Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Marina and Lee Priscilla Johnson McMillan,2013-08-06 “The single best book ever written on the Kennedy assassination” -- Thomas Mallon, author of *Mrs. Paine's Garage: And the Murder of John F. Kennedy* “It is not at all easy to describe the power of Marina and Lee . . . It is far better than any other book about Kennedy . . . Other books about the Kennedy assassination are all smoke and no fire. Marina and Lee burns.” –New York Times Book Review Marina and Lee is an indispensable account of one of America’s most traumatic events and a classic work of narrative history. In her meticulous—at times even moment by moment—account of Oswald’s progress toward the assassination of JFK, Priscilla Johnson McMillan takes us inside Oswald’s fevered mind and his manic marriage. Only a few weeks after the birth of their second child, Oswald’s wife, Marina, hears of Kennedy’s death and discovers that Lee's rifle is missing from the garage where it was stored. She knows that her husband has killed the President. McMillan came to the story with a unique knowledge of the two main characters. In the 1950s, she worked for Kennedy and had known him well for a time. Later, working in Moscow as a journalist, she interviewed Lee Harvey Oswald during his attempt to defect to the Soviet Union. When she heard his name again on November 22, 1963, she said, “My God! I know that boy!” Marina and Lee was written with the complete and exclusive cooperation of Oswald’s Russian-born wife, Marina Prusakova, whom McMillan debriefed for seven months in the immediate aftermath of the President’s assassination and her husband’s nationally televised execution at the hands of Jack Ruby. The truth is far more compelling, and unsettling, than the most imaginative conspiracy theory. Marina and Lee is a human drama that is outrageous, heartbreaking, tragic,

fascinating—and real.

Time Like a River Randy Perrin,Hannah Perrin,Tova Perrin,1997 Unforgettable is the word best used to describe Time Like a River by Randy Perrin and his young daughters, Hannah and Tova. This book has several themes. The first illustrates the friendship between 13-year-old Margie, who is Jewish, and her best friend, Isabel, who is Catholic. The second is about Margie's mom who has become dangerously ill with an unknown disease. The third is about a school history project the girls are working on which takes them to an historical archive where they find a diary written by a Chinese man 100 years before Margie travels back in time to visit the Chinese man who recently lost his father to a mysterious malady. Through this experience Margie figures out the disease her mother has and helps the doctors save her life. Social Studies teachers can also learn how much more important it is to emphasize how people lived, thought, and felt in the past, rather than make children memorize isolated facts. -Independent Publisher

When Kate sets out to retrieve a set of stolen maps for the Pack, Atlanta's paramilitary clan of shapeshifters, she quickly realizes much more is at stake. During a flare, gods and goddesses can manifest - and battle for power. The stolen maps are only the opening gambit in an epic tug-of-war between two gods hoping for rebirth. **Gravity from the Ground Up** Bernard Schutz,2003-12-04 This book invites the reader to understand our Universe, not just marvel at it. From the clock-like motions of the planets to the catastrophic collapse of a star into a black hole, gravity controls the Universe. Gravity is central to modern physics, helping to answer the deepest questions about the nature of time, the origin of the Universe and the unification of the forces of nature. Linking key experiments and observations through careful physical reasoning, the author builds the reader's insight step-by-step from simple but profound facts about gravity on Earth to the frontiers of research. Topics covered include the nature of stars and galaxies, the mysteries of dark matter and dark energy, black holes, gravitational waves, inflation and the Big

Bang. Suitable for general readers and for undergraduate courses, the treatment uses only high-school level mathematics, supplemented by optional computer programs, to explain the laws of physics governing gravity.

**One Human Minute** Stanislaw Lem,2012-07-18 Essays by the author of Solaris: “Lem’s delightful sense of humor accentuates his essential seriousness about humanity’s possible fate” (Publishers Weekly). In One Human Minute, Stanislaw Lem takes a hard look at our world and technology—what it means now and what dire implications it could have for the future—in satirical, wise, and biting prose. With this collection of three essays, Lem targets some of the most pressing issues humanity faces, from our unsettling origins to the cybernetic future of our weaponry. “The Upside-Down Evolution” chronicles the Earth’s military evolution from nuclear stockpiles to deadly, robotic microweapons. “The

World as Cataclysm” examines how humankind’s dominance on Earth is the result of the extermination of another species just as qualified to rule the world. And the title essay presents a disturbing and fascinating snapshot of every single thing happening on the planet in a sixty-second span. Effortlessly blurring the lines between fiction and nonfiction, scientific essay and fantastical short story, cynical reproach and wry humor, Lem’s One Human Minute combines the best elements of the renowned science fiction author and Kafka Prize winner’s writing into one irreverent and intellectually stimulating package.

The Science of Vocal Pedagogy D. Ralph Appelman, 1986 Drawing upon the sciences of acoustics, linguistics, and physiology, D. Ralph Appelman advances a system of teaching voice based on the International Phonetic Alphabet. His premises are that vocal pedagogy requires an understanding of physiological and physical processes; that the singer and the voice teacher need pedagogical tools to link this scientific knowledge with the art of vocalization; that the word in the art song provides such a tool, for it conveys the primary meaning of the utterance; that the art song, therefore, demands intelligibility as well as beauty; and that if the art song is to attain the aesthetic level demanded by the music and the text, the singer must master a refined and orderly vocal system. Liberally illustrated with photographs, x-rays, spectrograms, palatograms, charts, drill materials, and drawings, this text develops the total process of disciplined vocal utterance, progressing from the physiological aspects of phonation to the elements of aesthetic interpretation and the art of combining the two in song.
