Ihminen ja säteily Georgiy Ostroumov, Eva Jansson, 2020-10-22 Ihmiskunnan historia on erehdyksiä täynnä: Rooman valtakunnan lyijypikarit, asbesti, DDT, elonhopeaa hammaspaikoissa jne. Ihminen on rakentanut oman ympäristönsä täyteen säteileviä laitteita, jotka aiheuttavat joskus pahoinvointia, vaikka tarkoitus oli helpottaa elämää ja nostaa elämän laatua. Pisteleekö tietokone sormiasi? Kuumottaako älypuhelin korvaasi, särkeekö päätäsi, nukutko huonosti? Oletko varma siitä, että soittamasi puhelut eivät aiheuta terveyshaittaa? Älypuhelin ei aina ole se haitallisin laite kotona. Kutsumattomat vieraat kodissasi kuten radiolinkit, tutkat ja tukiasemat tuovat joskus enemmän terveyshaittoja. Entäpä matalataajuiset magneettikentät tai sähkökentät? Miten valita oikea itkuhälytinvauvallesi, kuulokkeet lapsellesi, handsfree-laite itsellesi ja kotiverkko perheellesi? Lue riippumattomien asiantuntijoiden teos, joka kertoo tekniikasta ymmärrettävästi ja tarjoaa ratkaisuja turvallisempaan elämään. Kirjoittajat: Ph.D. (mikroaaltotekniikka) Georgiy Ostroumov ja FM Eva Jansson

Catálogo de los copépodos (Crustacea: Copepoda: Calanoida y Cyclopoida) de cuerpos de agua temporales de Jalisco, México Eduardo Suárez Morales, Karl Edward Velázquez Ornelas, Manuel Ayón Parente, 2021-10-13 Los copépodos son los animales más abundantes del planeta y representan un componente fundamental de las tramas alimenticias acuáticas. Habitan todos los ambientes acuáticos, incluyendo las aguas continentales, donde su riqueza de especies sigue siendo explorada. Aún considerando su gran importancia, existen relativamente pocos estudios en México y hay zonas en las que la fauna de copépodos permanece desconocida. Este es el caso del estado de Jalisco donde, a pesar su gran variedad de hábitats acuáticos, la taxonomía y la distribución de los copépodos no habían sido estudiadas. Nuestro trabajo representa el resultado del mayor esfuerzo de investigación hasta ahora realizado para conocer los copépodos continentales de la región.

Group decision making based on power Heronian aggregation operators under neutrosophic cubic environment Peide Liu , Qaisar Khan, Tahir Mahmood, Neutrosophic cubic sets can deal with the complex information by combining the neutrosophic sets and cubic sets, the power average (PA) can weaken some effects of awkward data from biased decision makers, and Heronian mean (HM) can deal with the interrelationship between the aggregated attributes or arguments. In this article, in order to consider the advantages of the PA and HM, we combined and extended them to process neutrosophic cubic information. Firstly, we defined a distance measure for neutrosophic cubic numbers, then we presented the neutrosophic cubic power Heronian aggregation operator and neutrosophic cubic power weighted Heronian aggregation operator, and some characters and special cases of these new aggregation operators were investigated. Furthermore, we gave a new approach for multiattribute group decision making based on new proposed operators. Finally, two examples were given to explain the validity and advantages of the developed approach by

comparing with the existing method.

Hungarian Mathematical Olympiad (1964-1997): Problems And Solutions Fusheng Leng,Xin Li,Huawei Zhu,2022-10-04 This book is about a famous Hungarian mathematics competition that was founded in 1894, and thus, the oldest mathematics competition for secondary school students organized on a national scale. This book is based on Volumes III and IV of the Hungarian work by János Surányi, covering the years from 1964 to 1997. Hungary, along with Russia, has a well-deserved reputation for proposing important, instructive, and interesting problems. Here, the reader will find a treasure trove of over 100 of them. The solutions are written carefully, giving all the details, and keeping in mind at all times the overall logical structures of the arguments. An outstanding feature of this book is Part II: Discussion. Here, the problems are divided by topics into six groups. It contains a discussion of the topic in general, followed by the basic results, that precedes the discussions of the individual problems. When a student encounters some difficulty in a problem, this part of the book can be consulted without revealing the complete solution. As an alternative, a student can also start with this part to familiarize with the general topic before attempting any problems. Finally, almost 400 additional problems from the legendary KöMaL (Secondary School Mathematics and Physics Journal) takes the student to mathematical topics beyond competitions.

Transdisciplinary Engineering: A Paradigm Shift C.-H. Chen,A.C. Trappey,M. Peruzzini,2017-07-20 Concurrent Engineering is based on the concept that different phases of a product life cycle should be conducted concurrently and initiated as early as possible within the Product Creation Process (PCP). Its main goal is to increase the efficiency and effectiveness of the PCP and reduce errors in the later stages, and to incorporate considerations for the full lifecycle, through-life operations, and environmental issues of the product. It has become the substantive basic methodology in many industries,

and the initial basic concepts have matured and become the foundation of many new ideas, methodologies, initiatives, approaches and tools. This book presents the proceedings of the 24th ISPE Inc. International Conference on Transdisciplinary (formerly: Concurrent) Engineering (TE 2017), held in Singapore, in July 2017. The 120 peer-reviewed papers in the book are divided into 16 sections: air transport and traffic operations and management; risk-aware supply chain intelligence; product innovation and marketing management; human factors in design; human engineering; design methods and tools; decision supporting tools and methods; concurrent engineering; knowledge-based engineering; collaborative engineering; engineering for sustainability; service design; digital manufacturing; design automation; artificial intelligence and data analytics; smart systems and the Internet of Things. The book provides a comprehensive overview of recent advances in transdisciplinary concurrent engineering research and applications, and will be of interest to researchers, design practitioners and educators working in the field.

Proceedings of the 2nd International Conference on Internet, Education and Information Technology (IEIT 2022) Ahmed El-Hashash, Fanny Dameaty Hutagalung, Ahmed Said Ghonim, Kun Zhang, 2023-01-14 This is an open access book. This conference takes "bringing together global wisdom in scientific innovation to promote high-quality development as the theme and focuses on research fields including information technology, education, big data, and Internet. This conference aims to expand channels of international academic exchange in science and technology, build a sharing platform of academic resources, promote scientific innovation on the global scale, improve academic cooperation between China and the outside world. China's Economic Development Lee Pei May, 2024-06-21 Through a rigorous examination of "China's rise", Lee addresses an important question—Did China catch up? Or more specifically, can growth be automatically translated to catching up with the advanced industrialised countries or has it only allowed limited progress (if any) to be made? To answer these queries and the broader question of the possibility of the Global South converging with the Global North, four development theories are utilised, with competing explanations, to uncover the complexity and multifaceted development of China. This includes whether China really has a unique developmental model to offer. Positioning China within the global economy, this book traces its developmental progress over time as well as its progress relative to other countries. To understand whether the Chinese political economy is socialist (or not), Lee moves away from the orthodox definition of socialism and

instead examines the official narrative of Socialism with Chinese Characteristics. Lastly, this book argues that though China is catching up, challenges that could potentially block China's progress for a full catch-up are to be anticipated. A useful resource for students and scholars in the fields of international relations, international political economy, Chinese studies, and development studies.

Sistemas de Información en la empresa Luis Joyanes,2015-03-10 Este libro fue escrito como un libro de texto para carreras universitarias y de formación profesional y, a la vez, como un libro de lectura y consulta pensando en autodidactas y profesionales que desean introducirse en el campo de los sistemas de información. Además, la obra está inspirada en los pilares existentes y futuros de la actual era de la información que consta de cuatro pilares: cloud computing, información (Big Data), movilidad y medios sociales (social media). A lo que se les ha unido con gran intensidad en estos dos últimos años la fuerza o tendencia del Internet de las cosas (IoT) o Internet de todas las cosas (Internet of everything).

La covid-19 y la integración ante los desafíos de un nuevo orden mundial

Detlef Nolte,Brigitte Weiffen,Isabel Clemente Batalla,Francisco Daniel Parada,Isabel Marcela Rodríguez,Fernando Romero Wimer,Gerald Solano Aguilar,Percy Rodríguez Argüello,Ana Gabriela Navarro Alpizar,2021-04-08 Cuando pase la pandemia y sobrevenga la pospandemia, habrá que enfrentar los profundos cambios en el sistema internacional que conducirán hacia un nuevo orden mundial. Dichos cambios cubren diversos frentes: el económico, el geopolítico, el social o el ambiental, y un instrumento como la integración se debe preparar para atender de manera cooperativa, solidaria y consensuada tales retos. En el ámbito económico se produce una revalorización de la actuación de los Estados mediante políticas públicas orientadas inicialmente de manera prioritaria hacia la salud, pero que derivarán hacia otros temas de política social en materia de empleo y reactivación económica. Así, se consolidarán nuevas formas de encadenamientos productivos y de establecimiento de políticas públicas orientadas a priorizar medidas correspondientes a un Estado de bienestar, donde los objetivos de desarrollo sostenible adquieren prioridad, así como todas las políticas relacionadas con las problemáticas medioambientales. Estas medidas estarán acompañadas de una revalorización del manejo multilateral mediante reformas institucionales y acuerdos globales, influenciados a la vez por una gran disputa del liderazgo mundial entre los Estados Unidos y China, pero en un contexto de regionalización con diferentes áreas del planeta ejerciendo algún papel protagónico, como Asia Oriental y Medio Oriente. Los países de América Latina poco lograrán de manera individual y desorganizada, por lo cual un reto en la pospandemia es reactivar sus procesos de integración para atender las enormes necesidades y requerimientos del mejor modo posible. Académicos investigadores integrantes del Grupo de Reflexión sobre Integración y Desarrollo en América Latina y Europa (Gridale) analizan los desafíos de un nuevo orden mundial como consecuencia de la covid-19.

El Este de Asia en las Relaciones Internacionales Wilhelmy Von Wolff, Manfred Heinrich,2023-06-22 La inserción económica y política de los países del Este de Asia ha ido tomando un lugar fundamental en el sistema internacional. La comprensión y análisis de ésta requiere de destacados

analistas y expertos de nuestra región, que comparten intereses crecientes con esa zona del mundo. El Instituto de Estudios Internacionales de la Universidad de Chile, fue una de las primeras instituciones académicas que dio prioridad a la investigación y docencia sobre Asia-Pacífico. Uno de sus académicos más distinguidos, el Profesor Manfred Wilhelmy, presenta este interesante libro. El autor es un destacado Profesor Titular en el Instituto que desde los años 90 ha publicado sobre distintos temas regionales, tanto en la Revista de Estudios Internacionales, que dirigió por muchos años, y en libros co-editados con académicos del Instituto, entre su prolífica producción. Ha formado generaciones de expertos en esta área y ha apoyado a que esta labor continúe en el Instituto. Por lo anterior, es un honor poder ser parte de este nuevo esfuerzo académico, que nos invita a reflexionar y dimensionar la relevancia que esta región tiene para el sistema internacional en su conjunto y para América Latina en especial.

Guerra multidimensional entre Estados Unidos y China Alfredo Jalife-Rahme, 2020-12-23 En medio de la guerra multidimensional –geofinanciera, comercial, tecnológica, regional y de vacunas– que libra Estados Unidos contra China, el “nuevo orden mundial post-COVID-19” no trastoca, sino profundiza y acelera tendencias irreversibles. Tales tendencias al “nuevo orden tripolar” iniciaron desde la crisis financierista de 2008, cuando China optó por no seguir más el liderazgo de la tramposa globalización de Estados Unidos. La nueva bipolaridad tecnológica de Estados Unidos vs. China/Rusia también conlleva componentes geopolíticos superlativos, tanto a lo largo de la Ruta de la Seda terrestre de China como en la periferia inmediata de Rusia, que han sido incendiadas o desestabilizadas en sincronía con las obscenas giras bélicas en sus regiones por Mike Pompeo. China se prepara para convertirse en una superpotencia, aunque ya lo es en el ámbito geoeconómico, astrofísico –alunizaje en el lado oscuro de la Luna– y con su liderazgo en la generación de tecnologías, 5G y 6G. En el quinto pleno del Partido Comunista Chino su Comité Central celebró, a puerta cerrada, su más importante cónclave del año y anunció su plan quinquenal para concretar su autarquía (autosuficiencia). De manera que ha proyectado su mirífico plan “China 2025” sobre su autarquía tecnológica, al unísono de sus Tres Rutas de la Seda (continental/marítima/del Ártico) financiadas por el Asia Infrastructure Investment Bank –el máximo banco del mundo–, mientras impulsa el 15-RCEP: el bloque económico más grande del planeta, sin Estados Unidos ni India. La autarquía tecnológica representa la piedra de toque del plan quinquenal conforme China se parapeta frente a las “amenazas de desacoplamiento” (decoupling) y la decreciente globalización para girar a su economía doméstica mediante su estrategia de la “circulación dual”: permanecer abierta a la inversión y comercio foráneos, mientras gira para edificar un ecosistema económico interno menos vulnerable a las sanciones externas y a las turbulencias geopolíticas. ¡Si algo teme China, desde el inconmensurable sabio Confucio del siglo V a.C., es el caos! Hoy en día, según tres relevantes actores políticos de Occidente –Kevin Rudd, Alastair Crooke y Henry Kissinger–, el mundo se encuentra a un paso del “Momento Sarajevo” como consecuencia de la escalada entre Estados Unidos y China (aliada de Rusia), y por los varios puntos candentes que pueden jalar a las superpotencias a una confrontación secuencial, como ocurrió en la Primera Guerra Mundial, que aparentemente nadie deseaba y que acabó siendo fatídicamente inexorable.
