1 through 6, noted experts identify the best practices of effective programs and pinpoint methods for enhancing school-based skills and making them portable to home and neighborhood settings. This volume: (1) Analyzes the concepts central to effective after-school programs. (2) Offers developmental, cognitive, and social ecology perspectives on how children learn. (3) Features more than 100 exercises that develop young people's capabilities for academic, social, moral, and emotional learning – These exercises are ready to use or can be adapted to students' unique needs. (4) Emphasizes young people's development as students and as productive members of society during middle to late childhood and early adolescence. (5) Presents explicit theory and evidence that can be used to explain the value of after-school programs for budget proposals. This important book will find an appreciative, ready audience among the program directors who design after-school curricula, the educators who implement them, the mental health and social work professionals who help staff them, and the current crop of graduate students who will

create the next generation of programs.

Once you accept the new model, youll find freedom in love and liberation from the shackles of needing love from others. Youll stop seeking love and start creating it for yourself.
