Coffee, Tea, and Holy Water Amanda Hudson, 2015
Coffee, Tea, and Holy Water takes the reader on an armchair tour of Christianity in our world, across borders and over continents. Author Amanda Hudson provides a personal touch with cultural curiosities, profound questions about the nature and practice of faith, as she travels to five countries: Brazil, Wales, Tanzania, China, and Honduras. Part reflection, part entertaining travelogue, *Coffee Tea, and Holy Water* explores everything from each culture's offer of hospitality to life in a Masaai boma. There are lessons to be learned from other countries that are not visible in our own culture, writes Hudson, Questions that are not our questions. Struggles that are not our normal struggles. And yet, when we look around the throne one day at the nations assembled there, instead of marveling at the diversity, I think we will actually be fascinated by what we all had in common. This is a book about the places we meet, what we share, how we can learn to cross borders (geographical, cultural, personal), and learning that the steps to do so make all the difference. Honest, witty, and thought-provoking, these stories come from a young woman raised in the South, who found herself wondering what normal Christianity looked like in other countries. (Publisher).

Small Businesses Trickling Up in Central and Eastern Europe Galen Spencer Hull, 2013-01-11 First published in 1999. Small businesses now constitute the most dynamic element of growth in the emerging markets of the Central and Eastern European region. This book argues that the small and medium sized enterprise (SME) sector has contributed more to the growth of these countries in transition than have privatized state enterprises and the public sector. In 1989 most of the countries of Eastern and Central Europe were still under an economic system dominated by state-owned enterprises. Since then a process of

liberalization has been unleashed to promote free market policies. This has involved programs of privatization and restructuring of public enterprises, as well as the promotion of policies to enable a private sector to develop. Small businesses are creating thousands of new jobs while large companies are retrenching and downsizing their work force. In some countries of the region this process is much further along than in others. However, the SME sector has developed at a more rapid pace than has the privatization of the large public companies. There has been a flurry of new enterprises springing up throughout the region which are trickling up in a frequently hostile environment against tremendous odds, and yet managing to have a pronounced impact on their respective economies. Small businesses have taken over in sectors that used to be dominated by big enterprises, primarily in services and consumer products. They have provided a crucial outlet for pent-up entrepreneurial talent that had remained dormant during the long period of state domination. This work urges legislators, policy-makers, and development agencies alike to take account of the importance of the SME's in their legislation and planning. Given a more favorable environment, these small businesses will provide even greater impetus for economic growth. Equally important is for entrepreneurs themselves to be convinced of the rightness of their path in societies that have traditionally looked down upon profit-seekers as unscrupulous and selfish. If the CEE region is to achieve its full potential of economic growth, policies and support mechanisms

to promote the SME sector will be needed to assure a favorable environment.
