Yes Logo Jiazhuo George Wang, Shuo Qin, Allison Wang, 2023-10-16 This book focuses on how to succeed in China, the globe's largest consumer market, through the branding market strategy. What are the undisclosed recipes that brands can follow to capture the attention and emotion of consumers in China? What's the magical key to open the locked doors? The answer to these questions would be intriguing for many readers outside China, including but not limited to executives of global brands, owners of medium-and-small-sized businesses aiming for the global market, branding/marketing professionals, financial investors and analysts, business professors and researchers in universities and colleges, graduate and undergraduate students, and readers with an interest on these topics in the general public. In comparison with many case studies that focus on only a single or few cases, or else lean toward being a macro-discussions of China's consumer market without in-depth analysis of representative cases, this book provides both. Many branding strategies, programs, and activities presented in this book are of the innovative type, which could be very fresh and interesting to readers. Many of the in-depth analyses and specific insights presented in this book are provided by well-recognized business analysts/writers, which may not be available in other publications. Overall, this book provides readers with the opportunity to receive some valuable new knowledge about how to succeed in the globe's largest consumer market, providing foodstuff for both thought and enjoyment.

China's Mobile Economy Winston Ma, 2016-11-07 Explore the world-changing digital transformation in China China's Mobile Economy: Opportunities in the Largest and Fastest

Information Consumption Boom is a cutting-edge text that spotlights the digital transformation in China. Organised into three major areas of the digital economy within China, this ground-breaking book explores the surge in e-commerce of consumer goods, the way in which multi-screen and mobile Internet use has increased in popularity, and the cultural emphasis on the mobile Internet as a source of lifestyle- and entertainment-based content. Targeted at the global business community, this lucid and engaging text guides business leaders, investors, investment banking professionals, corporate advisors, and consultants in grasping the challenges and opportunities created by China's emerging mobile economy, and its debut onto the global stage. Year 2014-15 marks the most important inflection point in the history of the internet in China. Almost overnight, the world's largest digitally-connected middle class went both mobile and multi-screen (smart phone, tablets, laptops and more), with huge implications for how consumers behave and what companies need to do to successfully compete. As next-generation mobile devices and services take off, China's strength in this arena will transform it from a global "trend follower" to a "trend setter." Understand what the digital transformation in China is, and impact on global capital markets, foreign investors, consumer companies, and the global economy as a whole Explore the e-commerce consumption boom in the context of the Chinese market Understand the implications of the multi-screen age and mobile Internet for China's consumers See how mobile Internet use, its focus on lifestyle and entertainment is aligned with today's Chinese culture Learn about the mobile entertainment habits of China's millennial generation and the corresponding new advertisement approaches The development of China's mobile economy is one of the most important trends that will reshape the future of business, technology and society both in China and the world. China's Mobile Economy: Opportunities in the Largest and Fastest Information Consumption Boom introduces you to the digital transformation in China, and explains how this transformation has the potential to transform both China and the global consumer landscape.

Marketing For Competitiveness: Asia To The World - In The Age Of Digital Consumers

Philip Kotler, Hermanwan Kartajaya, Den Huan Hooi, 2016-11-24 Asia is the most populated geographical region, with 50% of the world's inhabitants living there. Coupled that with the impressive economic growth rates in many Asian countries, the region provides a very attractive and lucrative market for many businesses, big and small and from all industries. In addition, Asia is also a dynamic market that significantly grows with developments in technology and digitalization. For example, a research by Google and Temasek shows that Southeast Asia is the world's fastest growing internet region. The internet economy in Southeast Asia is expected to grow by 6.5 times from US\$31 billion in 2015 to US\$197 billion in 2025. All these make it critical for marketers, whether domestic, regional or global, to stay in touch if not ahead, in their understanding of what is happening in Asia from a marketing perspective and what Asia has to offer to the world. One phenomenon happening in the Asian market and which marketers should pay utmost attention to, is the rapidly unfolding digital revolution that has fundamentally transformed not just the extent but also the nature of competition. What makes it even more challenging and complicating is also how such a revolution impacts on consumer and business buying behavior. Disruptive technologies supported by this digital revolution have brought in new competitors and enabled existing competitors to surpass the conventional boundaries which we may be quite familiar with. Asian consumers have become more educated and connected and have embraced newer ways of selecting, buying and using products and services. In this book, the Father of Modern Marketing, Professor Philip Kotler has collaborated with two marketing experts from Asia, Hermawan Kartajaya from Indonesia and Hooi Den Huan from Singapore to publish a book on Marketing for Competitiveness: Asia to the World — In the Age of Digital Consumers. This book argues that marketing is no longer just vertical but has encompassed a new, more horizontal paradigm. In addition to many new concepts and frameworks, this book includes a plethora of real-world examples from various countries in Asia, which will help to shed light on how companies, both Asian and global, compete in Asia. Useful lessons can be drawn by all businesses in the world on how to win the mind, heart and spirit of the Asian consumer — digital and non-digital.

Wearable Technology for Robotic Manipulation and Learning Bin Fang, Fuchun Sun, Huaping Liu, Chunfang Liu, Di Guo, 2020-10-06 Over the next few decades, millions of people, with varying backgrounds and levels of technical expertise, will have to effectively interact with robotic technologies on a daily basis. This means it will have to be possible to modify robot behavior without explicitly writing code, but instead via a small number of wearable devices or visual demonstrations. At the same time, robots will need to infer and predict humans' intentions and internal objectives on the basis of past interactions in order to provide assistance before it is explicitly requested; this is the basis of imitation learning for robotics. This book introduces readers to robotic imitation learning based on human demonstration with wearable devices. It presents an advanced calibration method for wearable sensors and fusion approaches under the Kalman filter framework, as well as a novel wearable device for capturing gestures and other motions. Furthermore it describes the wearable-device-based and vision-based imitation learning method for robotic manipulation, making it a valuable reference guide for graduate students with a basic knowledge of machine learning, and for researchers interested in wearable computing and robotic learning.

Chinese Financial System, The: Sino-centricity And Orchestrated Control Dominique Jolly, 2023-11-14 With a strategic and geopolitical view on China's financial system, this book explores a number of roles that it plays in the world's second largest economy. The first key mission has been the financing of the domestic economy. The second one has been the financing of infrastructures (transportation, energy, and telecommunication) to offer companies a conducive environment to develop manufacturing facilities. Thirdly, it supports Chinese foreign investment. The final and most recent role is the active use of technology in finance and investment to collect big data. The book supports three theses. The first thesis argues that finance and investment are not only the product of market forces but also other dimensions like regulations, geopolitics, technology and internal governance. Another thesis is that the State Council is metaphorically the conductor, and financial and economic actors are the performers who must imperatively follow the conductor. Last but not least, the third thesis is that the sino-centric perspective adopted by the Chinese authorities impedes foreign entry. Contrary to industries opened to foreign companies, the Chinese government left ajar the door to banking industry — characterizing foreign banks as marginal actors in the system.

Xiaomi Jayadevan P.K., 2021-04-15 There may be no hotter company on the planet than Xiaomi. In less than a decade, the company has gone from being a Chinese start-up to a global player in the smartphone market. Driven by the philosophy of 'Innovation for all', Xiaomi has a cult fan following; after all, it offers high-end features at relatively low prices. Besides, it does not only sell phones. It also sells earphones, bluetooth speakers, televisions, fitness bands, weighing scales, power banks and air purifiers, among other products. Each one of them offering the best possible value for money. How did a small Chinese start-up become so big in a matter of years? How has it managed a cult following in such a short time period when a company like Apple took decades? What's the secret behind Xiaomi's success? Such are the answers this book will provide at length.

New Power Jeremy Heimans, Henry Timms, 2018-04-03 From two influential and visionary thinkers comes a big idea that is changing the way movements catch fire and ideas spread in our highly connected world. For the vast majority of human history, power has been held by the few. Old power is closed, inaccessible, and leader-driven. Once gained, it is jealously guarded, and the powerful spend it carefully, like currency. But the technological revolution of the past two decades has made possible a new form of power, one that operates differently, like a current. New power is made by many; it is open, participatory, often leaderless, and peer-driven. Like water or electricity,

it is most forceful when it surges. The goal with new power is not to hoard it, but to channel it. New power is behind the rise of participatory communities like Facebook and YouTube, sharing services like Uber and Airbnb, and rapid-fire social movements like Brexit and #BlackLivesMatter. It explains the unlikely success of Barack Obama's 2008 campaign and the unlikelier victory of Donald Trump in 2016. And it gives ISIS its power to propagate its brand and distribute its violence. Even old power institutions like the Papacy, NASA, and LEGO have tapped into the strength of the crowd to stage improbable reinventions. In *New Power*, the business leaders/social visionaries Jeremy Heimans and Henry Timms provide the tools for using new power to successfully spread an idea or lead a movement in the twenty-first century. Drawing on examples from business, politics, and social justice, they explain the new world we live in--a world where connectivity has made change shocking and swift and a world in which everyone expects to participate.

Brand Competition and Consumer Preference of the Chinese Home Appliance Markets

(2) MIC Research Team,2016-08-01 Using big data analytics, this research covers top Chinese home appliance brands, including electric fan, air purifier, and vacuum cleaner, with following analysis dimensions: brand ranking by the number of items available on online stores, ranking by sales, number of times online users mention about a particular brand, brand preferences, factors affecting purchase, as well as online shoppers' comments and user analysis. All those dimensions help build a massive social media database which can more accurately reflect consumer needs in China.

The New Threat Dominique Jolly,2022-08-13 This book explores technology creation in China, offering a holistic picture of the national system of innovation. By analyzing companies of various sizes and sectors and taking a deep dive into the role of the Chinese government, the author reveals how China has become the market leader in innovative technologies. The author investigates where innovation is being produced at a regional level, the contribution of Chinese start-ups and large companies, the value of registered patents in China, and what this all means to Western countries. An insightful resource to students and scholars interested in Chinese business and economy, this book illustrates the various elements that are required for countries to develop innovative outputs, and shows that China has developed all of these components.

Smartphone Start-ups Claudio Giachetti,2017-11-16 This book provides detailed examination of start-up companies which entered the smartphone industry following the revolution triggered by Apple with its iPhone in 2007. Analytical case studies explore the rationale behind the business models, financing cycles, and factors that helped start-ups sustain their own growth and survival. By studying these companies through the lens of entrepreneurship and competitor analysis, the author investigates not only the opportunities that can arise from technological evolution, but also the uncertainty that has developed surrounding the industry's future. Topics covered include value proposition development, evaluation of the effectiveness of business models, and market competition analysis, unveiling thought-provoking results about this rapidly changing industry. Scholars of entrepreneurship, business strategy and innovation management will find this timely book a valuable contribution to the field.

Development with Global Value Chains Dev Nathan,Meenu Tewari,Sandip Sarkar,2018-11-30 Can firms and economies utilize global value chains for development? How can they move from low-income to middle-income and even high-income status? This book addresses these questions through a series of case studies examining upgradation and innovation by firms operating in GVCs in Asia. The countries examined are China, India, South Korea, the Philippines, and Sri Lanka, with studies of firms operating in varied sectors - aerospace components, apparel, automotive, consumer electronics including mobile phones, telecom equipment, IT software and services, and pharmaceuticals.

Handbook of Chinese Management Check-Teck Foo,2023-09-05 This handbook explores the theme of managing inside China and consists of chapters that communicate the major managerial concepts within the context of Mainland China. Its key emphasis is to clearly highlight the differences in the art of managing in China vs. the West, while acknowledging that these differences may be narrowing as a result of globalization. Chapters in the book elaborate on how management is

affected as China experiences rapid change while some aspects of Chinese culture remain unchanged and steeped in tradition. The book goes further in exploring this complexity by juxtaposing China's orientation towards interpersonal relations, or *guanxi*, with the government's emphasis on law, which is now becoming more rule-based than before. Business & Management academics and practitioners will gain useful insight into Chinese management practices and their contrast to established Western ones when they use the Handbook of Chinese Management as a reference.
