Greg Egan

Borderless Eliot Peper,2018 In a split-page book format, Wolfe defines the word borderless through an interactive experience of turning split pages to form new compositions and page layouts. This opportunity shows potential success in functioning without borders that enforce limitation and division. Without these divisions we are able to have the freedom of choice and to find empathy, understanding and new perspectives through all versions of visual and social landscapes.

Bandwidth Eliot Peper,2018 A rising star at a preeminent political lobbying firm, Dag Calhoun represents the world's most powerful technology and energy executives. But when a close brush with death reveals that the influence he wields makes him a target, impossible cracks appear in his perfect, richly appointed life. Like everyone else, Dag relies on his digital feed for everything--a feed that is as personal as it is pervasive, and may not be as private as it seems. As he struggles to make sense of the dark forces closing in on him, he discovers that activists are hijacking the feed to manipulate markets and governments. Going public would destroy everything he's worked so hard to build, but it's not just Dag's life on the line--a shadow war is coming, one that will secure humanity's future or doom the planet to climate catastrophe. Ultimately, Dag must decide the price he's willing to pay to change the world.

Ambient Literature Tom Abba,Jonathan Dovey,Kate Pullinger,2020-11-30 This book considers how a combination of place-based writing and location responsive technologies produce new kinds of literary experiences. Building on the work done in the Ambient Literature Project (2016-2018), this book argues that these encounters constitute new literary forms, in which the authored text lies at the heart of an embodied and mediated experience. The visual, sonic, social and historic resources of place become the elements of a live and emergent mise-en-scène. Specific techniques of narration, including hallucination, memory, history, place based writing, and drama, as well as reworking of traditional storytelling forms combine with the work of app and user experience design, interaction, software authoring, and GIS (geographical information systems) to produce ambient experiences where the user reads a textual and sonic literary space. These experiences are temporary, ambiguous, and unpredictable in their meaning but unlike the theatre, the gallery, or the cinema they take place in the everyday shared world. The book explores the potentiality of a new literary form produced by the exchange between location-aware cultural objects, writers and readers. This book, and the work it explores, lays the ground for a new poetics of situated writing and reading practices.

Permutation City Greg Egan,1994-04-26 Paul Durham keeps making Copies of himself: software simulations of his own brain and body which can be run in virtual reality, albeit seventeen times more slowly than real time. He wants them to be his guinea pigs for a set of experiments about the nature of artificial intelligence, time, and causality, but they keep changing their mind and baling out on him, shutting themselves down. Maria Deluca is an Autoverse addict; she's unemployed and running out of money, but she can't stop wasting her time playing around with the cellular automaton known as the Autoverse, a virtual world that follows a simple set of mathematical rules as its "laws of physics". Paul makes Maria a very strange offer: he asks her to design a seed for an entire virtual biosphere able to exist inside the Autoverse, modelled right down to the molecular level. The job will pay well, and will allow her to indulge her obsession. There has to be a catch, though, because such a seed would be useless without a simulation of the Autoverse large enough to allow the resulting biosphere to grow and flourish — a feat far beyond the capacity of all the computers in the world.

The Inland Sea Madeleine Watts,2021-01-12 In this eloquent debut, a young Australian woman unable to find her footing in the world begins to break down when the emergencies she hears working as a 911 operator and the troubles within her own life gradually blur together, forcing her to grapple with how the past has shaped her present (Publishers Weekly). Drifting after her final year in college, a young writer begins working part-time as an emergency dispatch operator in Sydney. Over the course of an eight-hour shift, she is dropped into hundreds of crises, hearing only pieces of each. Callers report car accidents and violent spouses and homes caught up in flame. The work becomes monotonous: answer, transfer, repeat. And yet the stress of listening to far-off disasters seeps into her personal life, and she begins walking home with keys in hand, ready to fight off men disappointed by what they find in neighboring bars. During her free time, she gets black-out drunk, hooks up with strangers, and navigates an affair with an ex-lover whose girlfriend is in their circle of friends. Two centuries earlier, her great-great-great-great-grandfather--the British explorer John Oxley--traversed the wilderness of Australia in search of water. Oxley never found the inland sea, but the myth was taken up by other men, and over the years, search parties walked out into the desert, dying as they tried to find it. Interweaving a woman's self-destructive unraveling with the gradual worsening of the climate crisis, *The Inland Sea* is charged with unflinching insight into our age of anxiety. At a time when wildfires have swept an entire continent, this novel asks what refuge and comfort looks like in a constant state of emergency.

The Internet Is Not the Answer Andrew Keen,2015-01-06 The renowned Internet commentator and author of *How to Fix the Future* "expos[es] the greed, egotism and narcissism that fuels the tech world" (Chicago Tribune). The digital revolution has contributed to the world in many positive ways, but we are less aware of the Internet's deeply negative effects. *The Internet Is Not the Answer*, by longtime Internet skeptic Andrew Keen, offers a comprehensive look at what the Internet is doing to our lives. The book traces the technological and economic history of the Internet, from its founding in the 1960s through the rise of big data companies to the increasing attempts to monetize almost every human activity. In this sharp, witty narrative, informed by the work of other writers, reporters, and academics, as well as his own research and interviews, Keen shows us the tech world, warts and all. Startling and important, *The Internet Is Not the Answer* is a big-picture look at what the Internet is doing to our society and an investigation of what we can do to try to make sure the decisions we are making about the reconfiguring of our world do not lead to unpleasant, unforeseen aftershocks. "Andrew Keen has written a very powerful and daring manifesto questioning whether the Internet lives up to its own espoused values. He is not an opponent of Internet culture, he is its conscience, and must be heard." —Po Bronson, #1 New York Times–bestselling author

Warning them will force her out into the open, back on-grid, and directly into danger. Emily can't escape the past. But can she seize the future? Emily's quest for redemption spirals into an all-out shadow war. What constitutes justice in a world run by algorithms? The feed--and Emily--must be reinvented. Or destroyed.

The Next Global Stage Ken'ichi Ōmae,2005 A radically new world is taking shape from the ashes of yesterday's nation-based economic world. To succeed, you'll need to act on a global stage - and master entirely new rules about the sources of economic power and the drivers of growth. In *The Global Stage*, legendary business strategist Kenichi Ohmae synthesizes today's emerging trends into the first coherent view of tomorrow's global economy, and its implications for politics, business, and personal success. As important as Huntington's *The Clash of Civilizations*, as fascinating and relevant as Friedman's *The Lexus and the Olive Tree*, this book doesn't just explain what's happened: it prepares you for what will happen next.

The Googlization of Everything Siva Vaidhyanathan,2012-03-13 In the beginning, the World Wide Web was exciting and open to the point of anarchy, a vast and intimidating repository of unindexed confusion. Into this creative chaos came Google with its dazzling mission—To organize the world's information and make it universally accessible—and its much-quoted motto, Don't be evil. In this provocative book, Siva Vaidhyanathan examines the ways we have used and embraced Google—and the growing resistance to its expansion across the globe. He exposes the dark side of our Google fantasies, raising red flags about issues of intellectual property and the much-touted Google Book Search. He assesses Google's global impact, particularly in China, and explains the insidious effect of Googlization on the way we think. Finally, Vaidhyanathan proposes the construction of an Internet ecosystem designed to benefit the whole world and keep one brilliant and powerful company from falling into the evil it pledged to avoid.
