**Mil Mi-24 Hind Gunship** Alexander Mladenov,2012-07-20 With its distinctive double-cockpit design, the Mi-24 'Hind' is arguably the most recognizable war machine of the Cold War, and has achieved near-legendary status in the annals of military history. The first Soviet helicopter to function as both a gunship and an assault transport, it served extensively in Afghanistan, and is now employed by militaries across the world. Written by an expert on the 'Hind', an drawing on manufacturing and military sources, this book presents the Mi-24 in all of its brutal glory, from design and development to deployment and combat. Also included are a number of color plates showing the distinct paint schemes employed by various nations in a range of theaters/ theatres and for different armies.

**"An Honorable Place in American Air Power"** Frank A. Blazich (Jr.),2020 Military historian and Civil Air Patrol (CAP) member Frank A. Blazich Jr. collects oral and written histories of the CAP's short-lived--but influential--coastal air patrol operations of World War II and expands it in a scholarly monograph that cements the legacy of this vital civil-military cooperative effort--

Low-intensity Conflict in the Third World ,1988 A common thread ties together the five case studies of this book: the persistence with which the bilateral relationship between the United States and the Soviet Union continues to dominate American foreign and regional policies. These essays analyze the LIC environment in Central Asia, the Middle East, Southeast Asia, Latin America, and sub-Saharan Africa.

Chinese Lessons from Other Peoples' Wars Andrew Scobell,David Lai,Roy Kamphausen,2019-07-24 The importance of China stems not only from its current international role and its influence on the Asia-Pacific region in particular, but also because China's impact on global developments will likely continue to grow. One of our enduring imperatives is to accurately survey China's experiences as a means to grasp its existing perceptions, motivations, and ambitions. More than ever, solid, evidence-based evaluation of what the PLA has learned from the use of force and conflict elsewhere in the world is needed to shed light on the prospects for its cooperation, or rivalry, with the international community. This volume provides unique, valuable insights on how the PLA has applied the lessons learned from others' military actions to its own strategic planning.

**Combat Operations: Stemming the Tide, May 1965 to October 1966 (Paperback)** John M. Carland,2000 Combat Operations: Stemming the Tide describes a critical chapter in the Vietnam conflict, the first eighteen months of combat by the U.S. Army's ground forces. Relying on official American and enemy primary sources, John M. Carland focuses on initial deployments and early combat and takes care to present a well-balanced picture by discussing not only the successes but also the difficulties endemic to the entire effort. This fine work presents the war in all of its detail: the enemy's strategy and tactics, General William C. Westmoreland's search and destroy operations, the helicopters and airmobile warfare, the immense firepower American forces could call upon to counter Communist control of the battlefield, the out-of-country enemy sanctuaries, and the allied efforts to win the allegiance of the South Vietnamese people to the nation's anti-Communist government. Carland's volume demonstrates that U.S. forces succeeded in achieving their initial goals, but unexpected manpower shortages made Westmoreland realize that the transition from stemming the tide to taking the offensive would take longer. Bruising battles with the Viet Cong and North Vietnamese in the Saigon area and in the Central Highlands had halted their drive to conquest in 1965 and, with major base development activities afoot, a series of high-tempo spoiling operations in 1966 kept them off balance until more U.S. fighting units arrived in the fall. Carland credits the improvements in communications and intelligence, the helicopter's capacity to extend the battlefield, and the availability of enormous firepower as the potent ingredients in Westmoreland's optimism for victory, yet realizes that the ultimate issue of how effective the U.S. Army would be and what it would accomplish during the next phase was very much a question mark.

**The Shock Doctrine** Naomi Klein,2010-04-01 The bestselling author of No Logo shows how the global free market has exploited crises and shock for three decades, from Chile to Iraq In her groundbreaking reporting, Naomi Klein introduced the term disaster capitalism. Whether covering Baghdad after the U.S. occupation, Sri Lanka in the wake of the tsunami, or New Orleans post-Katrina, she witnessed something remarkably similar. People still reeling from catastrophe were being hit again, this time with economic shock treatment, losing their land and homes to rapid-fire corporate takeovers. The Shock Doctrine retells the story of the most dominant ideology of our time, Milton Friedman's free market economic revolution. In contrast to the popular myth of this movement's peaceful global victory, Klein shows how it has exploited moments of shock and extreme violence in order to implement

its economic policies in so many parts of the world from Latin America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic events to advance radical privatization combined with the privatization of the disaster response itself. Klein argues that by capitalizing on crises, created by nature or war, the disaster capitalism complex now exists as a booming new economy, and is the violent culmination of a radical economic project that has been incubating for fifty years.

**The History of Terrorism** Gérard Chaliand, Arnaud Blin, 2016-08-23 This authoritative work provides an essential perspective on terrorism by offering a rare opportunity for analysis and reflection at a time of ongoing violence, threats, and reprisals. Some of the best international specialists on the subject examine terrorism's complex history from antiquity to the present day and find that terror, long the weapon of the weak against the strong, is a tactic as old as warfare itself. Beginning with the Zealots of the first century CE, contributors go on to discuss the Assassins of the Middle Ages, the 1789 Terror movement in Europe, Bolshevik terrorism during the Russian Revolution, Stalinism, "resistance" terrorism during World War II, and Latin American revolutionary movements of the late 1960s. Finally, they consider the emergence of modern transnational terrorism, focusing on the roots of Islamic terrorism, al Qaeda, and the contemporary suicide martyr. Along the way, they provide a groundbreaking analysis of how terrorism has been perceived throughout history. What becomes powerfully clear is that only through deeper understanding can we fully grasp the present dangers of a phenomenon whose repercussions are far from over. This updated edition includes a new chapter analyzing the rise of ISIS and key events such as the 2015 Paris attacks.

**Seeing Like a State** James C. Scott, 2020-03-17 "One of the most profound and illuminating studies of this century to have been published in recent decades."—John Gray, *New York Times Book Review* Hailed as "a magisterial critique of top-down social planning" by the *New York Times*, this essential work analyzes disasters from Russia to Tanzania to uncover why states so often fail—sometimes catastrophically—in grand efforts to engineer their society or their environment, and uncovers the conditions common to all such planning disasters. "Beautifully written, this book calls into sharp relief the nature of the world we now inhabit."—*New Yorker* "A tour de force."—Charles Tilly, Columbia University

**The Copyright Wars** Peter Baldwin, 2016-05-17 Today's copyright wars can seem unprecedented. Sparked by the digital revolution that has made copyright—and its violation—a part of everyday life, fights over intellectual property have pitted creators, Hollywood, and governments against consumers, pirates, Silicon Valley, and open-access advocates. But while the digital generation can be forgiven for thinking the dispute between, for example, the publishing industry and Google is completely new, the copyright wars in fact stretch back three centuries—and their history is essential to understanding today's battles. *The Copyright Wars*—the first major trans-Atlantic history of copyright from its origins to today—tells this important story. Peter Baldwin explains why the copyright wars have always been driven by a fundamental tension. Should copyright assure authors and rights holders lasting claims, much like conventional property rights, as in Continental Europe? Or should copyright be primarily concerned with giving consumers cheap and easy access to a shared culture, as in Britain and America? *The Copyright Wars* describes how the Continental approach triumphed, dramatically increasing the claims of rights holders. The book also tells the widely forgotten story of how America went from being a leading copyright opponent and pirate in the eighteenth and nineteenth centuries to become the world's intellectual property policeman in the late twentieth. As it became a net cultural exporter and its content industries saw their advantage in the Continental ideology of strong authors' rights, the United States reversed position on copyright, weakening its commitment to the ideal of universal enlightenment—a history that reveals that today's open-access advocates are heirs of a venerable American tradition. Compelling and wide-ranging, *The Copyright Wars* is indispensable for understanding a crucial economic, cultural, and political conflict that has reignited in our own time.

**The Last 100 Yards** Paul Berg, Army University Press, 2019-05 *The Last 100 Yards: The Crucible of Close Combat in Large-Scale Combat Operations* presents thirteen historical case studies of close combat operations from World War I through Operation Iraqi Freedom. This volume is a collection from the unique and deliberate perspective of the last 100 yards of ground combat. In today's Army, there are few leaders who have experienced multi-domain large-scale ground combat against a near-peer or peer enemy first hand. This volume serves to augment military professionals' understanding of the realities of large-scale ground combat operations through the experiences of those who lived it.

*To Life!* Linda Weintraub,2012-09-01 This title documents the burgeoning eco art movement from A to Z, presenting a panorama of artistic responses to environmental concerns, from Ant Farms anti-consumer antics in the 1970s to Marina Zurkows 2007 animation that anticipates the havoc wreaked upon the planet by global warming.

*Warships of the Ancient World* Adrian K. Wood,2013-01-20 The world's first war machines were ships built two millennia before the dawn of the Classical world. Their influence on the course of history cannot be overstated. A wide variety of galleys and other types of warships were built by successive civilisations, each with their own distinctive appearance, capability and utility. The earliest of these were the Punt ships and the war galleys of Egypt which defeated the Sea People in the first known naval battle. Following the fall of these civilisations, the Phoenicians built biremes and other vessels, while in Greece the ships described in detail in the 'Trojan' epics established a tradition of warship building culminating in the pentekonters and triaconters. The warships of the period are abundantly illustrated on pottery and carved seals, and depicted in inscriptions and on bas-reliefs. The subject has been intensively studied for two and a half millennia, culminating in the contemporary works of authoritative scholars such as Morrison, Wallinga, Rodgers and Casson. To date there are no works covering the subject which are accessible and available to non-academics.

*Enough* Roger Thurow,2010 For more than thirty years, humankind has known how to grow enough food to end chronic hunger worldwide. Yet while the "Green Revolution" succeeded in South America and Asia, it never got to Africa. More than 9 million people every year die of hunger, malnutrition, and related diseases every year - most of them in Africa and most of them children. More die of hunger in Africa than from AIDS and malaria combined. Now, an impending global food crisis threatens to make things worse. In the west we think of famine as a natural disaster, brought about by drought; or as the legacy of brutal dictators. But in this powerful investigative narrative, Thurow & Kilman show exactly how, in the past few decades, American, British, and European policies conspired to keep Africa hungry and unable to feed itself. As a new generation of activists work to keep famine from spreading, *Enough* is essential reading on a humanitarian issue of utmost urgency.

*Golden Gulag* Ruth Wilson Gilmore,2007-01-08 Since 1980, the number of people in U.S. prisons has increased more than 450%. Despite a crime rate that has been falling steadily for decades, California has led the way in this explosion, with what a state analyst called the biggest prison building project in the history of the world. *Golden Gulag* provides the first detailed explanation for that buildup by looking at how political and economic forces, ranging from global to local, conjoined to produce the prison boom. In an informed and impassioned account, Ruth Wilson Gilmore examines this issue through statewide, rural, and urban perspectives to explain how the expansion developed from surpluses of finance capital, labor, land, and state capacity. Detailing crises that hit California's economy with particular ferocity, she argues that defeats of radical struggles, weakening of labor, and shifting patterns of capital investment have been key conditions for prison growth. The results—a vast and expensive prison system, a huge number of incarcerated young people of color, and the increase in punitive justice such as the three strikes law—pose profound and troubling questions for the future of California, the United States, and the world. *Golden Gulag* provides a rich context for this complex dilemma, and at the same time challenges many cherished assumptions about who benefits and who suffers from the state's commitment to prison expansion.

*Weaving the Tangled Web* Christopher M Rein Editor,Christopher Rein,2018-10-13 Volume 1, *Weaving the Tangled Web: Military Deception in Large-Scale Combat Operations* surveys twelve cases of MILDEC from World War I through Desert Storm focusing on how armies have successfully used preconceptions to either immobilize an opponent or force the expenditure of energy in unproductive directions. The case studies span the major wars of the twentieth-century from the perspectives of several great powers and offer both a primer for planners of military deception and a caution for all military personnel to remain constantly on guard for practitioners of this ancient art.
