Here We Go Simon Hart,2016-08-01 For Everton FC, the 1980s were the most successful decade in the club's history. It was a time when Wembley became a second home for Howard Kendall's band of brothers as they stepped out from Liverpool's long shadow to take their neighbours' mantle as the country's best team, winning two league titles, an FA Cup and the European Cup Winners' Cup. In Here We Go, Simon Hart interviews some of the Blues' best-loved players from that era - along with the most controversial and the unsung heroes too - to provide a vivid, colourful portrait of a period when a group of unheralded young footballers came together to achieve something special with a rare, intoxicating mix of raw talent and team spirit. The players featured include Kevin Ratcliffe, Adrian Heath, Gary Lineker, Pat van den Hauwe, Mark Higgins, Kevin Richardson, Paul Power and Pat Nevin, along with Colin Harvey, Kendall's No2 during the glory days and subsequently manager himself by the decade's end. Thirty years on from Everton's last championship-winning campaign of 1986/87, they remember the Wembley highs and heartbreaks, and the epic derby duels in an age when Merseyside, for all its troubles, stood at the very forefront of English football. They also recall the boozy nights, the bold pranks and the bad haircuts, and their recollections capture just what it meant to be a footballer in a dramatic decade for the English game. Together they explain not only the Blues' rise to greatness but the decline that gradually set in after their European exile; they also offer a nostalgia-laden celebration of the team-building skills of the man who made it possible: the late, great Howard Kendall.

Drone Operator's Logbook Jonathan Rupprecht, 2015-12-02 Federal Aviation Regulations, COA, & Section 333 Exemption Compliant. This logbook has been specifically designed to be compliant with 14 CFR 61.51, Section 333 exemptions, and COA logbook requirements. Easy COA Reporting. If you have MULTIPLE aircraft, this will NOT work. Buy one logbook for each drone. The FAA requires that commercial operators who have 333 exemptions and blanket COA's to file monthly reports. It is EXTREMELY annoying to log all this information and then send it in via email. If you have one drone per logbook, do not have any takeoff or landing damage, equipment malfunctions, or lost link events, you could simply make scans of the pages for the month and email them into the FAA. The COA's say, number of flights (per location, per aircraft) & total aircraft operational hours[.] The columns only support one aircraft; however, recreational flyers could list multiple aircraft because they are currently not required to report. Disclaimer: Current FAA blanket COAs say must submit the following information and do not explicitly say scans are acceptable. The FAA could issue guidance in the future further clarifying the mode of report (text in email vs. scan in email). It is up to YOU to keep up to date on this. The FAA or Law Enforcement Can Request Your Logbook. 14 C.F.R. § 61.51(i) says, Persons must present their pilot certificate, medical certificate, logbook, or any other record required by this part for inspection upon a reasonable request by the FAA, an authorized representative from the National Transportation Safety Board, or any Federal, State, or local law enforcement officer. If your electronic logbook is on your device, do you really want to give law enforcement or the FAA your device? Furthermore, how are you to get the data off that device? Insurance. When you apply for insurance, they will ask you to fill out a form that is going to ask for all sorts of information. A logbook will assist you in filling out the form so you can receive the most accurate quote. Marketing. Showing a completed logbook to a potential customer is a great marketing point. Like the old adage, A picture is worth a thousand words, a good logbook is worth a thousand flights. You can quickly demonstrate your flight experience by flipping through the pages. Furthermore, a well-kept and orderly logbook gives the impression that you are a professional. Required in Other Countries. Other countries such as South Africa require the drone logbook to be in paper. Paper is the current industry standard. Going for a Certificate/Rating. Individuals can use this logbook to apply their experience towards UAS certificates / ratings. While the FAA is still working on creating certificates and ratings, you can prepare for the future by logging everything now. Less Cumbersome. If you are marketing to a potential client, you can scan pages of your logbook and send it to them. It is more cumbersome to get the data off a phone or website. Very Little Problems. What happens if your phone is stolen, water damaged, battery dies, or there is poor cell phone signal? Paper does not need a cell signal or batteries. No Data Theft. You don't have to worry about data theft like you would with a website or an app. Fidelity. Electronic logbooks can be changed while pen and paper is permanent.
