**Medicine: Preserving the Passion** Phil R. Manning, Lois DeBakey, 2013-03-14 In *Medicine: Preserving the Passion*, Phil R. Manning, a pioneer and recognized authority in continuing medical education, and Lois DeBakey, a passionate advocate of critical reasoning and leading scholar in scientific communication, endeavor to shift the focus in lifelong learning from group exercises in a lecture hall to self-directed, practice-related activities. Although most experts have applauded this new concept, few publications have addressed methods for implementation. The Manning-DeBakey book describes such methods as devised by outstanding clinicians and academicians to obtain educational benefit from their clinical experience. Some techniques inspired by quality assurance, for example, these master clinicians have used successfully to improve their knowledge, skills, and patient care. This book not only identifies the primary concerns in continuing medical education, but also offers sound recommendations and effective solutions and suggests future directions and approaches. The authors have analyzed the continuing educational practices of physicians in a wide range of environments, from small communities to the most acclaimed medical centers, and have extracted additional advice from the writings of past authorities like Osler. The resulting concepts will undoubtedly attract wide public attention. Office practice audit, self-directed learning, case indexing, patient education, computer-assisted education, and collegial networks, as well as regular reading, writing, and teaching, are among the successful methods described by physicians and surgeons who exemplify the highest standards of medical practice.

Evans, 2015-08-13 This volume offers a comprehensive history of the Mount Desert Island Biological Laboratory (MDIBL), one of the major marine laboratories in the United States and a leader in using marine organisms to study fundamental physiological concepts. Beginning with its founding as the Harpswell Laboratory of Tufts University in 1898, David H. Evans follows its evolution from a teaching facility to a research center for distinguished renal and epithelial physiologists. Fundamental physiological concepts in the context of the discoveries made at the MDIBL are explained and the social and administrative history of this renowned facility is described.

**Medicine, Preserving the Passion** Phil R. Manning, Lois DeBakey, 1987 In *Medicine: Preserving the Passion*, Phil R. **William Golding** Jack I. Biles, Robert O. Evans, 2021-09-15 In William Golding: Some Critical Considerations, fourteen scholars assess various aspects of the Nobel Prize-winning author's writings. Woman's Inhumanity to Woman Phyllis Chesler, 2009-05-01 Drawing on the most important studies in psychology, human aggression, anthropology, and primatology, and on hundreds of original interviews conducted over a period of more than 20 years, this groundbreaking treatise urges women to look within and to consider other women realistically, ethically, and kindly and to forge bold and compassionate alliances. Without this necessary next step, women will never be liberated. Detailing how women's aggression may not take the same form as men's, this investigation reveals—through myths, plays, memoir, theories of revolutionary liberation movements, evolution, psychoanalysis, and childhood development—that girls and women are indeed aggressive, often indirectly and mainly toward one another. This fascinating work concludes by showing that women depend upon one another for emotional intimacy and bonding, and exclusionary and sexist behavior enforces female conformity and discourages independence and psychological growth.

*America's Heartland Remembers* David J. Marcou, Barbara A. Pauls, 2002 This is a collection of photos, poetry and prose, created by artists from the La Crosse, Wisconsin area. Biographies of the contributors are included.

*Naked to the Bone* Bettyann Kevles, 1997 By the late 1960s, the computer and television were linked to produce medical images that were as startling as Roentgen's original X-rays. Computerized tomography (CT) and magnetic resonance imaging (MRI) made it possible to picture soft tissues invisible to ordinary X-rays. Ultrasound allowed expectant parents to see their unborn children. Positron emission tomography (PET) enabled neuroscientists to map the brain. In this lively history of medical imaging, the first to cover the full scope of the field from X-rays to MRI-assisted surgery, Bettyann Kevles explores the consequences of these developments for medicine and society. Through lucid prose, vivid anecdotes, and more than seventy striking illustrations, she shows how medical imaging has transformed the practice of medicine - from pediatrics to dentistry, neurosurgery to geriatrics,

gynecology to oncology. Beyond medicine, Kevles describes how X-rays and the newer technologies have become part of the texture of modern life and culture. They helped undermine Victorian sexual sensibilities, gave courts new forensic tools, provided plots for novels and movies, and offered artists from Picasso to Warhol new ways to depict the human form.

Twelve Years a Slave Solomon Northup, 2023-07-04 In 1841, Solomon Northup was a free black man, married with three children and living in upstate New York, when he was tricked into going to Washington DC. There, he was drugged, kidnapped, and sold into slavery, eventually ending up on a plantation in the Red River area of Louisiana. For twelve years he experienced and witnessed the arbitrary beatings and whippings, around-the-clock back-breaking work, and countless other degradations that came with being enslaved in the

antebellum south. Through the sympathetic ear of a white man and with miraculous timing, he was eventually freed and returned home. He then wrote this memoir and contributed to the abolitionist movement before disappearing from the pages of history. Like *Incidents in the Life of a Slave Girl, Twelve Years a Slave* stands in stark contrast to the era's bucolic propaganda that the enslaved in the south were well treated, well provided for, and made "part of the family." As a first-hand account, it exposes slavery for what it is: barbaric, dehumanizing, and evil.
