The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.

Lessons from a Birdbrain Laura McDermott, 2021-10-05 Lessons from a Birdbrain: Winter, Ohio introduces 21 birds that spend the coldest months in the Buckeye state, where I call home. With each bird, I include reflections and a quote I encourage readers to ponder along with learning more about the birds. I've tried to make the learning fun and different from what you would find if you looked up the bird in a typical field guide. This may be related to their nicknames, their breeding behavior or something about my experience with getting the picture. Reflections are all about mindfulness, an aha that has helped me live life more serenely. Why or how, you may ask, does birding go with mindfulness? From Oxford Languages, Mindfulness is defined as 1) the quality or state of being conscious or aware of something 2) a mental state achieved by focusing one's awareness on the present moment while calmly acknowledging and accepting one's feelings, thoughts and bodily sensations. Birdwatching is all about the state of being conscious and aware. If I'm not paying close attention, I can miss a lot. And birdwatching brings me alertly into the present. Acknowledging and accepting feelings, thoughts and bodily sensations, admittedly I often have to work at?but everything else about birding is practically the definition of mindfulness itself. The 'birdbrain lesson' component of this book starts to address the harder feelings work. I've frequently been one to discount, misinterpret, ignore or flat out flee from that icky f word. But I'm working on it and through my continued growth, I hope to share insights that will help others on their journey. Someone once said when the student is ready the teacher appears. For me, the teacher often has feathers. I say that because many times, solutions to problems and insights of great value come to me while birding. One could surmise this is the result of letting my brain work in the background on something while I focus my awareness on the present moment to spot that Common Merganser or that lively Carolina Chickadee. Feedback, questions, newsletter, check out my <https://lessonsbirdbrain.com/> Happy birding!

The Implausible Rewilding of the Pyrenees Steve Cracknell,2021-07-21 The return of large predators might help to reinvigorate nature. But are wild animals like wolves and bears compatible with livestock farming? Will their arrival destroy mountain communities? Unable to decide on the issues, Steve Cracknell climbs up to the isolated summer pastures of the Pyrenees to talk with those most concerned: the shepherds. He also meets hunters and ecologists - and goes looking for bears. In a book of relevance to the rewilding debate in Britain, the author shows how attitudes to the wild are bound up with cultural perceptions. Nobody has a monopoly of the truth.
